Storm damages farm buildings

By Melissa Piper

ANNVILLE - A freak thunderstorm accompanied by midwestern-like twisters carved a path of destruction and damage across northern Lancaster and southern Lebanon counties on Saturday evening Oct. 11.

A number of farms, homes and buildings in the area were either severly damaged or completely destroyed in the wake of high winds, and hail. More devestating damage occured when a series of three tornadoes touched down in several areas leaving twisted trees, crumbled buildings and torn power lines in its path.

Although several farms between Brickerville in Lancaster County and Fontana in Lebanon County received much of the damage; the brunt of the storm seemed to fall near Lebanon R4 south of Annville.

One farm in particular which received devestating damage was the property of Roy Shenk, Lebanon R4.

The Shenk's were out of the county when the storm hit at 6:45 p.m. but Larry Bender, who rents the farm, was present in the farmhouse at the time. Bender commented on the storm during Lancaster Farming's visit to the farm.

"When the storm hit, I went to the kitchen window." "It sounded as if a big jet plane was going to land in the field behind the house."

"I saw the funnel cloud

Roller-coaster prices seen

By Dieter Krieg

NEW PARK — Dairymen can expect "a great deal more volatility in prices" under present agricultural policies than with the old, according to R. L. Strock, manager of Maryland Cooperative Milk Producers Inc.

Speaking before an audience of 106 York County MCMP members and guests, Strock explained that previous stock buildups resulted in more uniform prices. Only stocks of non-fat powder are still excessive, the MCMP executive said, but they are not posing a threat. Stocks of butter and cheese have also declined, and with demand growing as supplies shorten, there is reason for optimism for at least six months.

Strock described present milk sales as "excellent," and noted that the September 75 MCMP base price is $1.25 per hundredweight higher than the base price from a year ago.

In projecting milk price outlook, Strock informed the audience that there may be as much as a 20 cents more rise in the Minnesota-Wisconsin price by November after which the M-W price may recede. The drop — if it occurs — will be slow if product demand holds up, and rapidly if sales fall off to near the support level.

The dairy leader noted that Secretary of Agriculture Earl Butz will have to authorize another change in dairy support levels

[Continued on Page 23]

Fertilizer outlook seen brighter

By Melissa Piper

LANCASTER — While many variables are still under consideration at the present, fertilizer officials have noted that for the coming year, farmers should see a decrease in price accompanied by adequate supplies.

Officials have been hopeful that with the adequate supplies of raw materials decreases in price should be evident for the first time in nearly 15 months. This factor along with leftover supplies from last year should encourage producers to buy the commodity without the fears that marked last year's market.

Ed Wheeler, president of the Fertilizer Institute, recently commented that forecasts have pinpointed the figure of fertilizer to be at 48-50 million domestic tons for 1976, "which represents 1-3 million tons more than in 1974 and 3-5 million tons more than last year."

While the supplies seem adequate at this time, the winter months ahead will tell the story for spring supplies. Natural gas, a prime component of fertilizer, has been termed as the determining factor in whether supplies will be ready for spring planting. If the northeast has a mild winter, natural gas (used for home heating) should be available for fertilizer, but if a long harsh winter occurs, then agriculture in general might suffer once again.

The USDA has issued the

Youth receives FFA degree

By Melissa Piper

MILLERSVILLE - Many youths from the southeastern Pa. area will be heading to Kansas City in the next few weeks, to attend the annual national FFA Convention. And while a number of the youths will be attending mainly for the experience, several youths from Lancaster County will be traveling to the event to receive special awards.

Greg Landis, Lancaster R6, is one young man who will be honored for his outstanding FFA work by being presented the American Farming Degree, the highest honor bestowed upon a youth finishing his work in the organization.

Greg, who is the son of Mr. and Mrs. Jay Landis, graduated from Penn Manor High School in 1973 and since that time has been helping his father farm on some 120 acres outside of Millersville.

During his high school years, Greg was active in the Penn Manor FFA and served his chapter as news reporter, assistant secretary, treasurer and president. During his senior year, Greg also served as the County FFA president.

Having a father in the

Local Grain

Friday, Oct. 17

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Friday, Oct. 17, are as follows:

	Bid+	Offered+
Ear Corn		
Old	67.33	78.33
New	44.75	54.00
Shelled Corn	2.68	2.89
Barley	1.80	2.04
Oats		
Local	1.40	1.62
Western	1.70	1.90
Wheat		
Millers	3.28½	
Feed	2.25	

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Kosher Steer Beef:
Choice and Prime Forequarters 70.00-75.00.

Omaha Auction

October 16

Compared with the previous week's close: Average-Good to Prime Steers 1.50-2.00 lower, Standard and Low-Good 50-1.00 off. Heifers 1.25-1.50 lower, some Good and Low-Choice 750-900 lbs. 1.75-2.00 lower. Cows 50-1.00 higher, continued best demand for High-Utility and Commercial Bulls steady.

Four day receipts 16,200 compared 15,900 previous week and 16,200 a year ago. Steers approximately 32 PCT week's total, heifers 27 PCT, cows 11 PTC, and feeders for Friday auction 27 PTC. Fed cattle prices came under severe downward pressure in reflection of extremely bearish conditions which engulfed the carcass trade late previous week and carried over into the current period. Part of downturn in live prices a delayed reaction since supplies late previous week were insufficient to reflect the break in carcass trading. Activity generally slow as buyers sought to establish an acceptable ratio between current live prices and carcass realizations; in addition, most slaughterers came into period with sufficient live inventories on hand for immediate requirements and were not aggressive for large additional numbers with some curtailing slaughter quotas. Steers and heifer supply predominantly good to average-choice.

STEERS: Six loads Choice with end Prime 1150-1200 lbs. Yield Grade 3-4 49.25-49.50, during week, few loads and part loads 48.75-49.00. Choice 1100-1250 lbs. yield grade 2-4 47.25-48.50, load 1150 lbs. 49.00. Choice 950-1100 lbs. mainly yield grade 2-3 46.00-48.00. Mixed Good and Choice 925-1200 lbs. 44.50-46.50, occasionally 46.75-47.00 on weights 1100 lbs. and heavier. Good 40.00-45.50. Standard and Low-Good 38.00-40.00, mostly Low Good 1150-1300 lb. Holsteins yield grade 2-3 39.25-40.00.

AVERAGE OF LS - 214, detailed quotations, for Choice 900-1100 lb. Steers this week 47.62; Choice 1100-1300 lbs. 48.60.

HEIFERS: Two loads Choice with few Prime 975 lbs. yield grade 3-4 47.00 early. Choice 900-1050 lbs. yield grade 2-4 closed 45.00-46.00. Choice 800-900 lbs. yield grade 2-3 43.50-45.25. Mixed Good and Choice 750-975 lbs. 42.50-45.00. Good 36.00-41.00. Small lots standard and Low-Good 31.00-33.50.

COWS: Utility and Commercial 20.50-23.00, few High-Utility and Commercial 24.00-25.00. Canner and cutter 15.00-21.00, Mixed Cutter and Low-Utility 21.25-21.50. Heiferettes 26.00-31.00.

BULLS: Yield Grade 1-2 1400-1800 lbs. 23.00-27.00, few yield grade 1 28.00-29.00.

Middleburg Auction

Middleburg, Pa.
Oct. 14, 1975

Existence of The Cowboy Was Limited

The cowboy of the Old West really only existed for about 40 or 50 years, from the end of the Civil War to the beginning of the 20th Century

Longhorns, or "critters" as they were called by their owners and handlers had the ability to stay alive on lands that would leave their English cousins, the Herefords and Angus, bawling for supper

At first, no one owned these animals, so the man who branded them was the man who drove them to market and sold them Many a Texas mogul got his start "moon-shining" cattle It took a tough breed of man to catch the wily Longhorns and lay a branding iron on them at night And cowboys were tough

The term "cowboy" was used for the 12-to-15-year-olds who were employed to drive the cattle to market after they were herded out of the mesquite Young boys were used because they worked cheap, often for as little as food plus $5 a month The gaunt Longhorns, virtually worthless as meat animals, were valued more for their hides, horns, hooves and tallow. Few cattlemen could afford to pay grown men $25 to $30 a month to drive cattle to market

Many Different Bees, Frolics Combined Labors with Pleasure

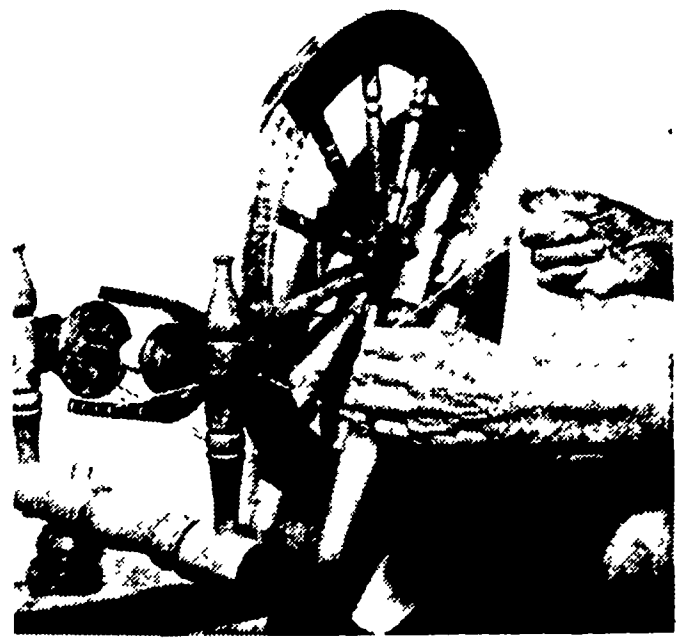
There was little time for leisure activities when American agriculture was in its infancy. But farm families did gather for various special occasions to combine cooperative work with being neighborly

Over a year, no less than a dozen or more different types of "frolics" or "bees" might be held Here are a few of them

Raisins — to erect new buildings, ranging from a house for newly-weds to a larger barn

Log-Rolling — Teams of men armed with log hooks pulled large trees onto piles for burning after a farmer cleared a new field.

Stump-Pulling Frolic — Usually followed a log-rolling to remove stumps from a new field.



Husking Bee — Usually the most popular of such gatherings, two captains selected competing teams to see who could husk the most corn. "They set in husking with all of their might When one side found themselves sure of victory, they picked up their captain on their shoulders and began a most frightening screaming."

Butchering Bee — Neighbors gathered on a farm at four in the morning to find huge log fires burning and the livestock already butchered. On a late November day, the meat was cut up, sausage made, lard rendered, scrapple made, the hams and bacons smoked A couple of tons of meat might be so prepared with each family taking home a good supply.

Apple-Paring Bee — Held in the kitchen, apples were pared, cored, cut into thin discs, strung on linen thread and hung from the rafters to dry.

Apple Butter Bee — Young couples of courting age usually took part, stirring the large kettle of butter with a long wood paddle

Spinning Bees — The farm wife pitted her skill and endurance against the neighboring women to see who could spin the most skeins from sunup to sunset.

Kicking Bees — Groups of barefooted men saw in a circle on benches Hot soap suds were poured on new woolen cloth spread on the floor. The men kicked the cloth for three hours or more to soften and shrink the material.

Lime Frolics — To haul the lime from distant kilns.

Quilting parties — Women would gather before a roaring fire to sew the massive heavy quilts needed over long, cold winters.

Breaking-Out Bees — As many as fifteen head of oxen might be yoked to a massive plow to open snow-blocked roads

Dung Frolic — Held only occasionally, a farmer would invite his neighbors to help remove many years of accumulated livestock manure when he found that access was completely blocked to the barn.

Cattle are counted by the head, laborers by the hands, soldiers by the arms and diners by the cover.

ORTHO-GUARD™

A TOTAL APPROACH TO TREATING AND STORING HIGH-MOISTURE FEED GRAIN.

ORTHO GRAIN PRESERVATIVE

+ Reduces the need for air tight storage.
+ Protects grain quality and feed value.
+ Used on the farm for 4 years.

Ortho Grain Preservative offers a practical way of cashing in on the advantages of harvesting and storing high mositure feed grains.

Ortho Grain Preservative lets you move your crop directly from the field to storage where it gets a chemical coating of protection before it goes into conventional buildings.

The result: there's no need to tie up huge amounts of capital in drying equipment or sealed silos. Grain that's treated according to label directions resist spoilage for up to 12 months when stored in metal bins, wood cribs and similar low cost storage structures.

Unit available on rental basis or can be purchased.

Treats up to 900 bushel per hour, depending on moisture content of grain

See or call us for complete information on Ortho-Guard™ and applicator.

THE OLD FARMER'S ALMANAC

OCT. 20-26, 1975

Across the moon is penciled a flight of geese.

Mice will want to come into your house now. Pablo Casals died Oct. 22, 1973. Full Hunters' Moon Oct. 20. Full moon this month without frost; no frost until next full moon. Average length of days for the week: 10 hours, 44 minutes. Jet age began Oct. 26, 1958 with first Paris to New York flight with paid passengers. Pike's Peak Railroad completed Oct. 20, 1890. Things one foresakes another takes.

Old Farmer's Riddle: How can you quiet down a loud overcoat? (Answer below.)

Ask the Old Farmer: For many years I have heard that when the sun is over the yard-arm it is permissible to take a drink. What time of day is meant by this? Camden, N.J.

Eight bells. Noon, generally speaking. Recently and perhaps still seven bells or 11:30 in the British Navy. Coastal folks use the expression to refer to summer.

Home Hints: A coat of self polishing wax on workshop tools will keep them free from rust and protect the cutting edges. *Riddle answer:* Wear a muffler.

OLD FARMER'S WEATHER FORECASTS

New England: Generally hot to start, then heavy rain, clearing and cooler by weekend.

Greater New York-New Jersey: Early week warm, then turning cooler, possibility of hurricane midweek.

Middle Atlantic Coastal: Most of early week sunny, but possibility of hurricane midweek, rain by week's end.

Piedmont & Southeast Coastal: Hurricane possible midweek in central and north, drought continues in south.

Florida: Entire week alternately clear and somewhat cloudy, but clear in north on weekend.

Upstate & Western N.Y.-Toronto & Montreal: Indian summer weather all week, except for possible hurricane latter part.

Greater Ohio Valley: Most of week rainy, with heavy rain in east latter part and possibility of hurricane.

Deep South: Showers to start, locally heavy, then clear, turning cold by week's end.

Chicago & Southern Great Lakes: Cloudy with intermittent rain throughout most of week, then becoming clear by weekend.

Northern Great Plains-Great Lakes: Entire week has fairly heavy intermittent rain in central and east, sunny and cold in west.

Central Great Plains: Clear in west throughout, some sun, intermittent showers and mild temperatures in central and east.

Texas-Oklahoma: Clear and hot with some thunderstorms through midweek, cooler latter part.

Rocky Mountain: First part of week clear and cold, rainy and warmer in north by weekend.

Southwest Desert: Mostly clear and very warm with highs near 80 all week.

Pacific Northwest: Generally sunny and fair through to weekend rain at week's end.

California: South becoming clear by midweek, generally clear and pleasant in north.

Hinkletown school to hold open house

On October 23rd, the second annual Open House will be held at the Hinkletown Alternative School from 7:00 to 9:00 p.m. All members of the community are invited to meet the teachers, see the various school facilities, and observe displays of work done by the students in their classes.

The Hinkletown Alternative School, part of the Eastern Lancaster County School District, is located on Wanner Road just off Route 322 east of Hinkletown. Its program is unique in the area since in addition to the basic subjects of English, math, social studies, science, music, and art, a program of pre-vocational work in agriculture, horticulture, carpentry & cabinetmaking, homemaking, home nursing, power sewing, food trades & services, and power mechanics are included in the curriculum. The school is open for enrollment to pupils of the Eastern Lancaster County School District in the 6th, 7th, and 8th grades.

Crop statistics released

HARRISBURG - Apple production has increased in Pennsylvania, but declines can be seen in the production of corn for grain, tobacco, potatoes, and grapes, according to the Pennsylvania Crop Reporting Service.

Pennsylvania's record commercial apple crop is forecast at 550 million pounds, down four percent from September 1, but up 15 percent from last year.

Pennsylvania's 1974 production of corn for grain is forecast at 86,400,000 bushels based on conditions October 1. This represents a two percent decrease from September's forecast and a three percent decrease from 1974 production. Yield is expected to be 80.0 bushels per acre, down from 82.0 bushels forecast last month and below the 81.0 bushel yield in 1974.

Pennsylvania's tobacco production is expected to be 21,250,000 pounds, unchanged from a month earlier but 18 percent below 1974. Yield estimated at 1,700 pounds per acre is 15 percent below the 1974 yield of 2,000 pounds per acre.

The commonwealth's forecast for potato production is 6,900,000 pounds, down six percent from the 1974 production total.

Soybean production is forecast at 1,372,000 bushels, unchanged from last month.

Production of all hay in Pennsylvania is estimated at 4,301,000 tons, virtually unchanged from 1974. Yield is forecast at 2.18 tons per acre, compared to 2.20 tons per acre in 1974.

The state's forecast for grape production remains at 47,000 tons, indicating an 11 percent decrease from last year's record crop.

In the United States, corn for grain is forecast at a record 5,737 million bushels, up 23 percent from the 1974 production total. Yield is forecast at 86.2 bushels per acre, compared to 71.3 bushels per acre in 1974.

Tobacco production in the U.S. is forecast at 2,174 million pounds, down one percent from last month, but nine percent above 1974. Yield is forecast at 2,003 pounds per acre, down three percent from 1974. Fluecured production is up 13 percent and the burley crop is four percent larger than a year ago.

Potato production nationwide is expected to be 266,583,000 pounds, an eight percent decrease from 1974.

All wheat production in the U.S. is expected to total a record 2,138 million bushels, up 19 percent more than last year's crop.

U.S. soybean production is forecast at 1,473,782 thousand bushels, up 19 percent from last year.

The U.S. final forecast of production of all hay is 130,098,000 tons, two percent above the 1974 total. A yield of 2.12 tons per acre is expected, up one percent from 1974.

Grape production is estimated at 4,277,750 tons, compared to 4,194,100 tons in 1974.

Apple production increased 13 percent from 1974 with a forecasted crop of 7,249.8 million pounds.

Order 2 sales gross 69 million

NEW YORK - October 14 - A uniform farm price of $9.57 per hundredweight (46.5 quarts) for September milk deliveries to pool handlers under the New York-New Jersey marketing orders was announced Tuesday by Thomas A. Wilson, market administrator. The uniform price was $9.00 in August 1975 and $8.22 in September 1974.

The butterfat differential was 10.1 cents for each tenth of a pound of fat above or below 3.5 percent.

Receipts from dairy producers totaled 715,376,822 pounds, 3.3 percent or 24,176,525 pounds less than in September 1974, Wilson reported. Handlers utilized 401,414,472 pounds of these receipts or 56.1 percent for fluid milk products (Class I). In September 1974 the Class I utilization percentage was 54.2 For September, handlers paid $9.75 for Class I milk compared with $8.69 a year ago.

Wilson stated that receipts on bulk tank units were 687,962,349 pounds, down 13,049,418 pounds. He added that this was 96.2 percent of the pool, compared to 94.8 percent a year ago.

A total of 310,782,743 pounds, or 45.2 percent, of tank milk was used as Class II and was subject to the transportation credit which amounted to $310,782.80.

Producers with tank milk numbered 18,557, a decrease of 2.2 percent. The administrator said that the total number of producers in the pool was 19,994, a loss of 5.1 percent. Average daily deliveries per producer rose 23 pounds to 1,193 pounds.

Pool bulk tank units decreased 16 to 199. Reports from 111 handlers were used to compute the pool, 2 less than in September 1974. There were 104 handlers with producer milk, a loss of 4.

The gross value to dairy farmers of September deliveries was $69,340,628.22. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

All prices quoted are for milk at 3.5 percent butterfat received within the 201-210 mile zone from New York City.

ASC committees to meet in conference

The Lancaster County ASC Committee and county office employees of the Agricultural Stabilization and Conservation Service will attend a State-wide conference and workshop on October 22 and 23, 1975 at the Seven Springs Mountain Resort, Champion, Pa.

Attending from Lancaster County will be B. Snavely Garber, Paul B. Kline, and Vincent H. Hoover, County Committeemen, Dorothy Y. Neel, Co. Executive Director, Mary Catherine Byrd and Janet M. Schaefer, Program Assistants, and Lloyd H. Welk, State Compliance Supervisor.

Keynote speakers at the conference will be Assistant Secretary of Agriculture, Richard E. Bell, International Affairs and Commodity Programs and Kenneth E. Frick, Administrator of the Agricultural Stabilization and Conservation Service. The theme of the conference is "International Trade - Key to Farm Propserity".

County Committees and employees will participate in groups with panel discussions on the administration of the Agricultural Conservation, Production Adjustment, Price Support, and Emergency Programs. They will also participate with a panel on Marketing of Farm Products.

The Conference is sponsored by the Pennsylvania State ASC Committee. State Committeemen, Noah Wenger, Lancaster County; Claude Hetherington, Schuylkill County, William Ringler, Somerset County, and Kenneth H. Boyer, State Executive Director of ASCS will head the conference.

USDA has rules for egg producer vote

WASHINGTON, - The U.S. Department of Agriculture recently announced that it has adopted rules governing a referendum in which eligible producers of eggs may vote on a nationally coordinated egg research and promotion order.

Also, adopted, according to USDA officials, were procedures permitting producers to petition for relief if they believe that parts of the order are in conflict with the enabling legislation, the Egg Research and Consumer Information Act. The final rules and procedures, which are the same as proposed in mid-September (press release USDA 2696-75) were scheduled for publication in the Federal Register Oct. 16.

The voting rules are a legal requirement before a referendum can be announced, said Connor Kennett, Director of the Poultry Division in USDA's Agricultural Marketing Service.

By Dieter Krieg

Life on the farm offers rewards and satisfactions which can't easily be found elsewhere.

A farmer lives close to Nature and God's creations, which gives him a sense of knowledge, appreciation and respect for the Earth which he would not get anywhere else. The endless cycles of birth and death, sprouting and wilting, spring, summer, autumn and winter, never cease to amaze him

Fresh air, Nature's beauty, and the type of work which develops physical capabilities in addition to the mind, is all around him. Although the hard work may be burdensome at times, the physical activity is what keeps him agile and healthy. The business decisions and problems keep his mind alert.

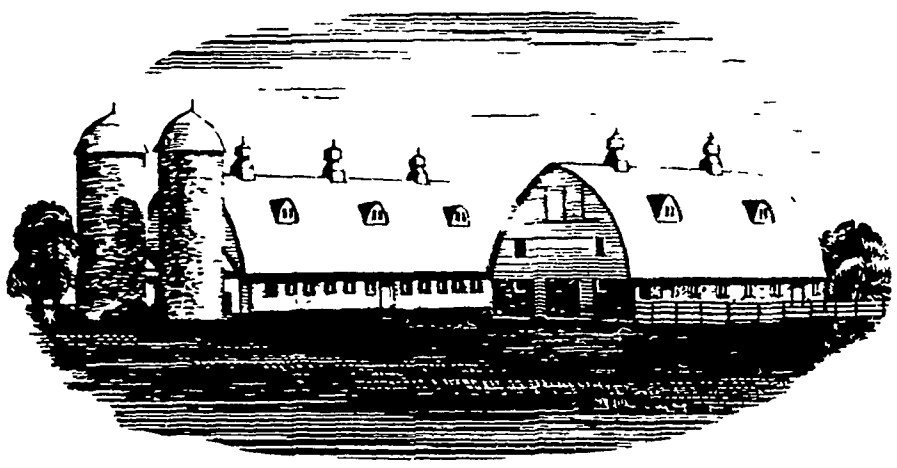
A sense of independence and pride in individual achievement isn't available as often in the non-farm world. The farmer usually has these priceless rewards in his work. Unlike the assembly-line worker who is often just a "cog" in a "big machine," the farmer is "the machine." He makes the decisions and follows his own plans. He's his own boss and when his products go to market he can be proud of his accomplishments

A farmer is at home while he's working. His wife and children are always nearby. And what better place is there to raise a family?

Exercise, stimulating surroundings, fresh air, pets, and the chance to learn the meaning of responsibility are all offered on the farm

Certainly, farm life still leaves a few things to be desired, such as little or no time off, comparatively long hours, meager profit margins, and in general a "looked down upon" attitude by much of society

But if a farmer can make it financially, chances are he's in no mood to trade his way of life for that of the suburbanite who only works from eight to five, five days a week



By Dieter Krieg

Big, rough hands, covered with callouses, a scar or two, and a mixture of axle-grease, dust and soil which not even hot water and Lava could remove thoroughly, met and shook in friendship beneath the maple trees Tanned and wind-burned faces of farmers exchanged greetings and the latest reports on their crops and herds

It was a Sunday just like all other Sundays The church service was over, and after not having seen many of the neighbors for a week, the majority chatted for a while sometimes for even an hour

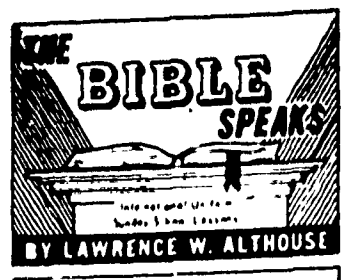
Although hours of rest are scarce on the farm - especially during the planting and harvesting seasons which take up three-quarters of the year — most farmers seem to regularly find time to go to church under all sorts of conditions and in all kinds of weather

As a group and as individuals, the men who work the soil and tend the animals probably have a deeper respect for God and wider appreciation of Nature than do many others Their entire livelihood depends on the mercy of God, and they know it Made aware of the miracles of life each time a field of seeds germinates, and when a calf is born, farmers appreciate their blessings and recognize the frailty of their own abilities and profession

On Sunday mornings the farmer often takes shortcuts in order to get done in time for church. Or work is just partially completed Only urgent circumstances such as a cow down with milk fever interferes with the Sunday schedule

In spite of their close relationship to and dependence on Nature, which in turn develops to an awareness of God, farmers have been known for catching a few winks in the pews Not necessarily a reflection of the worship service itself, the farmer occasionally dozes off because he is tired or because he has difficulty staying awake when he sits down with nothing to do

I come to this conclusion because of my own experiences and beliefs, and because I have been able to stay awake in church most of the time to make observations But I can only take partial credit for the latter — most of the credit should go to my wife who has an elbow as quick as a mule's leg



THE TEST

Lesson for October 19, 1975

Background Scripture: Genesis 22:1-19.

Devotional Reading: Luke 20+45 through 21:4.

If you go to Jerusalem today and visit the beautiful Dome of the Rock, guides will show you a huge rock surrounded by a railing and will tell you that the rock is Mt. Moriah, the spot upon which Abraham stood ready to sacrifice his son, Isaac. Whether or not it is actually the spot of that great event, one cannot help but be moved as he contemplates the significant drama that was probably played out at that location.

It was one of the great high moments of man's religious history. Religion "turned" an important "corner," as we say.

Where is the Lamb?

Scholars and others will argue whether God actually asked Abraham to sacrifice his son. Some maintain that Abraham only thought God wanted him to do this because he saw his Canaanite neighbors doing it. Either way the point of the story is pretty much the same. Whether Abraham only thought that's what God wanted or whether he correctly surmised it, the important point is that he was willing to sacrifice for his God the one possession which was above all others: his only son.

Once before God had tested this man, calling him to leave his home country for a strange land he had never seen. Abraham had responded to this challenge with an obedient faith. But this test was even greater. Abraham and Sarah had been childless until Abraham reached his ninety-ninth year. Then, at last, they had a child, a male heir, the heir through which God would fulfill his promise to make Abraham and Sarah the father and mother of a whole multitude of peoples.

So, Isaac was not only Abraham's son, he was his only son, the gift from God in his old age. Abraham must certainly have wondered how he could possibly make this supreme scarfice to God. It was his greatest test of faith!

There is some rich symbolic meaning in this story. For example, Abraham lays the firewood for the sacrifice on Isaac's back and one is reminded of Jesus carrying his own cross to Calvary.

There is Isaac asking in wonder, "Behold the fire and the wood; but where is the lamb for a burnt offering" (genesis 22:7). One is reminded of Jesus, scarificed as "the Lamb of God who takest away the sins of the world."

God will provide

There is also Abraham's enigmatic answer: "God will provide himself the lamb for a burnt offering (22:8). And that's what God did: for Abraham and for all of us. On Mt. Moriah God provided a ram to serve as a sacrifice instead of Isaac and on Mt. Calvary he provided his own son as a sacrifice instead of all mankind.

Thus, in the story of Abraham and Isaac we find a theme that is repeated again and again in the Bible and life since then: God tests us to determine the strength of our commitment to him, but when we have demonstrated our loyalty to him, it is God himself who provides the sacrifice.

On Mt. Moriah Abraham learned a profound religious lesson: what God wants from us is not vain sacrifice, but our very deepest commitment and obedience. ". . . for now I know that you fear God, seeing you have not withheld your son, your only son, from me" (22·12).

There is a Mt. Moriah in the life of every man, a place where God tests our faith.

NOW IS THE TIME. . .

To Test Forage Crops

If full value is to be utilized from the testing of hay and silage, now would be the best time to have these crops tested. With the fall and winter feeding season ahead of us, the exact knowledge of the feed value of roughages in storage could make a big difference in feed rations. We urge full attention to the testing of hay and silage crops now for both dairy and beef producers. When the test is submitted to the Penn State Testing laboratory, producers are urged to request a feeding recommendation. This will necessitate the filling out of a special feed recommendation form but can be secured along with the test kit without charge. Forage testing does not cost money ($9.00 per kit), but should save money in the long run.

To Store Farm Machinery

As soon as a piece of farm machinery has performed its last function for the season, it should be cleaned, serviced, and stored for the winter. This means storage under roof to protect it from the elements. Rust is one of the major enemies of machinery and equipment that is left out in the weather over winter will surely have less life because it will break down quicker. A separate shed or machinery barn is suggested rather than be stored in the regular farm barn. This will reduce the risk of serious loss in case of fire. Machinery represents a big investment and warrants weather protection when not in use.

To Consider Dairy Calf Hutches

Dairymen that are having problems with calf scours and pneumonia might consider the construction of several calf hutches outside of the barn. These small hutches were observed recently by a group of our County Agents on a farm tour in Wisconsin. The day-old calves are put out into these small buildings with a small exercise lot for several months in order to get away from the barn infections. In the mid-west they are reported to be working excellent to eliminate calf losses. It might seem a bit rough to put a young calf out into a small hutch at all times of the year, but results favor the wider use of this practice.

To Eradicate Rats

We notice the presence of rats in and around too many barns and buildings. The season is approaching when they will be seeking shelter in buildings from the fields and colder weather. We stress the importance of eliminating nesting places for them in order to prevent reproduction and greater infestation. Stone walls and broken concrete floors and driveways should be repaired along with a good clean-up program. Poison bait stations will help get many rodents before they can establish a nesting place. Rats are destructful, may carry contagious diseases, and should be on the eradication program of every farmer and property owner.

Congratulations are in order for Peter Witmer of Willow Street R1, who has been selected as the 1975 winner of the Dairy Shrine Club's Student Recognition Contest. The son of Mr. and Mrs. Raymond F. Witmer, Peter will receive a $500.00 cash award from the Dairy Shrine Club at the World Dairy Exposition in Madison, Wisconsin on October 1. He was selected by a panel of judges from a group of 32 outstanding dairy science student nominees from across the country. Peter is a recent graduate in Dairy Science from Penn State University. He has chosen to return to the farm and continue in the Guernsey dairy business. We congratulate Peter and his entire family for this great accomplishment and wish him continued success in the dairy industry. It is encouraging to have outstanding college graduates remain in agricultural production.

Farm Calendar

Saturday, Oct. 18

Kinzer 4-Wheel Tractor Pull to be held at the Rough and Tumble Track at 7:00 p.m.

Sunday, Oct. 19

Lancaster Independent Press Day at the Railroad House in Lancaster 1-10 p.m. $2.00 donation will be required.

Monday, Oct. 20

Lancaster Town Fair on Monday and Tuesday from 10:00 a.m. - 9:00 p.m.

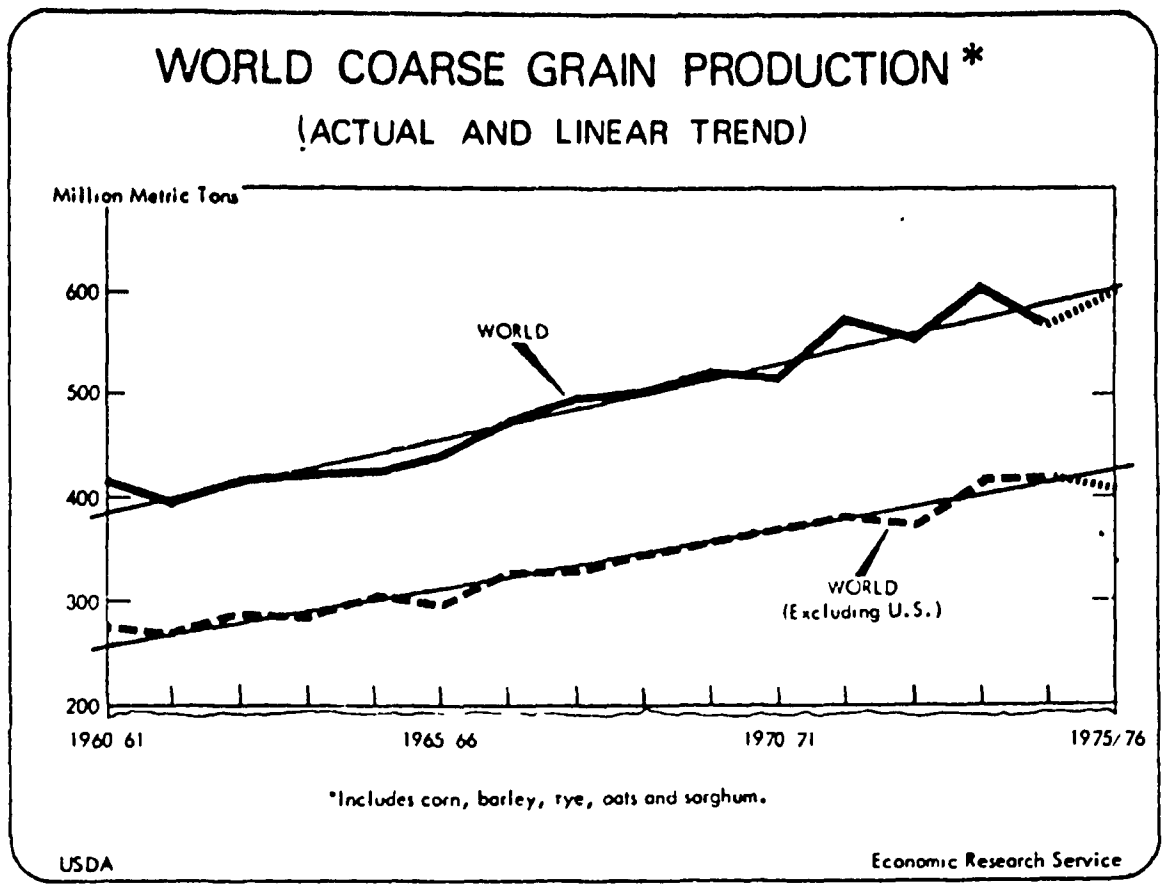
Tuesday, Oct. 21

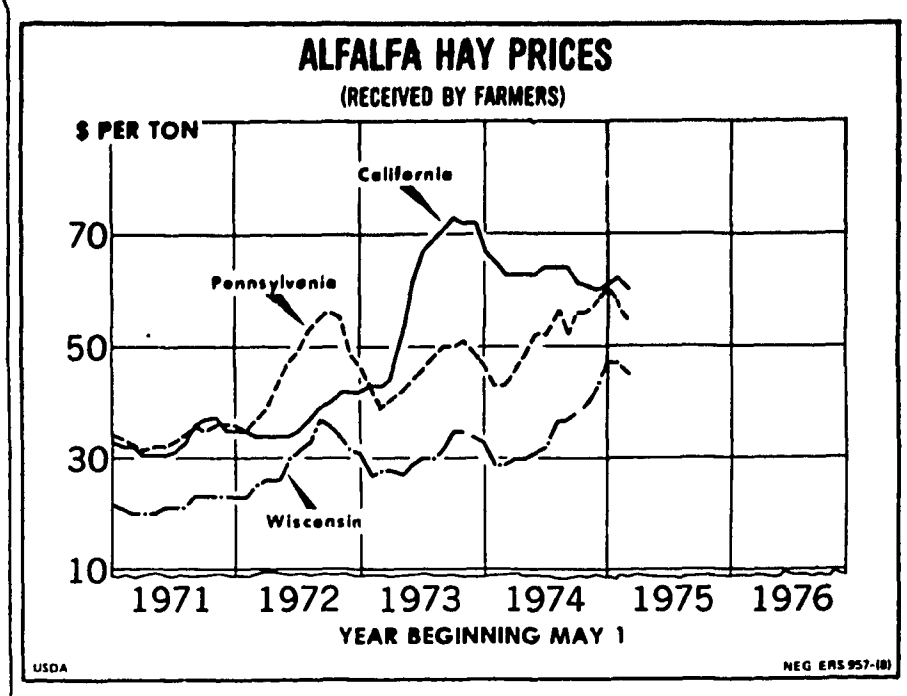
Neppco convention begins in Hershey - for further information on the event see the articles in this section of Lancaster Farming.

Ephrata Young Farmers meeting at 7:45 p.m. at the Ephrata Senior High School - cornpickers will be discussed.

Thursday, Oct. 23

Chester County Holstein Club meeting and banquet and the Upper Octorara Presbyterian Church near Parkesburg.





Longhorns Could Survive As Hardy Range Critters

Men who were legends rode the ranges of the Old West, they stalked the dusty streets of cow towns and boom towns They fought, shot, loved and rode their way into the pages of what is unique American folklore But, had it not been for the Longhorn, the cowboys of the Old West might today be as unheralded as the early American cattlemen of the East

The Longhorn was a rangy critter, descended from tough Andalusian cattle brought to the New World in the early 16th century by Cortez, the Spanish explorer The Longhorns flourished in the sparse vegetation of the arid Southwest

Where a Hereford or an Angus might starve to death, the Longhorn could find and eat enough to stay alive. Needless to say, the animals were more renowned for this survival ability than for the quality of their meat While the meat could be eaten, the Longhorn's principal commercial value derived from their hides, horns, hooves and the tallow rendered from their carcasses

Immense herds of these animals accumulated on the plains and in the riverbeds of the American Southwest during the Civil War In Texas alone hundreds and hundreds of thousands of Longhorns, as wild and skittish as deer, abounded on the open range As the East and Midwest became more and more urbanized the growing population developed an appetite for meat and other animal products that far outstripped the production ability of local farmers

Many ex soldiers, from the North as well as the South, drifted westward to capture the Longhorns and drive them to railheads in Kansas or Oklahoma for shipment to market It was not an easy way to make a living, but many Texas moguls got their start by putting variations on Longhorns In the hot dry climate of the Southwest, the Longhorns hid from the heat of the day and the insects by taking refuge in the almost impenetrable thickets of mesquite and palo verde A man on horseback could not possibly follow the creatures into those thickets But the Longhorn, whose horns commonly spanned ten feet from tip to tip, moved with uncanny grace through brush, ducking, swinging and weaving his horns with a fluid motion that destroys the old cliche about the bull in a china shop

Longhorns vanished from the cattle markets as homesteaders fenced in the open range Homesteaders brought barbed wire with them and they brought English cattle breeds These cattle were more domesticated and they produced far superior beef But they were not the stuff of legends

Maryland reports record corn harvest

COLLEGE PARK, Md. - [illegible] survey of Maryland farms, conducted by the Maryland-Delaware Crop Reporting Service, here indicates the state's record corn crop for 1975 is expected to reach 48.4 million bushels, says Maryland Secretary of Agriculture Young D. Hance.

This year's anticipated record harvest of 88 bushels per acre will be one bushel per acre more than estimated a month earlier and four bushels above last year's per acre yield.

Hance states that if the record corn production should be eight percent above last year and 14 percent higher than in 1973, as the Crop Reporting Service survey suggests, there is even more reason for stimulating export sales of grain.

As of October 6, corn harvesting for grain was 50 percent completed, compared with 32 percent at the same time last year and with an annual average completion of 43 percent.

Corn raised in Maryland, for the most part, is used for livestock and poultry feeds.

Farm production surveys conducted by the Crop Reporting Service, a cooperative effort of the USDA and the state agriculture agency, as of October 1 showed the following:

Tobacco production at 24.7 million pounds, the second smallest crop since 1945.

Apple production at 76.0 million pounds, 11 million more than a year ago.

Sweet potato production at 326,000 hundredweight, 11 percent more than the 1974 harvest.

Spotlighting after Midnight Unlawful

The Game Commission reminds all Pennsylvanians that the practice of spotlighting after midnight is unlawful.

Although the law has been in effect for more than seven years, some persons apparently are still not aware of the restirction, or perhaps they forget to check their watches.

Spotlighting of deer at night is an activity in which many persons, sportsmen as well as non-hunters, engage, especially during the fall months. But all are reminded that while the practice is permissible up until midnight, it is illegal to do so between midnight and sunrise.

Help offered to storm victims

HARRISBURG — Farmers who suffered losses from Tropical Storm Eloise are eligible under certain conditions for a broad spectrum of assistance that includes low-interest loans, grants and technical assistance.

Covered are damage to farm lands, structures, supplies, crops and potentially, stream channels.

Detailed information, including procedures on applying for such assistance, is available from county offices of the U.S. Department of Agriculture.

The assistance programs are covered under regulations of three USDA agencies: the Agricultural Stabilization and Conservation Service (ASCS), the Farmers Home Administration (FmHA), and the Soil Conservation Service (SCS).

The ASCS program provides up to 80 percent of the cost of restoring farmland and conservation structures to their pre-disaster condition. Included in the program are the removing of debris from farmland; grading, shaping, releveling of land or similar measures; restoring permanent fences; and restoring structures and other installations.

Costs incurred by the farmer which are eligible under the program are materials and services purchased, use of farm equipment and farm labor at reasonable rates, and hired labor.

Where needed, technical engineering assistance will be provided by (SCS) in cooperation with the ASCS.

Also available under the program are provisions for crop losses, prevented planting and abnormally low yield. Farmers are reminded that applications for prevented planting of wheat and barley should be made by Nov. 15.

The FmHA program provides emergency loans at 5 percent interest for actual losses and expenses in order to repair, restore or replace damaged or destroyed farm property and supplies, for expenses incurred for crop production, and to pay farm debts owed to other creditors.

A borrower eligible for a 5 percent emergency loan also may be eligible for an additional loan at the prevailing market interest rates to construct or improve buildings and facilities, to purchase livestock, and to reorganize the farming system in order to make it a sound operation.

To be eligible for an emergency loan a farmer must have suffered loss in a county declared eligible for assistance, be unable to obtain the necessary credit from other sources, be an established farmer who manages his operation, be a citizen, be of good character and have farming experience.

Applications for emergency loans under the FmHA program must be filed within 60 days of the date of the emergency declaration for physical loss, and within nine months for production loss.

The SCS program, currently pending, provides emergency measures for protection from flooding, erosion, or sedimentation damage until long range practices become effective.

Work under the program may include placing quick cover on denuded areas, sloping banks if they were created or steepened as a result of a natural calamity or if sloping is essential for treatment, opening stream channels where streamflow is dangerously restricted as a result of natural calamity, and constructing protective diversions.

Monies for the stream restoration program area contained in Section 216 of the Agriculture Department's budget for fiscal year 1976, which currently is awaiting the President's signature. Monies for Pennsylvania farmers would be available after a request has been submitted by the state's SCS administrator to the national SCS administrator in Washington, and pending sufficient available funds. Such a request will follow completion of a study on need.

Soviet grain crop estimate lowered

WASHINGTON, - The U.S. Department of Agriculture last week lowered its estimate of 1975 grain production in the Soviet Union to 170 million tons. This is 5 million tons less than the August 29 estimate, and reflects a poorer than estimated harvest in the Ukraine - one of the Soviet Union's chief grain regions.

A crop of 170 million tons would be 45 million short of the USSR's target, and about 25 million under last year's production. The record Soviet harvest was 222.5 million tons set in 1973.

The bulk of this year's Ukrainian shortfall is believed to be in wheat, primarily winter wheat. The new estimate reduces 1975 Soviet wheat production by 3 million tons to 82 million tons. Coarse grains have been reduced by 2 million tons to 75 million tons. Miscellaneous grains remain at 13 million tons.

First Wedding

It was the first wedding little Anne Marie had ever attended, and she watched every movement of the bridal party intently After the recessional, she turned to her mother and whispered. "Mommy did the bride change her mind?" "No dear - why?" "Well, she came in with one man—and left with a different one "

1-row Superpicker... low cost way to harvest your corn

Without question this Avco New Idea Superpicker is the most popular 1-row picker on the market In true Superpicker tradition it has big capacity and operates non stop in all kinds of corn

The big hungry gathering unit picks clean in heaviest yields even in down and tangled corn

Exclusive Flexi Finger presser wheels align ears on the husking rolls keep them moving so husking efficiency matches the picker's non stop gathering capacity

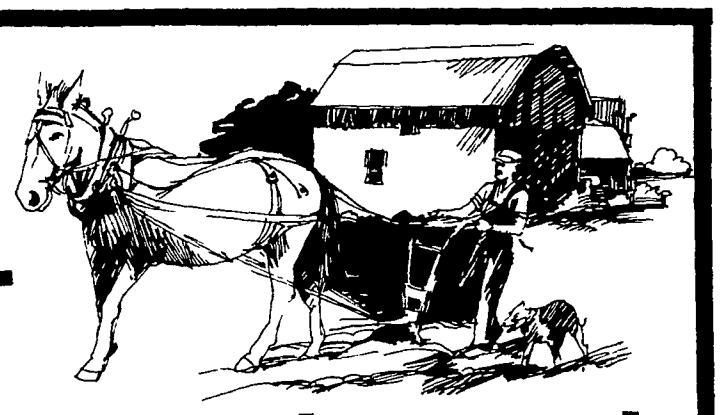
From Soil to Grain...



We've come a long way! And Mix-Mill has helped.

Here's how mix-mill can help you:

A Mix-Mill "Feed Factory" is ideal for any size operation, whether you prepare two tons of feed per week or 100 tons or more per day. Mix-Mill has a system to fit your needs.

Our systems are versatile. You can start small and expand as you grow. Choose from a wide variety of "Feed Factory" capacities. Standard sizes are 12, 25, 40, 150, and 400 tons. We'll make up most everything in-between too.

Mix-Mill. . .making feed any other way is old-fashioned!

Class I sales booming

Caution for quality continues

By Dieter Krieg

NEW PARK — Class I milk sales in Federal Order 4 are "booming" — up 18 per cent over the previous year, members of Maryland Cooperative Milk Producers were told here last Tuesday.

R. L. Strock, manager of the 1021-member cooperative, which was established in 1918, made the announcement at the annual dinner meeting for District 7 MCMP members.

A number of topics were brought up in speeches, including grain sales to Russia, dairy imports, MCMP business statistics, cooperative memberships and dealings, as well as current and future milk prices. The grain exporting ban, following a promise on the part of the government that markets would be guaranteed if farmers went all out for production, was criticized by several speakers and cited as a reason for a growing public mistrust of government.

With the market for milk booming, Strock reminded his audience that quality control assurances cannot be relaxed. In fact, there has been a trend for more stringent regulations regarding antibiotics, water, bacteria, or somatic cells in milk. He explained why a cooperative must be on the lookout for such problems:

"Sometimes . . . there is a feeling that your cooperative is a policeman. It isn't. It simply is trying to keep you out of the kind of trouble that results in a lost market for you and your fellow members. Recently, one of the major Baltimore dealers, in an effort to be the 'good guy' for all its producer suppliers who were not members of a cooperative, made the mistake of not following up on high counts, not pointing out violating conditions on the farm, not checking for antibiotics, not properly supervising the sampling of milk at the farm. The result was a non-passing score on a U.S. Public Health Service inspection. They came within a technicality of doing those farmers out of a market for their milk and severely reducing the sales opportunities of the dealer. We would be doing you a great disservice if we abdicated our responsibilities for the good guy role and you failed to obtain a passing USPHS score."

Elaborating on the subject briefly, fieldman Tom Moore announced that each load of milk is routinely checked for antibiotics. He asked that farmers also be careful about keeping their milk house records posted and up to date, and that a sanitizing solution be made available for dippers. Concluding his remarks, he stressed the need for mastitis control and prevention, adding that it will translate into more of that "white gold."

MCMP, which operates its own hauling fleet, claimed it has been able to resist trucking rate increases in the past, but may have to raise fees in the future if fuel prices continue to go up as they have. Strock observed that a five cent increase in the price of a gallon of fuel figures out to be about a ½-cent per hundredweight increase in hauling. In a related matter, Herbert Wessel, president of MCMP, noted that the cooperatives truck garages and service center may have to be relocated because of zoning difficulties in their present locality. He pointed out that the facilities are in need of remodeling.

Also speaking at the meeting, which had two dairy princesses present and a number of guests, was Emory Kilgore, District 7 director. A dairyman from Airville, he has served in that capacity for several terms and was re-elected again on Tuesday.

Two MCMP members were honored during the event because of 25-year membership records. Merle Bowman was cited as a 25-year individual membership member, while Ellis Crowl received a similar honor for the family membership category.

A total of 106 persons attended the dinner-meeting, held at the Centre Presbyterian Church.

Martin's LIMESTONE

Apply lime on frozen ground

Lime can be applied almost anytime however winter months are ideal, because the ground is firm and the freezing and thawing action helps to disseminate the lime in the soil

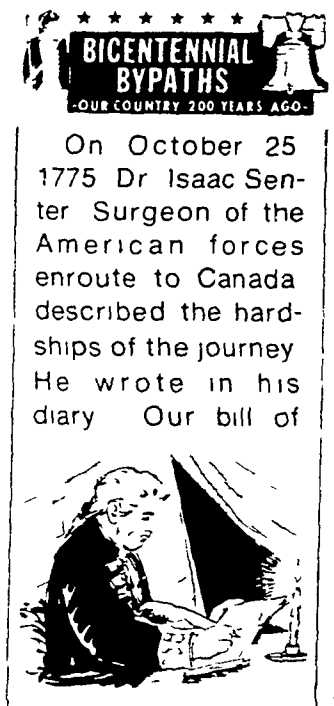
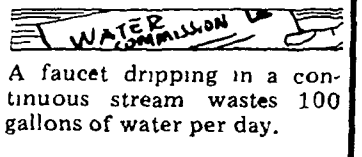
York ASCS offering repair deal

YORK - The York ASCS office is offering help to farmers who suffered losses due to the heavy rainstorms which swept through the area several weeks ago. According to County Agent John Smith, the ASCS office will cover up to 80 per cent of the costs of repair in certain situations. He reminds farmers that if they want to participate in this program they must be signed up no later than 30 days after the damage occurred.

Pesticide users are reminded that by October 1 of next year they will have to be licensed. Details have not yet been made available as to which pesticides will be restricted, but to avoid a hassle later, farmers are advised to take steps towards licensing.



On October 25 1775 Dr Isaac Senter Surgeon of the American forces enroute to Canada described the hardships of the journey He wrote in his diary Our bill of fare last night and this morning consisted of the jawbone of a swine destitute of any covering This we boiled in a quantity of water with a little thickening (of flour)



A faucet dripping in a continuous stream wastes 100 gallons of water per day.

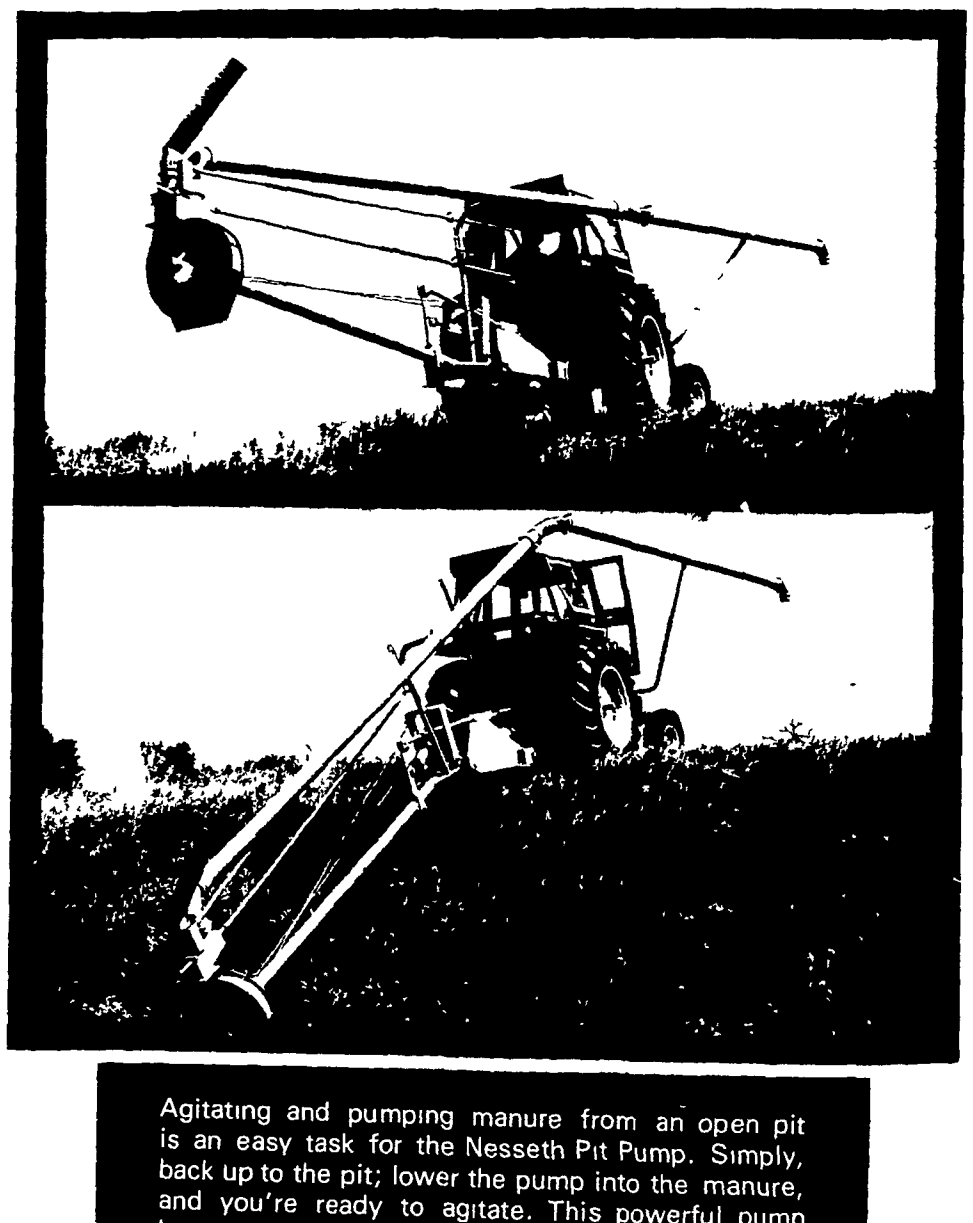
Nesseth



Agitating and pumping manure from an open pit is an easy task for the Nesseth Pit Pump. Simply, back up to the pit; lower the pump into the manure, and you're ready to agitate. This powerful pump has enough thrust to break up the thickest crust and it has a specially designed auger with cutting knives to shred solids. After the manure is fully agitated into a slurry, this same dual purpose pump is used to fill your spreader tank . . and it's all done without leaving your tractor. Nesseth offers two heavy-duty models, the 520 and the 524. Both are designed for high volume and easy mobility.

There will be a liquid manure handling demonstration held from 10-4 at the Richard Klingler farm on Wed., Oct. 29, 1975. Farm located 1 mile West of Winfield on Route 304, Union Co., PA. Come and see this pump in action.

Storm damages

(Continued from Page 1)

and in a few seconds I saw the chicken coop behind the house being picked up and twisted around." Bender commented.

"But just as soon as it had been lifted up, it disentegrated and was gone."

"I could feel the pressure building up in the house and just as I stepped away from the windows they began to pop, then the roof lifted right off."

Bender explained that he stood in the kitchen area as there seemed to be no time to move. "It seemed as soon as the storm had begun it was over."

A porch, which stood outside the Shenk's kitchen, was completely ripped off its foundation and blown away. Also portions of the roof were taken off while the chimney's on both sides of the brick structure crumbled.

Shenk noted that some of the heavy furniture in the kitchen fell to the floor. "The heavy pie board against the wall was found on the kitchen floor," Shenk said. "That (furniture) is heavy and it must have taken some force to knock that over."

No Livestock Lost

Bender, had several steers housed in the field ajoining the barn and a number of hogs in a pen-type building behind the house. Although the storm knocked over the fences and liberated the steers, all but one was returned to the farm.

Bender's newly constructed hog finishing house was torn to shreds and the hogs were quickly trucked to neighboring farms and the Lancaster Stockyards on Sunday.

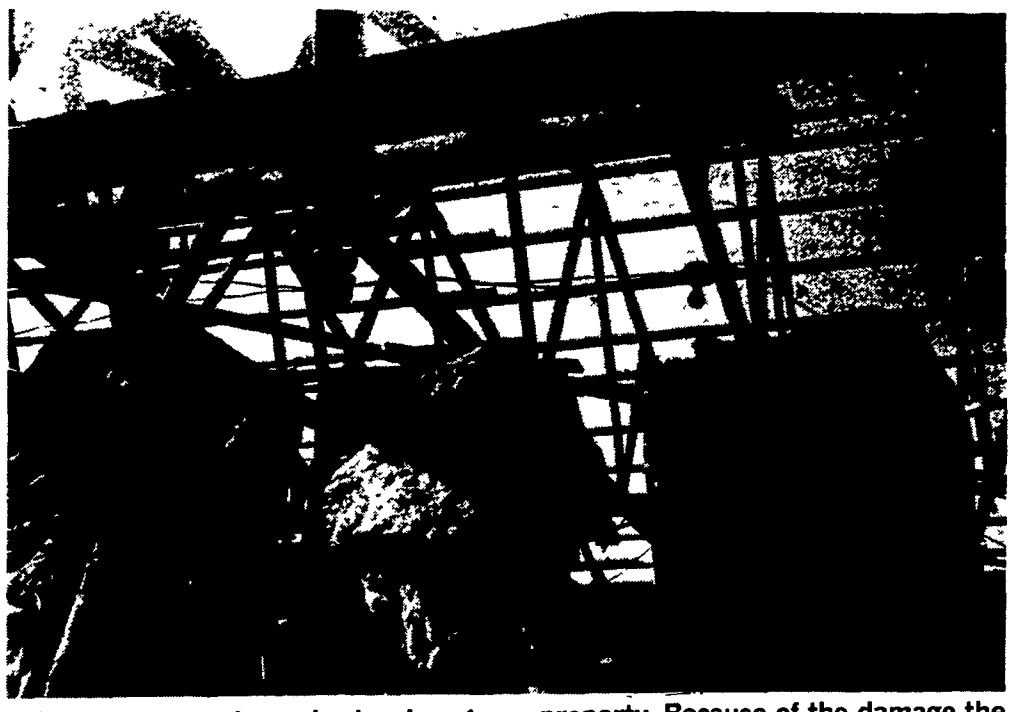
"None of the livestock was hurt so we were really fortunate," Bender stated. "It could have been much worse."

The front of the main barn was completely ripped off with the roof being torn away on both sides. A forage wagon which had been near the buildings was found some distance away in a field - crumpled and twisted to until it was hard to distinguish the machine.

Although the silos on the property were steady enough to withstand the intesity of the wind and pressure, Shenk noted that the smaller

Volunteer workers labored for hours to replace the barn roof at the Roy Shenk property near Annville. Shenk's farm was damaged severely by a tornado which touched down on Saturday evening.

Lancaster Farming Photo by Melissa Piper



Bare framework and shreds of insulation were the only materials left of a hog house standing on the Shenk property. Because of the damage the hogs were sent to the stockyards and neighbors.

Three black walnut trees which lined the lane to Shenk's property near Annville were stripped of bark and limbs by the midwestern-like twister. The heavy limbs were found in fields as far away as one-half a mile.

Closed Tues. & Sat. at 5:30 P.M.

Henry Hagy (on tractor) a neighbor of Shenk's manned a tractor which worked steadily throughout the week replacing beams and wood for a new roof on Shenk's machine shed.

A number of neighbors and volunteers worked diligently to restore portions of the Shenk house which were torn away by the tornado.

A porch connected to the house was ripped away by the winds and partially damaged the walls of the house.

Storm damage

(Continued from Page 15)

of the two had leaned-in slightly toward the larger which might have caused problems had the storm lingered.

Bender and Shenk both related that boards from the buildings had been found onSunday and Monday in nearby fields, stabbed into the ground at weird angles. "It was if someone delibertly threw them (boards) into the ground with a strong force," Shenk related.

Much of the rubble from the property found its way into the nearby corn fields and pastures. Clean up had begun on Sunday but litter as far away as one-half mile could be seen.

Mobile Home Never Touched

Along with the farm property a mobile home sets near the Shenk house, but was never touched by the storm.

"We can't believe that it went without harm," Shenk said, "It isn't even tied down."

George Wilson, who lives in the mobile home, explained his reactions during the tornado. "I was standing outside and heard a very strange noise."

"It sounded as if a freight train were coming straight for us," Wilson noted. "I saw the cloud and tried to beat it by driving out the lane."

Wilson was unharmed although his car recieved serious damage when the tornado passed him.

Henry Hagy, a neighbor of Shenk's and a minister, was getting ready to deliver a sermon at a church when the storm struck. "My children said a tornado was coming and I told them it was a mistake that I hadn't heard of any."

"But then the storm hit and the children reported seeing huge fireballs as the funnel picked up and twisted the power lines."

Neighbors Come to Help

As soon as entrance could be gained to the property on Saturday evening, the electric company serving Shenk's area, was on hand to restore temporary lines.

"The crews worked hard on Saturday evening and Sunday morning until temporary lines were ready," Shenk noted.

Soon after the electricity had been restored, Shenk's neighbors and friends began filterning in to restore some semblance of order.

"I didn't know where they would start," the farmer noted. "I guess from their expression neighter did they, but they dug in and really gave it a try."

On Monday, almost 90 volunteers showed up to work at the property with the Mennonite Disaster Committee bringing in a quanity of food and beverages. Also several of the Mennonite churches of the area brought in food for the workers and the Shenk family.

"We can't express just how much we appreciate all the help we've been given," Mrs. Shenk stated. "It makes us feel good to know that other people care enough to help like this."

While the neighbors were a boost in moral for the Shenks and Benders, Shenk noted that the hospitality of the strangers was astonishing to the families.

"We just couldn't believe how the people we didn't even know came to help," Shenk stated. "I've been given checks and donations and I don't know how to thank everyone.

Shenk, who was severly injured in an accident three years ago, expressed his appreciation to those who helped. "You know there is a saying that goes, you always shout your criticisms and whisper thanks, but this time I want to shout my thanks and forget the problems."

"I can't help crying at times but this is something you can't know about until you've experienced it."

Clarence Weaver, a neighbor, was in charge of the work crew which was in the processing of rebuilding the damaged barn and sheds early in the week.

"We realize there was much damage and decided that your help was needed," he explained. "We have had about ninety volunteers helping and hopefully we'll get the job done."

Damage Yet to be Calculated

Damage to buildings in the Brickerville area were estimated at $400,000 early in the week while the devestation in the Annville area is expected to far exceed that figure. And although the storm was relatively short lived (about 1 hour) it left much destruction in its path physically as well as emotionally.

Agronomist speaks at young farmer's meeting

Max Maichele, agronomist for the Ortho Chemical Company and representative for the P. L. Rohrer Company in Lancaster County, was the keynote speaker at the Garden Spot Young Farmer's meeting held last Monday evening.

Maichele spoke on the topic of fertilizer and also showed a slide presentation on agronomy field work. Nothing that fertilizer had become a valued commodity, Maichele explained that farmers exercise good judgement when deciding what to purchase. "We use fertilizer for good results and while all fertilizer is good, some kinds are better than others in given situations." "A farmer must know what he wants and really requires."

Maichele commented on the different forms of fertilizer and cautioned farmers to beware of exotic materials now in the market. "I'd advise farmers to stick to the conventional forms of fertilizer," the agronomist stated. "There are a lot of new exotics on the market but we don't always know what their effect will be."

The agronomist cautioned the farmers to be aware of what products and in what proportions they are included in the fertilizer he buys. "If you're not sure of what the product contains or want to know just what it's effect will be, ask your salesman or company representative."

"There's no need to add additional costs to your purchase such as limiting if you buy the right fertilizer to begin with."

"Use the fertilizer bill of rights which states - use the right amount of the right kind at the right time and in the right place for best results."

Donald Robinson, adult ag education instructor at Garden Spot, arranged for Maicehle's appearance at the meeting, in conjunction with the staff and management at P. L. Rohrer's in Smoketown.

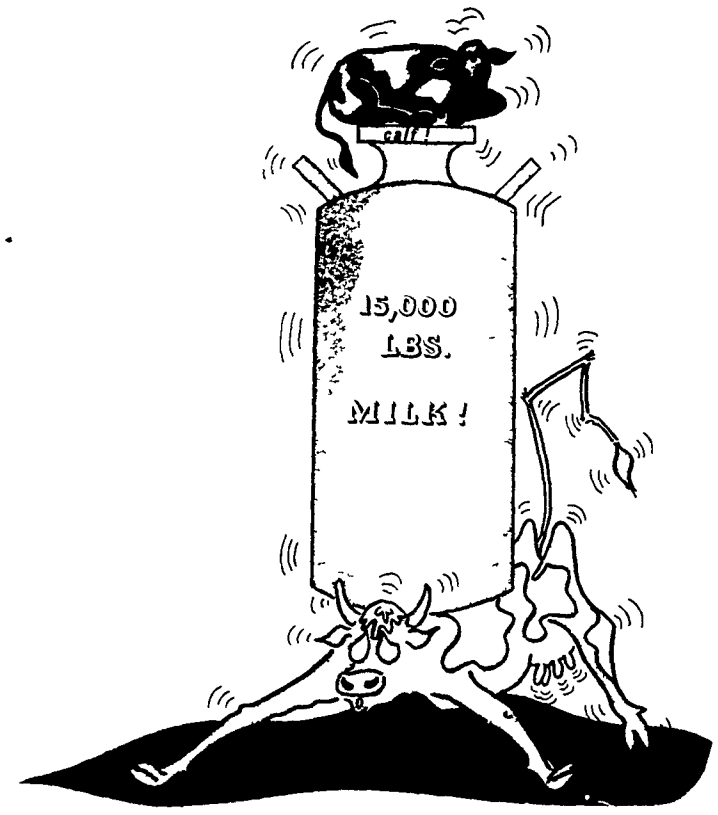
DRY COWS — WHY BOTHER?

The fifth in a series of six articles of interest to you, the farmer.
Articles one through four available on request. Call 717-394-3047.

Dry cows for many years have been neglected on a lot of farms throughout the country. Many people just put their dry cows in the back pen or back pasture and forget them until they drop their calf. Then they bring them into the barn, start feeding them chop, and wonder why they don't milk. Yes, a dry cow program is very important to a dairyman. Even though a cow is only dry 6-8 weeks and is producing a calf that you hope is strong and healthy when it hits the ground. Most of the calf is made in the last two months of the cows pregnancy or in other words during her dry period. It takes a high level of calcium and phosphorus to build bones, protein to grow hair, and also vitamins and trace minerals to develop the calf properly. To get this job done right you must have a balanced feeding program for the dry cows.

From past experience **AGRI-KING** has learned that the most critical time for a dairy cow is the last three weeks of her dry period and the first three weeks of her lactation. So, during this time it is especially important to see that she is fed a balanced ration.



If a dry cow feed is made the **AGRI-KING** way and the cow only eats half of what she should, she is not on the AGRI-KING dry cow feeding program. It is not only important to get a balanced ration, it is also important to make it palatable so she will eat it. Sometimes this is hard to do.

If a farmer can get a cow to drop her calf and go to peak production without problems, he has a cow that will probably produce her inherited production. It is not always easy for a farmer to feed his dry cows right; but we feel that if he understands why it is necessary to take the little extra attention it takes to do it right, most good farmers will do so. We're convinced that if you take good care of your dry cows, you will have a lot less trouble with milk fever and breeding problems.

There's only one way to do this

TEST YOUR FEEDS AND LET AGRI-KING BALANCE YOUR TOTAL FEEDING PROGRAM INCLUDING THE DRY COW FEED.

Brown Swiss cow has highest record

A brown Swiss aged cow was the highest butterfat producer of all dairy breeds on exhibit at the World Dairy Expo, Madison, Wisconsin, and at the Pan American Livestock Exposition held with the State Fair of Texas, Dallas, Texas. Arbor Rose Punch Maxine produced 30,320 pounds milk, 4.2 percent test and 1264 pounds butterfat in 348 days as a nine year old to gain this recognition. Owned by the Arbor Rose Punch Maxine Syndicate, she was shown by St. John's Dairy, Glendale, Arizona, one of these owners.

Maxine was at the World Dairy Expo and State Fair of Texas to participate in the Central and Western National Brown Swiss Shows. She was named Total Performance Winner at both of these National Brown Swiss Shows, a special recognition calculated on a cow's highest 305 day record, her lifetime production since 24 months of age and her placing in her calss at the show.

Children

Nearly six million children are currently growing up in fatherless homes Children are awarded to their mothers in approximately 90 percent of the child custody cases A study of middle-class, executive type fathers indicates that fathers of infants under one year spend on the average, 37 seconds a day with their infant offspring and about 15 minutes a day with their children over one year of age

Hershey hosts NEPPCO meeting

HERSHEY, Pa. - A show which promises to be "as sparkling, as lively and as interesting as any we've staged in recent years" is in store for those attending the 44th annual gathering of the Northeastern Poultry Producers Council, according to Dr. John W. Dodge, NEPPCO president.

The show will be launched with a keynote luncheon on October 21 and conclude with the big annual banquet on the evening of Thursday, October 23.

The bright new Convention Center in this resort city, a really big market egg and prize-carton display and impressive social and entertainment programs will team with two morning-long series of educational sessions to make the trip to Hershey more than worthwhile for the producer and the allied industryman, according to Dodge.

With early attendance and commercial display registration at a high level, all signs point to a very successful convention as the group returns to the heart of Pennsylvania farm country, according to Richard I. Ammon, NEPPCO executive director.

Keynote speaker Dr. Robert R. Spitzer, coordinator of the Food for Peace Program for the U.S. Department of State, will set the pattern for theme-directed speakers to follow in a year NEPPCO is stressing "Time for Decision".

Spitzer will explore the future of world animal agriculture and offer insights into the manner in which individual producers can deal with the fast-occuring changes and trends.

Other speakers at the show will provide up-to-the-minute outlooks on how poultry will be capitalized in the immediate years ahead, on the rail transportation picture for agriculture and one practical approaches to current poultry health concerns.

A round-up seminar on high-impact events facing the poultry industry today will place five experts from varied fields on the platform at the final morning-long session.

When visitors are not attending educational sessions or viewing the full array of commercial exhibits in the new Convention Center, they will have access to programs especially tailored to the interests of women and young adults and to a series of social and spectator activities.

Information on show registration is available at NEPPCO offices, 322 Oxford Valley Road, Fairless Hills, Pa. 19030, Tel. 215-547-0190. Room reservations should be made directly with the Hershey Motor Lodge.

Need for exports cited

HUDSON, Iowa - Lifting the moratorium on grain sales to Poland was a good move but does not go far enough, according to the president of the American Soybean Association.

"With the large crop increases indicated in the October crop report, there is no reason to continue the moratorium on sales to the USSR," said Seymour Johnson of Indianola, Miss.

He noted that soybean production is now estimated at 1.47 billion bushels, three per cent above last month's estimate and 19 per cent above last year's crop.

"This coupled with a carryover of 186 million bushels from last year's crop, means that we are going to have to sell a lot of soybeans overseas if soybean production is to remain profitable," Johnson said.

"Indications are that the Soviet Union will need to buy 75 million bushels of soybeans this year, and the moratorium may force them to purchase all they need from Brazil, our strongest competitor."

Noting that soybeans are the nation's largest single export item, he said the loss of soybean sales to Russia would be a loss of about $375 million to the U.S. economy and balance of payments.

Johnson also said the loss of a large scale in a year of oversupply could result in a smaller soybean crop next year, since depressed soybean prices may cause growers to turn to more profitable corn production.

"This would put soybean production into a feast-famine cycle that is not good for farmers, not good for domestic consumers who want stable prices, and not good for our overseas customers who need a steady source of supply."

Benton elected chairman

Dr. William J. Benton, associate dean of the College of Agricultural Sciences and associate director of the Agricultural Experiment Station, University of Delaware, has been elected chairman of the Northeast Agricultural Experiment Station Directors Association. He will take office next month. Benton is also currently serving on the Regional Research Committee of the Association and is co-administrative advisor to the Dairy Program Steering Committee for the Northeast Region.

Benton, a veterinarian, joined the University of Delaware as a research assistant in 1956. He became chairman of the Deaprtment of Animal Science in 1968 and assistant dean of the College and Assistant Director of the Experiment Station in 1971. In 1974, Benton was named associate dean and associate director.

Roller-coaster prices seen

(Continued from Page 1)

sometime before the end of the current marketing year (March 31, 1976.) According to Strock, dairymen can look for relatively low milk prices in the Spring, because an announcement for 75 per cent of parity is expected at that time.

Despite the improved outlook in prices, there were some skeptical comments about the future.

Herbert Wessel, Jr., president of MCMP, said: "Decent milk prices are on the way, but there is certain to be some sales resistance which could hurt sales — lower Class I utilization. It's the old pendulum story, it swings too far one way before it comes back the other way. We need the higher prices, however."

Strock ended his remarks with: "A conclusion which might be drawn from the report to members is that the weather looks favorable. But weather is short-term climate and we are more unsure of climate than we are of weather."

Emory Kilgore, incumbent and re-elected director of MCMP's District 7, (York County) voiced a similar opinion on the price conditions presently facing dairy farmers. His concern on the subject was that if the increased prices in milk are carried over to the consumer, it could open up imports.

Strock, however, does not believe the raised price supports will have an effect on current retail levels because wholesale dairy product prices are well above the new support prices. Some examples he cited were: "In New York the wholesale price of Grade A butter is now 95 cents a pound and the support price for butter is 81¼ cents per pound. Cheddar cheese currently sells wholesale at 94½ cents per pound — almost 10 cents above the new support level; and Grade A skim milk powder now sells for about 70 cents per pound and the new support level is 62.4 cents.

While prices of dairy products are rising and demand is increasing in face of a presently tight supply, Kilgore expressed some concern over the future handling of Class II milk at MCMP's Laurel, Md. plant. "The Board of Directors will have a tough decision to make in the near future because our supply of milk is high and we may have problems getting rid of it. He suggested that it might have to be moved either north or south.

MCMP's membership, now over 1,000 again after a drop in recent years, continuous to grow — as is true of most cooperatives across the country. According to speakers at the banquet, which was held this past Tuesday night in the Centre Presbyterian Church, memberships in cooperatives is growing in spite of some stiff battles from state and federal government. This worries MCMP officials, and they cited a few of the benefits which were made available to MCMP members.

The MCMP over-Order Class I charge, for example, which reached a high of 71 cents per hundredweight in Sept. 1974, netted MCMP members a total of nearly one-and-three-quarter million dollars. Strock pointed out that this figure does not include quality premiums, profit-sharing returns, and the more than $600,000 representing Co-op savings in 1974.

MCMP officials also commended the cooperative's equipment division which sells equipment and supplies to members; and the company's own trucking fleet.

The MCMP officials who spoke at the meeting all exclaimed a need for cooperatives and a desirability for their getting together. Referring to two new recent additions to the Pennmarva Dairymen's Cooperative Federation, Inc., of which MCMP is a member, Kilgore observed: "The new co-ops joining is good — it gives us a chance to get together and talk, compare, and know what's going on." He also serves as president of the Chesapeake Bay Dairy Council.

Wessel went a bit further in his remarks on the subject, claiming they were merely his own personal opinion and not necessarily statements reflecting MCMP's position. "Farmers invest in the production of milk — then how about investing in marketing," he began. "I see a merger of cooperatives as a blessing in disguise for marketing."

The subject of world trade also came up. Strock expressed disappointment in President Ford's decision to not export grains to Russia, adding, however, that he agrees with 99 per cent of what the President is doing.

Regarding dairy imports into the United States, Strock remarked:

"In my judgement, the final decision on what this country does by way of permitting the importation of subsidized dairy products into this country will have more to do with the bottom line figure on your financial statement than anything else. Effective controls against the importation of subsidized dairy imports is not enough. We can be inundated by imports from such places as New Zealand and Australia because those countries are blocked out of their historical western Europe markets. We can live with free trade if trade is universally free and unfettered. We cannot live with free trade if the uneconomical high cost producers, especially western Europe, restrict trade so that low cost producers such as New Zealand and Australia have only the United States as a market for their dairy products. Currently, Japan is sopping up much of the production of New Zealand and Australia. The problem is intensified when western Europe sets their domestic dairy support price so high that very large surpluses occur. Milk price supports cost western Europeans two-billion dollars annually just to buy up the excess. One would think that consumers would tire of paying exhorbitant prices for a product they can have for substantially less than they now pay; and they would save the two billion dollars in the bargain."

Wessel aimed his criticism on trade in the direction of Washington, saying "there's hanky-panky in the grain business." Targets of his verbal attack included AFL-CIV president, George Meany, the U.S. State Department, and government in general.

"People think food is a public utility," he quipped, our grain market is being nationalized — what's next?

Turning to the current grain negotiations taking place in Moscow and Washington, Wessel, a dairyman from Hampstead, Md., observed that it's the State Department which is making the deals, rather than USDA.

Giving the audience something to take home besides door prizes and a full stomach, Strock commented in one part of his speech: "The farmer who is able to shift some of his efforts from his back to his head will stand the better chance for success."

He added that farmers will be wise to make their decisions on annual figures, rather than periodic ones, because some ups and downs for the price of milk are expected during the coming year.

Fertilizer outlook

(Continued from Page 1)

comment that fertilizer is not imperative for growth of food and thus places the natural gas high on the consumer list and low on the agriculture scene. Thus the real story of supplies might well be determined by the weather this winter.

Speaking before a group of young farmers at a meeting in New Holland on Monday evening; Bob Strong, district representative for Ortho Chemical Company, commented on the natural gas situation. "So much is going to depend on the weather - if we have a long winter, fertilizer may be hurt by natural gas shortages."

"Fertilizer is not a bad buy now but we can't say for the beginning of the year."

Another problem which seems to have foreshadowed the brighter aspect of fertilizer for the bicentennial year is the supplies of potash which are vital to production. Much of the potash (almost 85 percent) is now being imported from Canada. If the raw material continues to flow into this country, the outlook may well stay "rosey" but if a shortage develops or imports cease, a real problem may lie in store.

While the fertilizer market seems to be heading toward a brighter future, the supplies of nitrogen may be of concern, especially in the spring months. Imports of nitrogen may be below the predicted levels that were voiced at the beginning of the year, for Western Europe suffered a wet spring and applied very little of the commodity. However following a severe drought during the summer, officials are predicting that producers in that portion of the world will be using high applications of nitrogen in the fall.

"We do not foresee the current influx of European nitrogen continuing on into our spring season," commented Wheeler.

"All in all," the fertilizer official noted, "we are heading for a tight nitrogen supply in spring 1976; the now fall supplies will be adequate."

Phosphates Look Good

One bright note is that the supplies of phosphates look good for the coming season. Local fertilizer officials have stated that phosphates along with other fertilizer components look good at this time. In fact one area producer recently stated, "all fertilizer materials are in over supply at this time."

The surplus of the phosphates have been attributed to the new production, low demands in the spring and a drop in exports of the commodity. As exports of phosphates are not predicted to increase substancially until early next year, the material should be quite adequate - at least in this country.

With the surplus left over from last year's selling slump coupled with new productions and a good supply of raw materials, we might well see the price of fertilizer drop within the next few months. However depending largely on the natural gas situation during the winter months, prices may increase again after the first of the year. While all advice seems to point to the "buy now" proposition, the winter months ahead will tell the story for spring prices and supplies.

In general, the outlook seems much brighter than the darkened marketing situation which clouded last year's sales. There are still a number of variables to deal with such as the weather, exports, and the imports of raw materials but at least the stockpiles of fertilizer surpluses have offered a cushioning effect.

"While there are some ifs ahead of us," Wheeler commented, "I have little mental reservation on 1976. All signs are go if we manage the opportunities that are surely at hand."

4-H teen leaders honored at banquet

Receiving the 1975 outstanding teen leader awards at the Lancaster County 4-H Leadership Banquet held recently were June Grube and Gayle Kline.

June served as a teen leaders in the Landisville Klassy Klippers Club while Gayle served the Mountville 4-H. Both young ladies competed with over 30 teens completing the teen leader project.

As a teen leader, June was chairman of her club's round-up and helped to organize the fashion show, awards presentation and refreshments. On the county level, June served on the Dress Revue committee and planned a crafts project for over 100 4-Hers on Achievement Day.

Gayle was active in her club as president and helped to plan and carry out numerous projects. A seamstress, Gayle helped the younger members to make a cotton skirt project.

Two other teens who recieved recognition were Gary Akers and Betty Jo Bitler, co-presidents of the Lancaster County 4-H Council. The youths were recognized for their outstanding leadership abilities and personal character.

Along with the teen recognitions, many adult leaders were honored at the banquet held at the Farm and Home Center. Dr. William Smith was speaker for the event.

Fertilizer convention slated for December

PEORIA, Ill. — A record turnout is expected for the 21st Annual Convention of the National Fertilizer Solutions Association (NFSA) which is being held in Denver, Colorado, on December 1-4. Featured speaker will be U. S. Under Secretary of Agriculture, J. Phil Campbell, who will address the convention's opening breakfast the morning of December 2. Two other universally-known figures are Dr. Norman Vincent Peale, who will be the guest speaker at a noon luncheon the following day, and Chris Schenkel, renowned sportscaster, who will speak at the closing luncheon Thursday noon.

"We're going to take a hard look at the challenges facing the fertilizer industry in the upcoming year," said R. Hovey Tinsman, Jr., president of the NFSA. "And we'll be looking at positive ways for turning these challenges into avenues of opportunity — which, by the way, is why we adopted 'Poistive Solutions '76' as the theme for this year's convention." According to Tinsman, the convention is attended by both foreign and domestic fertilizer dealers as well as chemical and equipment manufacturers. "We'll have a record number of exhibitors this year and expect more than 3,000 to attend the four-day meeting," Tinsman added.

Charles Bryk, chairman of exhibitions and corporate director of advertising for Texasgulf Inc., reported that the 100,000 square feet of exhibitor space in Currigan Exhibition Hall has been sold out since August of this year. "This is unprecedented in the history of our association," he said.

The lineup of entertainment includes singers Earl Wrightson and Lois Hunt and the Norton Trustman Orchestra for "A Night with the President" on December 1, and the Glenn Miller Orchestra and cabaret entertainment by the "Lawmen" following an Awards Banquet the evening of December 3.

The NFSA is a national trade association based in Peoria, Illinois, and represents more than 1,000 companies and independent dealers involved in the manufacture and distribution of liquid fertilizers, additives, pesticides, herbicides and equipment. The NFSA has the largest national membership of any association in the fertilizer-chemical industry.

HIBERNATION FOR LAWN MOWERS

When storing your lawn mower, it's important you do it safely Here are some tips from experts at the Outdoor Power Equipment Institute for the owners of the 10 million lawn mowers in America that will be bedded down for the cold weather

1. Drain all gasoline out of the mower before putting it away Store the gas in a strong, metal, clearly marked, safety-type can with a self-closing cap and keep it away from children and combustible materials.

2. Never reach into the blade to clean it unless you're sure the mower is off and the power is off. Stop the engine and disconnect or remove the spark plug before making any repairs.

3. Make sure that you store the mower in a safe place where children and pets can't "play" with it.

4. Discuss proper servicing and maintenance needs with your dealer. Schedule a service appointment well before the spring rush.

5. Before you take the machine out again for spring mowing, make sure to read the safe operating instructions included with the mower.

Ag. dept. seeks century old farms for Bicentennial

Farms which have been owned by the same family for 100 years or more are being sought by the Pennsylvania Department of Agriculture to emphasize the importance of a rural tradition in the state and the longevity of farm ownership. A certificate and marker will be made available to qualifying farms to provide the community with a sense of pride and the Bicentennial visitor with a reminder of Pennsylvania's farm heritage. It will be a continuing program.

Criteria for application: 1. Farm must be owned by the same family for 100 consecutive years to the date of application and family member must live there now. 2. The farm must consist of 10 acres of original land OR gross $1,000 a year from the sale of farm goods.

For further information interested persons should contact either their County Agent, or the Public Information Office, Department of Agriculture, 2301 North Cameron Street, Harrisburg, Pa. 17120.

Youth receives FFA degree

Greg Landis, son of Mr. and Mrs. Jay Landis, Lancaster R6, will be receiving his FFA American Farming Degree at the National Convention in Kansas City in November

(Continued from Page 1)

dairy business, Greg naturally turned to that particular enterprise for FFA projects and raised a number of registered Holstein calves and heifers for his work. Greg noted that he was helped along in his work by a favorite cow which had seven heifers in a row. "I was certainly lucky in that respect and it gave me a good start in the dairy business." Greg still owns his first cow and four succeeding generations of that animal which is a rare fete in today's dairying world.

Based on his outstanding project work and activities Greg received his Keystone Farming degree in January of 1973 and was later elected to serve as the state vice-president of the FFA.

"I was happy to be chosen as a state officer as I did get to travel and meet many people."

"It is a responsibility," the youth commented, "but one which gets you really involved in the work."

Active in Community Programs

Along with his work in FFA, Greg has also been an active member and leader in several other clubs. A member of the County 4-H Holstein Club, Greg served as president of the organization. He is also a member of the Junior Holstein Club in Lancaster County and has been selected as the youth activities chairman for the Pa. Holstein Association. The young man also belongs to the Penn Manor Young Farmers.

Outstanding Degree

Only a minute fraction of the FFA membership is allowed to receive the American Farming Degree since it is reserved for only those members having compiled outstanding records of farm production, work experience and activities. Also the candidates must go through a grueling regiment of interviews and visitations.

"I was certainly happy to be notified I was receiving the degree," Greg explained. "I entered the competition but wasn't sure I would make it."

"You know it was one of my goals in life and it feels good to know that working hard has paid off."

While receiving the American Farming Degree has been a goal reached for the youth, Greg is still aspiring for more activities in the FFA. The Millersville youth has entered the competition to become a National FFA officer and will be interviewing for the position when he arrives in Kansas City next month.

"I guess people may wonder why I want to try to become a national officer." "I think more than anything else I want to see if another goal can be reached."

Noting that the competition for a national office is extremely rough, Greg explained his feelings toward the position, "I know that all the interviews and questions will be hard, but I want to know that I have tried my best."

While the convention is still three weeks away, the youth has many activities reaching for his attention. Greg is in charge of the youth program for the State Holstein Convention to be held in November and has been planning events for a number of months, and then there is always the field work and milking to be done.

Greg is only the second youth from the Penn Manor High School to be chosen for the American Farming Degree and may well be the first to become a national officer when he arrives in Kansas City next month.

Sour cream is made by adding lactic acid bacteria culture to light cream. It contains at least 18 percent milkfat.

If you have fat cattle or need feeders . . .

Pull-off held at Buck track

By Dieter Krieg

THE BUCK — Last Saturday night was when the top winners of the just - ended tractor pulling season put their driving skills and high - powered machines on the line for the "Buck Pull Off," and accompanying championship honors. Emerging as first place winners in the event, which featured seven classes, were Michael Wright of New Freedom; Dale Smoker, Cochranville; Lester Houck, Kinzers; Mark Stauffer, Ephrata; and Gary Mills, Fallston, Md. Houck and Wright each won two classes.

Engines screamed under the stress of the pull, and on several occasions broke down because of it. One competitor pulled the 22½-ton sled to near the 250-foot mark when engine parts suddenly came rocketing through the air. With a large hole in the side of the engine, and oil gushing onto the track, the tractor had to be pulled away.

The two tractors which had done so well the previous week during regular pulls, Deere Power I and Deere Power II, were both disabled in their attempts for championship trophies.

Developing up to 1,000 horsepower, the engines are capable of churning the wheels at a speed which would be equivalent to up to 60 miles per hour. But the weight of the sled is so great that it cuts the actual forward speed to around 20 miles per hour. The 5-foot plus high wheels with tires measuring up to 30 inches in width, spin in the dirt.

A crowd of about 2,000 people was on hand to see the championship pull-off, which, according to Elwood Funk - a puller and officer of the Buck Tractor Pulls, Inc. - was gratifying because the weather wasn't the best.

Following is a list of the top three winners in each of the seven classes, along with the type of machine they drove and the distance the sled was pulled.

12,000 S.S.

1. Michael Wright New Freedom, Pa., IH 1066 300.0; 2. Leonard Thomas Boonsboro, MD. J.D. 4020 No. 2 267.5; 3. Harry Griest Coatesville, Pa. IH 145

Insomnia

Insomnia can't be cured with pills, dark curtains, sheep-counting or other such devices, a California psychiatrist contends Increased daytime exercise, regular bedtime schedule, pre-dinner relaxation, regular and satisfying coitus, and a ban on naps and caffeine after mid-day are the best bets to get you to sleep at night

Clay Sow Feeding Stalls Put Every Sow on Schedule

And you may cut feed costs in half — actually pay for the stalls on savings in feed.

Sows are "dribble fed" on a time clock schedule — as often as you want. Fed only 3 to 4 lbs. per day, sows are in better condition, produce larger litters. You add to your profit through more marketable pigs.

See the system that saves you money; makes you money.

INSURANCE AND YOU

by M.J. Wanamaker, president National Association of Insurance Agents, Inc.

Inflation-conscious consumers are concerned about how to get the greatest value for the dollar. They are learning that low price does not mean a bargain.

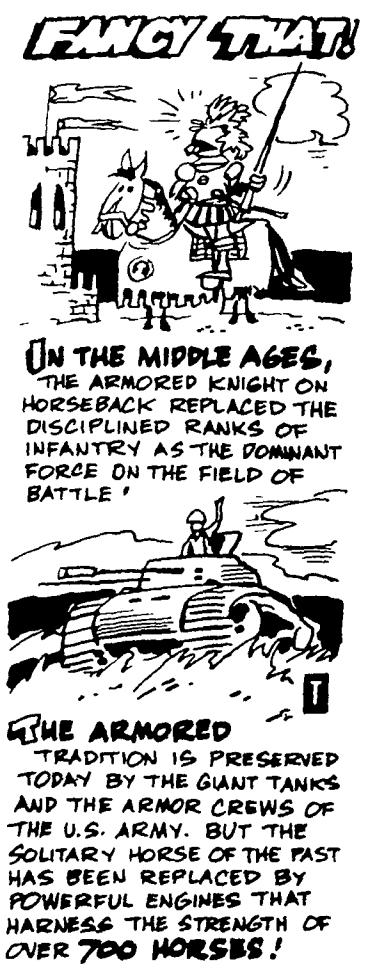
Insurance consumers are equally concerned that the policies they buy are providing the protection they expect. Insurance is no value when it does not perform as promised or Wanamaker claims settlements become unnecessarily complicated It pays to deal with an agent who can shop for and make sure the policy, whether auto or home, gives the coverage you need.

Deal with a businessman who lives and works in the community and knows local conditions. His professional reputation in the community is his most important asset. He knows the claims practices of the company carrying your insurance.

You should determine if the person who sells you the insurance is the one who handles your claims. Find out if the agent will provide back-up service such as answering questions and helping with claims

The independent insurance agent in your community is the one who meets all of these requirements. He represents several companies, often eight or more, and can tailor your insurance by placing it with the company which best suits your specific needs. Since he is a local businessman, he is available to help in an emergency. He will help with claims, advise on new policies and counsel on problems

The one-product, one-price insurance outlet may be convenient for the purchase of insurance but match its service capabilities against the suggested checklist Being handed off by the seller to an unknown claims agent or told to call an 800 telephone number for claims or questions does not provide prompt, personal service.



FANCY THAT!
IN THE MIDDLE AGES, THE ARMORED KNIGHT ON HORSEBACK REPLACED THE DISCIPLINED RANKS OF INFANTRY AS THE DOMINANT FORCE ON THE FIELD OF BATTLE!
THE ARMORED TRADITION IS PRESERVED TODAY BY THE GIANT TANKS AND THE ARMOR CREWS OF THE U.S. ARMY. BUT THE SOLITARY HORSE OF THE PAST HAS BEEN REPLACED BY POWERFUL ENGINES THAT HARNESS THE STRENGTH OF OVER 700 HORSES!

CHECKLIST for buying a gutter cleaner

If you re now looking for a gutter cleaner be sure it has all these important features

One piece chain link with hook and eye for heavy duty 4 way flexibility

Angled flites for added efficiency

Wear shoe on each flite a full half inch thick for longer flite life

Flites welded to links — fewer parts to corrode

Easy link removal in 10 seconds — without tools

Removable corner wheel assemblies to eliminate cement break out

Flanged corner wheel to guide chain and protect gutter floor

4 Tooth drive sprocket reduces strain on reducer

Sprocket and roller chain reducer for complete dependability

Flite cleaner engineered to serve right and last long

Automatic chain tightener works with full or part load

Continuous duty motor eliminates motor overheating

Telescoping slide legs for easy slide adjustment

Chilled cast hold down shoe for longer shoe life

Chain oiler for lubrication and corrosion resistance

The only gutter cleaner which gives you ALL these vital features and more is the PATZ Gutter cleaner Designed by a farmer for farmers this unit will provide years of labor saving trouble free service

7H107 WORTHY MASTER
ECRASO WORTHY MASTER 1458728
EXCELLENT (92) GOLD MEDAL 9-70

The WORTHY MASTER daughters are tall and sharp. They are clean-cut cattle that stand taller in the front end than they do in the rear end. Udders are well attached fore and rear, with strong median support and proper teat placement. The dairymen who like Worthy Master best are those who are milking his daughters. His maternal sister, Ecraso Topper Shela, made an Ohio State record with 36940 lbs. milk. This is the bull to use on short cattle that need more "daylight" under them.

Bred by: E C. Rausch, Plain City, Ohio

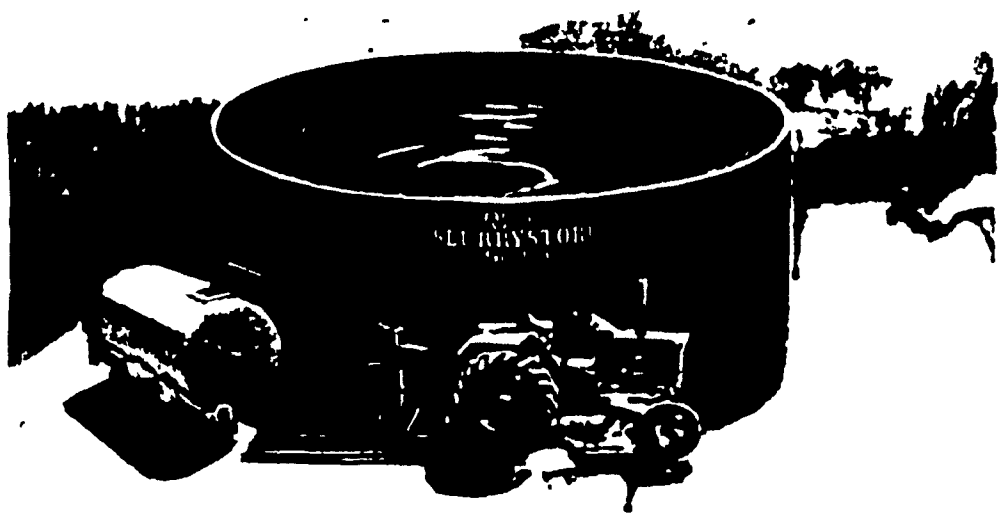
SLURRYSTORE
The proven system that gives you positive containment

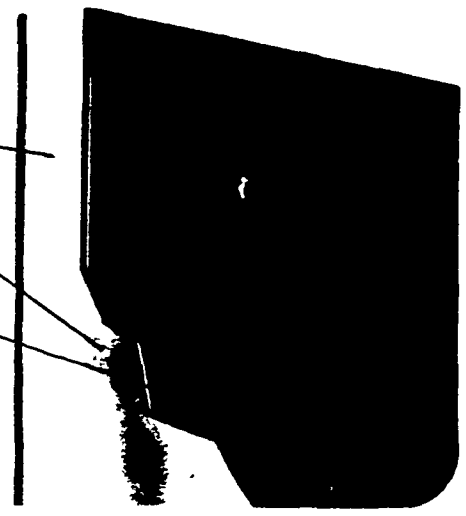


glass-fused-to-steel construction:

High quality steel core is shot-blasted to form a clean and highly effective bonding surface

A special formulation is applied to the steel core Then coating and steel are fused together at 1700 degrees

Bonding force between the steel and ceramic coating exceeds 10 000 pounds per square inch



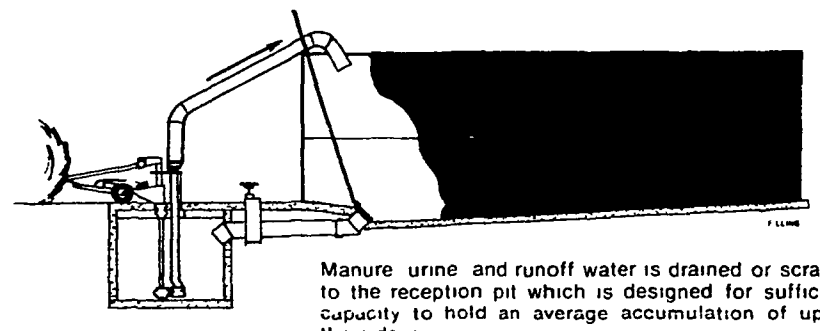
consider the facts...

You don't always have time to load and haul manure when plowing, planting, combining or when other high-priority jobs demand your attention But you also can't afford to wait until you're "up to here" in manure and see production start to fall off What's more, you can't always spread manure in the dead of winter And spring rains (with resulting runoff) can cause a potential pollution problem

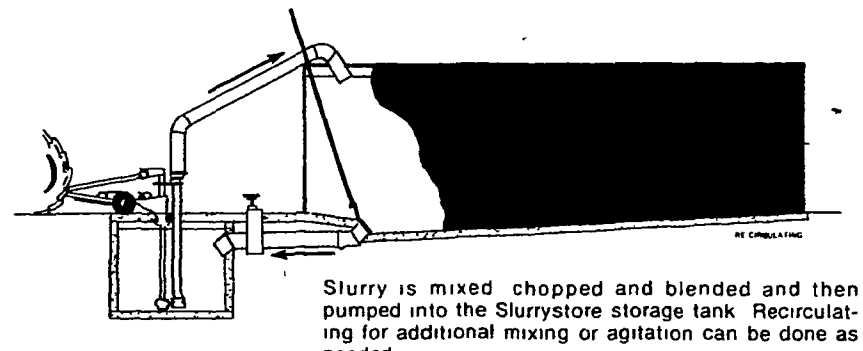
Did you ever figure up how much labor goes into your manure handling each year? University of Wisconsin studies show that a 50-cow dairy operation with a conventional manure disposal method required about twice as much labor as the same size operation with a liquid manure handling system

Major problems with daily hauling, stacking, lagoons or underground storage pits include. 1) high investment or labor costs 2) less-than-ideal working conditions 3) danger of stream or water table pollution and 4) safety hazards related to both humans and animals. Future expansion with the Slurrystore system allows you to meet growing needs more easily

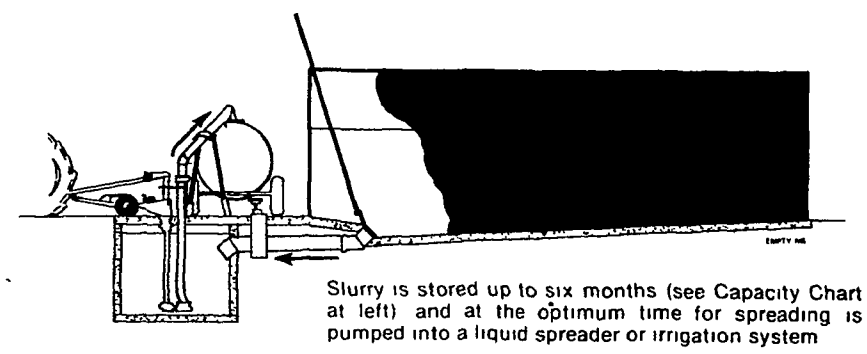
it works like this:



Manure urine and runoff water is drained or scraped to the reception pit which is designed for sufficient capacity to hold an average accumulation of up to three days



Slurry is mixed chopped and blended and then pumped into the Slurrystore storage tank Recirculating for additional mixing or agitation can be done as needed



Slurry is stored up to six months (see Capacity Chart at left) and at the optimum time for spreading is pumped into a liquid spreader or irrigation system

recommended manure storage capacities*

		Slurrystore Model 2515	Slurrystore Model 4215	Slurrystore Model 6115
		50 000 gallons	140,000 gallons	300,000 gallons
	Days in Storage	Number of Head	Number of Head	Number of Head
Dairy (1400 lb)	90 days	45	130	280
	120 days	35	95	210
	150 days	25	80	165
Beef (750 lb)	90 days	80	220	475
	120 days	60	170	355
	150 days	50	135	285
Hog (150 lb)	90 days	370	1,035	2,220

THOUGHT FOR THE WEEK

Kindness is the golden chain by which society is bound together.

Kay Rohrer

Has combined farm life with many activities

By Mrs. Charles McSparran
Feature Writer

Mrs. Charles H. (Kay) Rohrer, who lives four miles east of Strasburg on route 741, is completing her first year as treasure of the Society of Farm Women of Lancaster County and says "I really enjoy being county treasurer. She had handled about $3000. during the year, $2000. of which will be turned over to the Farm and Home Center to purchase a piano. This has been county Farm Women project for this year.

Jay Landis, President of the Farm and Home Foundation, will accept this $2000. gift at the fifty-eighth annual convention of the Society of Farm Women of Lancaster County Saturday, November 1 which will be held at the Farm and Home Center. Other business will include the election of officers. Mrs. Robert Gregory, Farm Women Society 3, who has served as First Vice-President the past two years, will be come President, replacing Mrs. Carl Johnson, Society 15, who is completing two years as president and who will preside at the convention. Mrs. Carl Diller, Society 22, will become First Vice-President and a new Second Vice-President will be elected. Mrs. Harry Hershey Jr., Society 26, is completing her first year as Secretary.

Reservations for the dinner will be accepted by Mrs. John E. Groff, Society 14, and Mrs. Mervin Peifer, Society 5, until October 22. The registration committee, Mrs. Loren Bucher, Society 11, chairman, will be working in the lobby of the Farm and Home Center from 9:30 to 10:30 a.m. all the while the bazzar will be in full swing. Reports of the societies and county officers will be given and a memorial service will be conducted by Mrs. Albert Fry Jr., Society 27, and Mrs. Anna Geyer, Society 6. The program committee, Mrs. Jesse Balmer, Society 3, chairman, has secured Mrs. Ruth Hand from the Penna. State Extension Service who will speak on "Still Holding at 39" and The Hershey's talented grandchildren of the county president, will entertain with a varied musical program.

Mrs. Rohrer has been a member of Farm Women Society 7 for 8 years, where Mrs. Carlton Homsher is president of the society which has 46 members.

Society 7 regularly has an attendance of 35 ladies at their meetings which are usually held in homes of the members. The annual banquet was held last Saturday at the Washington House Restaurant in the Historic Strasburg complex. Mrs. Rohrer served on the decorating committee for the banquet.

She served as Vice-President of Society 7 in 1971 and 1972 and President in 1973 and 1974, her society chose her as their candidate for Farm Woman of The Year in the county contest in 1973. She and Mrs. William Harnish of Farm Women Society 28 were chosen to represent the Outstanding Young Women of America contest. This is a national contest in which women compete and are judged upon their civic contribution to their city and county. Through this she nominated Mrs. David Fyock of Farm Women Society 1 as the candidate from Lancaster Co. Farm Women to compete in the 1974 contest and she was a Lancaster Co. winner.

Two years ago Mr. and Mrs. Charles Rohrer and his brother Allen bought the former Pardise Fruit Farm which once boasted a 100 acre apple orchard. This is now a dairy and diversified farming operation which includes an 85 head Holstein dairy herd, 15,000 Leghorn laying hens and nearly 1000 hogs, conducted by them and their retired father, J. Arthur Rohrer, who owns the adjoining farm. Even though he is a retired farmer he still assists his sons in the operation of the two farms known as Selway Farms. Kay keeps their company farm books and runs a lot of errands. She says "I also help in the fields if the men are desperate." Rohrers are in DHIA and members of the Holstein Association. Charles is a member of the Pa. Farmers Association. They ship milk to Inter-State Milk Producers. Charles was chosen as Young Co-operator for District 6 and won that award from Inter-State for 1974-1975. He and Kay won an all-expense paid trip to Florida for one week where they attended National Milk Producers convention in Bal Harbour, near Miami.

Mrs. Rohrer is holding 19 month old Nancy who loves to stick her hand in her Dad's mounted kodiak bear's mouth. Her sister Lela is in the foreground. Mrs. Rohrer made the beeswax candle and the Williamsburg flower arrangements.

Kay is the daughter of the late George and Lois Zahn of near Chadds Ford, Chester County and was raised in the Philadelphia suburb of Ridley Park. She graduated from a private high school near Orlando, Florida, the Philadelphia College of Bible, and Elizabethtown College where she was an English major. She did some journalism work in at Philadelphia School Of Bible and Elizabethtown College where she worked on the year book and the E-Tonian, the school paper. Kay sang alto in the high school and college chorus and first tenor for three years in the male quartette at Sandy Cove Bible Conference. She worked three summers while she was in college. She did some public relations for the Sacandaga Bible Conference in New York and some free lance writing. Since she was married she did substitute teaching in Pequea Valley High School.

Kay says "I love living on the farm. The most exciting thing about being on the farm is that I'm married to the farmer. He taught me - 'You don't always understand life, just enjoy it.' When I was a kid at camp I learned John 11:40 - 'Jesus saith unto her, Said I not unto thee, that, if thou wouldest believe, tho shouldest see the glory of God?' Through the rough times, I really feel I've seen His Glory. God has blessed us so much." She feels it was providential that they could buy their farm and be able to raise their children there. She often has children from the city visiting there in the summer.

The back part of Rohrers' house was built in the early seventeen hundreds by John Ferree and the front section added in 1850. Rohrers have restored the first and second floors as nearly as possible to the original and are in the process of restoring the third floor rooms. Their home is beautiful with the fireplaces opened again and in use to help heat it. They have tenants in part of the house at the present time.

Rohrers have three daughters. Lela is in first grade at Paradise Elementary School. Lonna is five years old and in kindergarten at the same school. Both girls love crafts

Homestead Notes

Mrs. Charles H. (Kay) Rohrer, a member of Farm Women Society 7 and Treasurer of the Society of Farm Women of Lancaster Co., making out a $2000. check to purchase a piano for the basement of the Farm and Home Center.

and are very advanced for their ages in doing them. Lonna has made some cornhuck dolls and both make dried flower arrangements. They want to make pottery vases and bowls for Christmas gifts this year. Nancy is 19 months old.

Rohrers are members of Calvary Independent Church of Lancaster where Kay sometimes sings solos.

Kay has been a member of the Mary Ferree Society, a Paradise Woman's Club with about 200 members, since 1966 and served as Secretary for two years. They support the Girl Scouts in Paradise and gave donations to the community park. Kay did some typing for their cookbook, Lancaster County Album, which has 245 pages and was published in 1971. They have sold between 25000 and 30,000 copies of it.

Kay, whose grandfather was a florist in Philadelphia, says she was so poor at raising flowers that she used to kill cacti. However, she is now enjoying plants. She says "I like to try to raise everything from scratch. I want to have a greenhouse by next year." She has a garden and works in it and on the lawn. She has an herb garden outside and is potting small herb plants to top her Christmas packages. She grows a lot of flower annuals and is drying many flowers now for arrangements. She has a lot of house plants, including spider plants, flame violets, ivys etc. but her specialties are ferns and African violets. She has many varieties of both.

Kay taught herself to sew. She made drapes and makes some of her own clothes as well as for the girls. She does a lot of needlework. She designs her own crewel patterns and also does some old English designs. She has enjoyed reading books on crewel. She makes mostly crewel samplers and has given several as gifts. She does macrame. She also makes candles of pure beeswax which she gets from her uncle who raises bees. She uses a lot in

Lela made the cornhusk doll she is holding and her younger sister Lonna made the colorful dried flower arrangement. A few of Mrs. Rohrer's ferns and African violets are beside them.

sconces and candlesticks and gives them as gifts. She says "Any crafts I do are things I want in my house." She took lessons on making Williamsburg arrangements and pictures using dried flowers and both she and her daughters arrange them.

Mrs. Rohrer enjoys hunting occasionally. She bagged one deer but she said she would never do that again. Her husband loves to hunt for small game around home and is part of a hunting camp in Tioga County where he has shot several deer and a black bear as well as small game. Two years ago he spent two months in Alaska visiting his brother.

Mrs. Rohrer gives her theme song which she says has always been an inspiration for her and she sings it whenever she gets a chance:

How Wonderful

I walk at night beneath majestic skies;
And know behind them is a God all wise
Who pinned all stars, each in a lonely place,
Then wrapped them in the darkened robe of space.

I scan the heavens with rapture in my soul
And wonder how a God who made the whole
Could ever fix His thoughts on one like me,
And give His Son to die upon a tree.

When I awake, I know God has not slept
For watch o'er me so faithfully was kept.
A fuse of lovely color blinds the eye.
And fills my heart with love for Him on high.

The glorious sunset draws me close to heav'n;
I think of Him whose life for me was giv'n
Great longing comes to me when twilight falls,
For heaven's home, from there my Saviour calls.

O Lord, My God, how wonderful Thou art
To make our world and satisfy man's heart.
With humbled pride before my God I bow,
How wonderful, how glorious Thou art.

Mrs. Rohrer says "It's important for me to feel that what I am, the Lord made me."

Mrs. Rohrer loves to cook and does a lot of entertaining. The Saturday before Christmas she and her husband entertained friends for a carol sing and testimony service in their home. She says she serves food that is easy to prepare so that she can enjoy the company. She offers some recipes which are seasonal and especially apropos when apples are so plentiful this fall. She served the mulled cider for the carol sing.

Mulled Cider

Combine:
1 cup brown sugar
½ teaspoon salt
1 gal. cider
Tie in a cloth:
2 teaspoons whole all-spice
2 teaspoons whole cloves
6 inches stick cinnamon

Add to cider. Slowly bring to a boil. Cover and simmer 20 minutes. Remove spices and serve hot.

xxx

Apple Butter

8 cups apple sauce
4 cups sugar
4 teaspoons cinnamon
1½ teaspoons ground all-spice
1½ teaspoons ground cloves (can be made without cloves)
2 cups cider

Bake at 350 degrees for 3 hours, in a roast pan. It should cool on a dish without leaving rim of liquid. One peach basket of apples makes 5 batches. 3 batches yields 12 pints.

Apple Season Recipes

Apple season is now in full swing and many Pennsylvanians are heading to the numerous orchards all over the state, to either pick bushels of the fruit or buy processed products. Because of the popularity of apples we've decided to share some interesting recipes with our readers. The following recipes were provided by the Pa. Apple Marketing Program.

Apple Green Bean Eden

My favorite way of serving apples and beans, an unusual combination. It is delicious with ham.

1 lb. cooking apples
1 tsp. salt
2 tbsp. light cream
1 lb. fresh green beans or 2 9-oz. packages of frozen beans (French Style)
1 tbsp. sugar
2 tbsp. butter or margarine

Peel and slice apples. Wash and cut up beans. Cook beans in a pan of rapidly boiling salted water until almost tender and the water is almost gone. Add sugar and apples. Put on lid. Cook 5 minutes and add butter and cream, mixing lightly. Serves 4-6.

Apple Chutney

3 lbs. green apples, peeled and chopped (6 cups)
4 lbs. onions peeled and chopped (8 cups)
4½ cups brown sugar, (2 lb. box)
1 lb. seeded raisins or equivalent
cut up prunes
2 tsp. ginger
2 tsp. powdered cloves
3 tsp. cinnamon
3 tsp. salt
3 tbsp. molasses
Dash cayenne pepper

Combine all ingredients in a large kettle, and simmer uncovered for about 2 hours, stirring occasionally or until mixture becomes thick and dark. Pour immediately into hot sterilized preserve jars and seal immediately. Makes about 6 pints.

Chutney is oriental in origin. This spicy mixture is used as a condiment or accessory to garnish all meat, fowl, game and other foods.

xxx

Apple Indian Pudding

5 cups milk
one-third cup corn meal
½ cup molasses
1 tsp. salt
1 tsp. ground ginger or ginger and cinnamon mixed
1 cup sliced apples

Scald 4 cups of the milk, pour slowly over corn meal; cook over hot water 20 minutes, stirring constantly. Add molasses, salt and spices, apples, turn into greased baking dish of 1½ qt. capacity. Pour remaining cup of milk over top; bake in slow oven (325 F.) about 2 hours without stirring. Serve with light cream, hard sauce or ice cream. Makes 6 servings.

xxx

Apple Sweet Potato Salad

1½ cup diced apples
1½ cup diced celery
1 cup orange sections
Cooked fruit dressing
1½ cup diced, salted, cooked sweet potatoes, cold
½ cup salted peanuts, chopped
Watercress or lettuce

Combine potatoes, celery, apples, orange, and peanuts with enough dressing to moisten. Serve on watercress or lettuce. This is nice with ham.

Fruit Dressing — 1 tbsp. cornstarch, 4 tbsp. sugar, ¼ tsp. salt, 1 cup pineapple juice, juice 1 lemon, juice 1 orange, 2 eggs beaten, 1 cup whipped cream. Thoroughly mix cornstarch, sugar, and salt. Add fruit juices. Cook in double boiler until thick. Add eggs and cook 5 minutes, stirring constantly. Cool. Add whipped cream just before serving. Serves 6-8.

Mincemeat-Apple Crunch Bars

1½ cup chopped apples
¼ cup granulated sugar
¼ cup water
1½ cup mincemeat pie filling
½ cup chopped nuts
1 cup brown sugar
¾ cup margarine or butter, softened
1½ cup flour
½ tsp. soda
1 tsp. salt
1¾ cup rolled oats

Filling: Combine apples, ¼ cup sugar, and water in a saucepan. Cook over low heat, stirring constantly for about 10 minutes. Remove from heat. Stir in mincemeat pie filling and nuts.

Crust: Mix 1 cup sugar and margarine or butter thoroughly. Sift dry ingredients together; blend in sugar-margarine mixture. Mix in rolled oats. (Use hands if necessary). Press half of mixture over bottom of a greased oblong pan, 13x9x2. Spread filling evenly over "crust." Top with remaining mixture. Pat slightly.

Bake 20-25 minutes in a preheated 400F. oven. While warm, cut in bars and remove from pan. Makes about 2½ dozen 2x1½ inch bars.

Green Tomato-Apple Pie

3 cups think, peeled apple slices
2 cups skinned, quartered and thinly sliced green tomatoes
two-thirds cup brown sugar, firmly packed
one-third cup granulated sugar
2 to 3 tbsp. flour
½ tsp. cinnamon
⅛ tsp. salt
2 tbsp. butter
Pastry for a 2-crust pie

To peel green tomatoes easily, place in boiling water. Let stand 2 to 3 minutes or until skins can be slipped off.

Combine tomatoes, apples, sugars, flour, cinnamon and salt. Place in a pastrylined 9" pie pan. Dot with butter.

Adjust top crust and flute edges, cut steam vents. Bake in hot oven (425 F.) 50 to 60 minutes. Makes 6 to 8 servings.

Junior Cooking Edition

Let Youngsters Cook

We've really appreciated all the recipes that our junior readers have been sending in. It shows that there is a lot of interest in cooking by these young people and their families. While any activity around the house is a good learning tool for youths, it is especially interesting for girls and boys to learn the responsibility of cooking and baking.

Crackerjack Cookies

1 cup butter
1 cup brown sugar
1 cup white sugar
2 eggs
2 teaspoons vanilla
1½ cups flour
1 teaspoon baking powder
1 teaspoon soda
¼ teaspoon salt
2 cups oatmeal
1 cup cocoanut
2 cups rice cereal

Cream butter well and blend in sugars, beat in eggs, add vanilla, sift flour, baking powder, soda and salt together and mix in. Stir in oatmeal and cocoanut. Fold in cereal by hand. Drop by teaspoons on greased baking sheets. Bake at 350 degrees for 10-12 minutes.

Suellen Eby
Greencastle, PA

xxx

Crispy Apple Bars

1 cup flour
1 cup brown sugar
1 cup rolled oats
½ teaspoon soda
½ cup butter
2½ cups sliced apples
2 tablespoons butter
½ cup sugar

Combine flour, soda, brown sugar and oats. Add butter and work with a fork until crumbly.

Arrange half of this mixture in a greased 7 x 11 inch baking pan.

Spread thinly sliced apples over this layer, dot with butter and sprinkle with sugar. Cover with remaining crumbs.

Bake at 325 degrees for 45 minutes or until nicely browned. Cut in squares and serve with whipped cream.

Mary Hoover

xxx

Pumpkin Bread

3 cups sugar
1 cup salad oil
4 eggs
1 teaspoon cinnamon
1 teaspoon nutmeg
1½ teaspoons salt
3 cups flour
2 teaspoons soda
1 cup pumpkin
two-thirds cup water

Mix sugar and salad oil together. Add the eggs and stir. Then add remaining ingredients. Bake 1 hour at 350 degrees.

Mary Glick
Age 15
New Providence, PA

xxx

Pineapple Salad

1 large can pineapple cubes
2 oranges
24 small marshmallows
1 cup nuts
1 cup whipped cream or whipped topping
2 tablespoons flour
2 eggs
½ cup sugar

Drain juice from pineapple and heat. Add sugar, flour, eggs and cook until thick. Cool then mix in remaining ingredients.

Lydia Beiler
Paradise, PA

xxx

Red Beet Chocolate Cake

1½ cups sugar
3 eggs
1 cup salad oil
1½ cups red beets (cooked and grated)
2 tablespoons cocoa
1¾ cups flour
1⅛ teaspoon soda
½ teaspoon salt
1 teaspoon vanilla

Bake at 350 degrees for 30 minutes.

LADIES, HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Preventing Mistakes In Home Remodeling

Remodeling can add new living space, improve the livability of existing space, and increase the market value of your home. Or, it can cost more than the necessary amount of money and add little value. Careful advance planning makes the difference.

To help avoid remodeling mistakes, ask yourself the following questions: Is your home large enough to meet the needs of your family or is an addition really necessary? If the required addition is a major one, would a different house be a better investment? This consideration is especially necessary if the addition would tend to increase the size and value of your home too much in relation to surrounding homes. Will the zoning ordinances of your community allow an addition? Will the remodeling add to the appeal and be a cheerful, inviting part of your home? What are the main flaws and the best points of your home? What aspects of your home do you want to preserve? Remodeling should help to correct or eliminate existing flaws.

Prepare adequate plans in advance of beginning any remodeling. A simple sketch may be adequate as long as it includes all essential details and specifications. Preparing plans in advance will aid you in selecting a contractor and getting estimates that are more precise. Ask several contractors to submit estimates for the work to be done. Plans can also help to prevent disagreements, misunderstandings, and even lawsuits between you and the contractor.

Strive to save money but don't sacrifice quality. It's usually best to spend more for flooring, wall paneling, and a new furnace than to buy the lowest cost items. A little step up in initial price will mean a bigger step up in the quality you get.

Check local zoning ordinances to be sure your planned addition is within prescribed regulations. Zoning usually lays down rules for such things as maximum building height, allowable types of buildings, and the minimum setback of a structure from its property lines.

Your plans may involve a minor zoning violation. If so, you can appeal to local authorities for a variance - permission to not specifically comply with the ordinances - which will permit you to go ahead. If you build an addition that violates a zoning regulation without first getting a variance, you might be compelled to tear it down at your own expense.

Your building plan must also conform to local building codes which set minimum standards for safety and health. Local housing codes might also specify the minimum standards for a room based on its intended use. If you are issued a construction permit, it usually means your plans satisfy applicable codes. Call your building inspector if you're in doubt about any part of the code.

Grange cookbook published

The National Grange is publishing a Bicentennial Year Cookbook which will be seen for the first time at the Grange's national convention, Nov. 10-18 in Columbus, Ohio.

Mrs. Jenny Grobusky, Director of Women's Activities, said the 304 page book will be off the press Nov. 1 and copies shipped directly to the convention site where they will go on sale Mon., Nov. 10.

The book contains 1,200 family-tested recipes and were selected from over 5,000 submitted by Grange members all across the country. Many of the recipes are over 100 years old and they are all from "scratch." Mrs. Grobusky said the National Grange has already received nearly 5,000 advance orders.

The book also contains many color photographs and a section of recipes for diabetics. It has a special section of "Recipes from friends in the Nation's Capital," including ones from Mrs. Gerald Ford and Mrs. Nelson Rockefeller.

Mrs. Grobusky said Grange women wanted their participation in the nation's Bicentennial to result in a "worthwhile and beneficial project." She said, "We feel a cookbook which promotes the use of American agricultural products and at the same time, preserves for posterity, some of the old-time 'receipts', is a very worthwhile contribution to the Bicentennial celebration."

Persons interested in purchasing the cookbook ($5.00) should contact a local Grange or write to the National Grange, 1616 H St. NW, Washington, D.C. 20006.

Know Where the Activities Will Be?
Read the Farm Women Calendar.

Farm Women Societies

Society 22

Society of Farm Women held their September meeting at Goodwill Industries. Following a guided tour of the Industries, refreshments were served.

Roll Call was "A Sign of Fall" beginning with the letter of our first name. We were reminded to bring our dues in an envelope to the next meeting. Mrs. Clair Witmer read a letter from the Society's adopted daughter from Guatemala. Names were exchanged for our Christmas Party. We were asked to give a home made gift.

Mrs. Lester Landis named the Program Committee for the coming year. They are Mrs. Cora Frymyer, Chairman; Mrs. Clair Witmer; Mrs. Jay Landis; Mrs. Ralph Martin; Mrs. William Weller; and Mrs. Cloyd Wenger.

The next meeting will be a Day Tour, starting at 10:15 a.m., October 14 at the Ephrata Cloister.

Society 4

Farm Women Society 4 held a meeting September 27 at the home of Mrs. Carl Siegrist with Mrs. Norman Siegrist as co-hostess.

After refreshements the meeting was opened by members singing "The More We Get Together."

Mrs. Charles Shellenberger shared devotions by reading Matthew, Chapter 6. A poem by Ellie Payne and giving prayer.

Roll Call was My Green Thumb. Each member brought a favorite plant or flower arrangement and told something or explained about the item they brought.

October 25 - will be our next meeting. The place is Landis Valley Museum. The time is 1:30 p.m. Meet at red brick administration building. Our women are asked to bring dues along to this meeting. Also bring articles for the Needlework Guild at this time. Mrs. Alvin Musser is our representative for the Needlework Guild.

Homemakers Annual Christmas Program will be held at the Farm & Home Center, November 13 - 10:30 a.m. Program will be on "Holiday Foods."

New officers elected: Treasurer - Mrs. Robert Bushong; Secretary - Mrs. Charles Newcomer; Delegates - Mrs. Ewdin Yeaglin, Mrs. Edith Musser.

Mrs. Galen Brandt was in charge of the program. She spoke on arranging flowers and gave demonstrations.

Society 13

Society of Farm Women 13 met at the home of Mrs. Robert Bomberger, New Holland and Mrs. Bomberger led devotions and Mrs. Ruth Hyatt presented a program on Dolls entitled "The Wonderful World of Dolls."

The nominating committee headed by Mrs. William Bard announced the following officers for 1976: President - Mrs. Floyd McClenaghan, Vice President - Mrs. Gordon Reitzel, Secretary - Mrs. William Schroeder, Corresponding Secretary - Mrs. Robert Sayres, Treasurer - Mrs. John Denlinger.

Societies 13 and 14 will entertain the guests at Conestoga View November 20.

Society 13 will be guests of Society 27 on October 28 at St. Mark's Methodist Church, Main Street, Mount Joy at 7:00 p.m.

The next meeting will be held November 14 at the home of Mrs. John Denlinger, 28 Greenfield Road and Mrs. William Schroeder, Lancaster, will serve as co-hostess.

BETTER 'N BEN'S — THE FIREPLACE STOVE

Better n Ben s is the most exciting and innovative breakthrough in woodburning stoves since the Franklin Uniquely but simply designed Better n Ben s is placed directly in front of the fireplace opening The combined stove and fireplace cover panel is securely and safely fastened in minutes so the stove utilizes the existing fireplace flue It will burn seasoned wood throughout the night
Homeowner reports on this new stove cite up to 60% savings in fuel oil costs and the kilowatt consumption in electrically heated homes cut more than half
Better n Ben s is attractive in your home and is made of sturdy long life heavy black iron that radiates heat well It has a broad top to provide a large cooking surface Fully guaranteed

Berks Co. Society 4

The 15th anniversary of Berks County Society of Farm Women of Pennsylvania Group 4 was celebrated with a dinner at Stahl's Seafood and Steak House. Mrs. Charles Taylor who arranged the affair honored the first president Mrs. Alfred Harrison by placing a silver crown on her head as she read the report of the first meeting of the group. Each past president in turn was crowned by Mrs. Harrison as important events during their term of office was recalled. Past presidents were Mrs. Harrison, Mrs. Taylor, Mrs. Lester Kulp, Mrs. Jacob Rothenberger, Mrs. Raymond Horning, Mrs. Paul Becker, Mrs. James Bechtel, Mrs. Harold Good and Linda Taylor who is presently serving. Each received a yellow dahila from Mrs. Taylor's garden. Door prizes were won by Miss Taylor, Mrs. Bechtel, Mrs. Rothenberger, Mrs. Harrison, Mrs. George Fullerton and Mrs. Roy Youse.

During the business meeting dues for the coming year were paid. Thank you cards from James Bechtel and letters from Hamburg State School Operation Happy Child were acknowledged. Refreshments will be served by the group at the Ironstone Farms Horse Show on October 26. Everyone is asked to help. A donation of $50.00 was made to the County to help defray their cost of the Hamburg State School project.

The next meeting on November 4 at 7:30 p.m. at the home of Mrs. Jean Waldo, Boyertown R4, will be on Christmas Crafts. Each one is to bring something they are making.

Society 19

The Society of Farm Women 19 will meet Saturday, October 18, 1975 at 1:30 p.m. at the home of Mrs. Scott Nissley, Jr., 1400 Nissley Road, Lancaster. Program for the day will be a speaker from the St. Joseph's Hospital talking about the Mobile Cardiac Unit.

Election of officers for secretary and recording secretary will also take place.

November 1, 1975 is the county convention of Farm Women to be held at the Lancaster School of the Bible. Society 19 is responsible for the table decorations at the convention. Members are asked to bring food items to be sold at the Bazzar table at the convention.

Our November meeting is scheduled for November 8, 1975 at 1:30 p.m. at the home of Phylis Newcomer (Mrs. H. Clarence), 1791 Wickersham Lane, Lancaster.

Berks Co. Society 1

For our October meeting held at the home of Joan Haas we had with us Sarah Bell, Home Economist from Met-Ed Co., who spoke on the timely subject "How to save money and energy on your electric bill. These days this is a subject which concerns all of us.

Our president then opened the business meeting. Eighteen members answered roll call by telling how they are trying to save money in these inflationary times. The minutes were read and approved. After the treasurers report all bills were ordered paid.

Our scheduled bus trip to New York City to see the Christmas Pageant is now a reality.

Everyone was reminded about the Game Night at Berks Heim on November 20. We received a Certificate of Appreciation from Berks Heim for volunteer work and help rendered to them during the year.

Sixteen members attended the County Convention held at Kutztown on October 4. Everyone had an enjoyable time. Ruth Walters, one of our members, was elected County treasurer. Our County President Anne Yanos is also a member of Group No. 1.

Our next meeting will be held at the home of Ellen Snyder, where we will make Christmas decorations. After adjournment delicious refreshments were served by the hostess.

Ida F...

This week of October 1975, is the fifth anniversary of my first article in Lancaster Farming newspaper. In comparing Vol. 5 No. 47 to today's copy Vol. 20 No. 47, I am struck by many similarities such as the Market news, mail box markets, and Max Smith's and Doris Thomases' articles. There is an article on the Co. Grange, a local farm market and a report by a co-op leaders telling us "food prices must rise."

The size of the newspaper has grown from 28 pages to 3 times that and covers central and southeastern Pa. The price has gone up one dollar per year but is still a bargain.

It has been a pleasurable experience to write each week and share our farm and family life with the readers. I've made some new friends and received several interesting letters also. Now back to today's writing

xxx

I just ran outside to see a flock of wild geese flying south, and noticed my garden is predominately gold and red as the marigolds sage and cox combs have taken over the flower bed. It is time to analyze this year's garden and consider next year's.

For one thing, I think I'll skip cucumbers as this year I canned over 70 pints and that should last two years. I'd like to try yellow watermelon again, only plant them earlier. Flax will be put in again if only for the novelty and the delicate blue flowers.

This year I tried a new method of growing potatoes. They were simply scattered on loose ground and then covered with straw. Next time the straw should be thicker so none of them get greens skins. And if I could just learn to give the plants more room. This year the cherry tomatoes climbed all over the regular tomatoes and the acorn squash smothered some of the green beans, but it was a good year.

Grange convention nears

HARRISBURG - J. Luther Snyder, master of the Pennsylvania State Grange, will address the opening session of the organization's 103rd annual convention which will be held in Lancaster October 27, 28, 29 and 30.

Delegates from the 598 subordinate Granges throughout Pennsylvania will assemble at 1:30 p.m. Oct. 27, at the historic Fulton Opera House in downtown Lancaster for the formal opening ceremonies. About 2,000 delegates, Grange members and young people who are active in Grange junior and youth programs will attend the four-day convention.

Snyder, who was elected last year to a two-year term, will deliver the traditional Grange master's address at 2:30 p.m. In it, he will review accomplishemnts of the past year and focus attention on future goals and objectives of the state Grange.

Two hours later, the first of a series of policy-making resolutions will be put before the delegates by the Legislative Committee, of which Charles E. Wismer, Jr., of Collegeville, is chairman.

J. Luther Snyder

One of the highlights of Tuesday afternoon will be the initial report on preparations for Pennsylvania to host the National Grange convention in 1979. Sites of the national convention ususally are designated five years in advance, and Pennsylvania's invitation was accepted by the National Grange last November.

This will mark the first time in 42 years that Pennsylvania has been selected for the National Grange convention. The last time was in 1937 when the national session was held in Harrisburg.

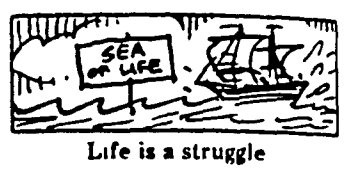
xxx

License Number Needed on Report

Successful archers are reminded by the Game Commission that the number of the hunting license is needed on the deer kill report card which must be filed by successful whitetail hunters.

Prior to last year, the deer kill report card was a part of the hunting license, and the hunting license number was printed on the report card Now, the report card is separate from the hunting license, and the license number does not appear on the report card.

Some report cards have been mailed to the Game Commission by archers who forgot to include the hunting license number on the report card.



Life is a struggle

600 Grangers will receive sixth degree

Approximately 600 Grangers from throughout the state are expected to receive the sixth degree — highest in the Pennsylvania State Grange organization — at sessions in Clarion and Lancaster this month.

The first will be held at Clarion High School at 8 p.m. today (Saturday). The second session will be during the Pennsylvania State Grange convention in Lancaster and will be held at McCaskey High School at 8 p.m. Wednesday, Oct. 29.

Interest in the sixth degree of the order has been unusually high this year because of the National Grange convention in Columbus, Ohio, in November, according to J. Luther Snyder, master of the state Grange.

He said that a great many Pennsylvania Grange members have expressed a desire to receive the seventh degree at the national convention, and to be eligible must have received the state's highest degree.

State Grange officials will participate in the degree conferral at both Clarion and Lancaster. Mrs. John Master of Harrisville R1, Venango County, the state Grange Flora, will preside over the ceremonies.

Thomasville 4-H Gets Trophy

The Thomasville 4-H Community Club was the recipient of a trophy for outstanding club work during the year at the Annual York County Achievement Night.

Club members receiving awards were: Outstanding Junior Coy - Jonathan Myers; Outstanding Reporter - Paul Myers III; Citizenship Boy: Jack Parr; Achievement - Junior: Paul Myers; State Winner in Petroleum Power - Tim Eisenhart; Senior Projects Foods: Bonnie Wire; Petroleum Power: Gary Welsh; Rifle: Jack Parr, and Junior Projects - Leathercraft: Joey Welsh; Bicycle: Jonathan Myers; Petroleum Power: Paul Myers III.

Lancaster farm women prepare conventions

The Executive Board of the Lancaster County Society of Farm Women met at the Mechanics Grove Church of the Brethern to consummate final preparations for the county convention on November 1, 1975 at the Farm & Home Center.

The meeting was conducted by Mrs. Carl Johnson president and the hostesses for the day were Marie Bucher, Society No. 11, Kathryn Horner, Society No. 15 and Jennue Groff, Society No. 16.

For tickets for the county convention, Societies 1 through 15 contact Serena Groff and Societies 16 through 31, Emma Ruth Peifer. Deadline for tickets is October 22.

All members are reminded to donate home baked and canned goods for the bazzar table

The state convention will be held in Harrisburg January 5 and 6, 1976. The Monday session will convene at 10 a.m Monday in the Forum Building. The site for the Banquet will be the Penn Harris Morot Inn. For tickets contact Mrs. Wilbur Erb, Harrisburg R5, Penna. 17111. Enclose check ($6.25 per person) for number of tickets and self-addressed enevelope. Deadline for tickets is January 2, 1976.

Richard appointed

Mr. Victor E. Richard, Ephrata, has been named Loan Officer in the Lititz Office of Farmers First Bank

A graduate of the Ephrata High School, he joined the staff of Farmers First in 1973 as an adjustor in the loan department. Richard is a member of the Lancaster Chapter, American Institute of Banking and enjoys photography.

'When the frost is on the pumpkins . . .'

"When the frost is on the pumpkins, fall is almost by; when the frost is on the pumpkins, winter's almost nigh . . ." Selecting a pumpkin for a jack o'lantern or spicy pie seemed like an overwhelming task for young Paul Krieg, son of Farming editor, Dieter Krieg. Paul, who is 3, had only one word for all the pumpkins and that was "wow." The picture was taken at the Thomas Farm Market below Lititz on Rt. 501. Glenn Thomas, owner of the market, noted that pumpkins were in high demand for the fall season.

Country Corner

Returning to the farm is a popular trend

By Melissa Piper

A recent announcement made by agricultural officials, noted that of the large amount of farm land being sold in the country today, a large percentage of it was maintaining its farm status.

There are many reasons sited for this trend but one main reason seems to be the overwhelming desire for many to return to the country instead of choosing urban life.

While some of the farms are being grabbed into corporate operations many are still bought by those people wishing to have a few acres on which to raise their family and enjoy life.

While the trend is an interesting one, it has puzzled many economists as well as psycologists who cannot seem to understand just what mystic is urging people to the "land."

No doubt there are many reasons, but I for one believe that more than anything else, couples feel that there's no other place to bring up a close family than down on the farm.

After growing up on a farm, it's difficult to understand what it must be like to do so in a city or suburban surrounding. The life seems so much different as in the story of the city and country mice who decided to exchange places for a few days. For what seemed quite exciting to the country mouse seemed rather dull for the city relative and vice versa.

I grew up without the luxury of a 10-speed bike but thought that having a pony made me pretty special in the community. And while my classmates went home to watch television every night, I found myself quite occupied with feeding the pigs, taking Kelly, my German shepherd, for a walk and helping around the barn.

On Monday mornings when the other kids talked about their weekend activities I just couldn't understand they thought that mine were rather dull. For raking leaves, gathering wainuts and taking hikes with my father had surely occupied my time in a special way.

Perhaps growing up on a farm wasn't that glamorous in those days but the attitude has certainly changed. One farm women recently commented on the principal in this matter.

"When we went to school, everyone looked down on you if you came from a farm. But nowadays, if you say you come from a farm all the kids say 'wow' and hope to be invited for a visit."

I for one certainly hope that the trend to keep farmland in the business of farming can stay around a little longer. I've seen so many housing complexes rise from the fertile farmland that it makes one a little sad. Growing up on a farm may carry some responsibilities with it but a respect for the beauty and bounty of the land is a special idea to treasure.

Apples and autumn go together well

Autumn and apples go together, along with the turning of leaves to glorious shades of red, gold, and orange, and the crisp, tangy weather that presages winter. And this fall is the perfect time to try the many varieties of apples available, as the Northeastern market news offices of the Agricultural Marketing Service (AMS), U. S. Department of Agriculture (USDA) are reporting heavy seasonal supplies.

There are many varieties to choose from: Some are better for eating raw, while others are more suitable for cooking. The crisp, juicy McIntosh and the firm Delicious, Golden Delicious, and Winesaps are perfect for eating out of hand. Cortlands made wonderful applesauces, and the Roman Beauties are best suited to baking. There are many other varieties available, and you should check to see what is in supply in your area.

What should you look for when choosing apples? They should be firm, crisp, and well-colored. A lack of color indicates a lack of maturity which, in turn, indicates poor storage ability, texture, and flavor.

Try to avoid apples that are overripe, which is indicated by a yielding to slight pressure on the skin and soft, mealy flesh. Freeze is indicated by bruised areas, and should be avoided. Irregularly shaped tan or brown areas, however, indicate scald, and this may not seriously affect an apple's eating quality.

Homemade applesauce is a rare treat, and a perfect dessert for any autumn or winter meal. Make it in large quantities, as it keeps for months after being cooked. Try the following recipe:

APPLESAUCE

3 lbs. Cortland apples
1 lemon
2 tablespoons dark brown sugar
1 teaspoon cinnamon
1 1-lb. can whole cranberry sauce

Wash and core apples; cut into quarters. Put into large pot. Sprinkle lemon juice over each layer to prevent discoloration. Cover with water to two-thirds the height of the apples. Bring to boil, cover, reduce heat, and cook 10-15 minutes. Do not allow apples to get mushy. Mash in pot.

Put mashed apples through a strainer. Add last three ingredients and mix well. Chill before serving.

From the apple industry comes word that the fibrous texture and the non-adherent nature of the fruit make the apple a natural aid in cleaning the teeth. Gums, teeth, and facial muscles all come into play for some healthy exercise when apple munching.

That old adage of "An apple a day . . ." is adding virtues to the fruit that says "Smile."

The youngest dairy princess at the Manheim Fair last week was Melissa Adamire of Mount Joy R2. Although only two years old, she was an enthusiastic, talkative, and friendly little helper to her parents, Mr. and Mrs. Russell Adamire, Jr., who showed several Holsteins at the fair.

News service for apple growers

HARRISBURG — The Pennsylvania Department of Agriculture has begun a news service for apple growers to keep them informed of current market prices, it was announced recently by Agriculture Secretary Jim McHale.

McHale said the price information is available 24 hours a day through the use of a code-a-phone in the department's Bureau of Markets. The number to call is 717-783-8394.

The apple market news service which began Sept 29 is being run on an experimental basis and is scheduled to end Nov 26

Ray Reiter, fruit marketing specialist for the Bureau of Markets, said if the service proves successful, it will be made available annually during the apple season. A similar peach marketing news service has been available for the past four years. Its popularity with growers and shippers spraked the idea to attempt an apple news service.

Each Monday and Thursday morning, Reiter obtains prevailing prices from cooperating growers and shippers in the major Pennsylvania apple producing areas and then tapes the information for the code-a-phone. Reiter also prepares a weekly summary of apple prices to be mailed to interested farmers.

Broiler placements increase 33 percent

Placements of broiler chicks in the Commonwealth during the week ending October 4th were 1,408,000. The placements were 33 percent above the corresponding week a year earlier, and 4 percent above the previous week. Average placements during the past 10 weeks were 9 percent above a year earlier. Settings for broiler chicks were 2,019,000 - 7 percent below the previous week but 9 percent above the comparable period a year earlier. The current 3-week total of eggs set is 14 percent above the same period a year ago. Inshipments of broiler-type chichs during the past 10 weeks averaged zero compared with 4,000 a year ago. Outshipments averaged 204,000 during the past 10 weeks, 8 percent above a year earlier.

Placements in the 21 States were 46,502,000 - 14 percent below the previous week but 7 percent above the same week a year earlier.

Average placements during the past 10 weeks were 10 percent above a year ago. Settings were 66,718,000 - 4 percent below the previous week but 18 percent above a year earlier. The current 3-week total of eggs set is 15 percent above the comparable period a year ago.

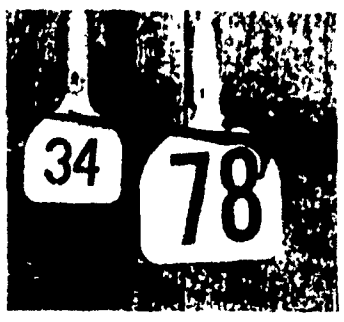
EAR TAG

Modern Farm has introduced a new high performance ear tag that is available for a fraction of the price of comparable tags. According to the manufacturer, the Modern



Tag has over 16 square inches of writing-numbering surface which makes it the biggest and most visible tag in the industry. The tag is also unusual because of a soft, flexible, no-snag design which provides both lifetime retention and durability in adverse sun and weather conditions.

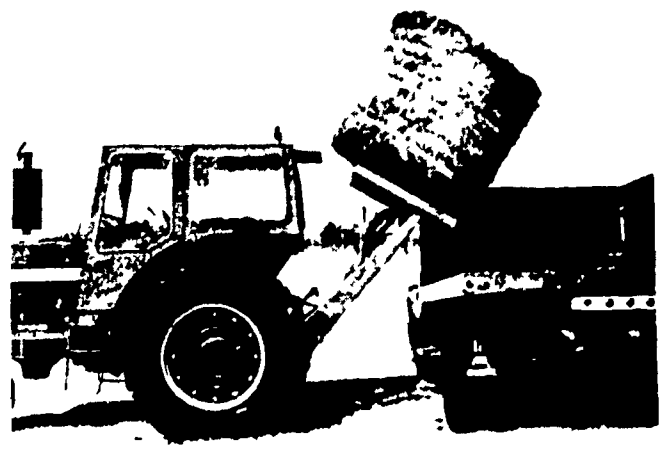
The tag is inserted by a unique one-piece molded trigger grip applicator that has no cutting edges. Instead, in one quick motion, the applicator makes a small hole and smoothly stretches the skin over the tag head for an immediate snug fit. As a result, this non-cutting, non-tearing design reduces bleeding, irritation, and animal stress, as well as increases tag retention.

Samples and information are available from Modern Farm, Department 287, Box 1283, Cheyenne, Wyoming 82001.

BUCKET LOADER

A new hi-lift frame by Graves Mfg. Co. features a pair of boom arms with a standard 8" actuating cylinder, which mounts direct to any category-2 or 3-point hitch and will take a spike-frame or fork-frame for loading and transporting big bales, or will mount a five-foot loader bucket which can be tilted 135 degrees.

As a bale-loader, the Graves Hi-Lift Frame can pick up big round bales at ground level, then transport them or unload onto truck bed or in two-high stacks. Loading is accomplished by lowering the forks or spike into a horizontal position, backing into the bale, then raising it to an upright position for travel. The procedure is reversed for unloading.



The bucket attachment can be put on in place of the fork-frame in just a few minutes and accomplishes many loading tasks such as feedlot cleanup, sand and gravel, etc.

For free literature and prices, write to: Graves Mfg. Co., P. O. Box 648, Clinton, Okla. 73601.

ALL METAL CALF STALL

An all metal calf stall, designed to keep calves clean and in the type of environment a new born calf needs, is now being produced by Martin Manufacturing Company, Myerstown RD3, Pennsylvania.

Many diseases are spread by one calf licking another. With the new Martin Calf Stall a calf cannot make contact with the one in the stall next to it.

Keeping this new calf stall clean and sanitary is very easy with the one-piece, steel side wall construction and a grid-type floor that is completely removable for fast cleaning. Some users of the new calf stall find it convenient to have an extra removable floor for each stall, so that the flooring can be washed and placed in the sun before being used in the stall that will then be occupied by a new calf.

The Martin Calf Stall comes complete with feeding buckets and a removable hay rack. Like the well-known Martin Free Stalls and Gravity Boxes, this new Martin Calf Stall is attractive and durably built to perform and last. Its features provide strength, efficient and easy cleaning for good sanitation and calf comfort. Use of the Martin Calf Stall will enable many dairymen to save many more calves and do more to help them realize their full potential.

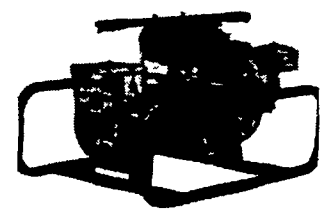
For information contact local Martin Manufacturing Company dealers or the Martin Manufacturing Company, Myerstown RD3, Pennsylvania — where this new product is on display.

POWER PLANTS

MILWAUKEE, Wis. — Four portable power plants have been introduced by the Allis-Chalmers Corp. Agricultural Equipment Divisions for producing electricity on the farm or at a work site. They can also be used to provide standby power at home or to light a campground.

The units are revolving field alternators, producing power in a stationary element which is conducted to outlets through solid connections. This type of unit eliminates the need for AC slip rings and brushes or DC commutators and brushes which are normally high replacement parts in generators.

The four models are the GP-2, 2000 watt, 120 volt unit; the GP-3.5, 3500 watt, 120-240 volt unit; the BP-5, 5000 watt, 120-240 volt unit; and the PP-20, 20 KW continuous-35 KW surge, 120-240 volt unit. The GP-2 utilizes a five hp engine, while the GP-3.5 uses an eight. The BP-5 is pulley driven by a separate remote



engine or a lawn and garden tractor, while the Model PP-20 fits a standard 540 PTO spline.

For additional information, contact the Allis-Chalmers Corp. Agricultural Equipment Divisions, Parts Merchandising, Box 14329, West Allis, Wis. 53214.

FARM SEED BOOK

Hoffman Seeds, Inc., Landisville, PA, has issued its new 1976 catalog of farm seeds. The 77-year-old company, based in Lancaster County, concentrates on crops such as hay, pasture, silage and Funk's G-Hybrid corn.

The catalog consists of 32 pages printed in full color, and is divided into sections for comparative study of new and improved varieties. One section, for instance, is devoted to alfalfa varieties, another to hay and silage formulas, still another to corn varieties for grain and silage.

Several unique charts are included to aid farmers in making the proper variety selection for soil and climate conditions, and the intended use.

Copies of the catalog may be obtained by writing to J. R. Godshalk, Hoffman Seeds, Inc., Landisville, PA 17538.

if you're a farmer, we have the money you need.

As a farmer, you know that today's agri-business proves that it really takes money to make money You're constantly updating equipment investing in stock and supplies improving your buildings And the Friendly First FARM LOAN CORPORATION has the money you need

There are advantages to financing your needs with us because

- You can arrange a long-term loan to reduce the size of your payments.
- You can get a loan for any size farm—whether you have 50 acres or even 500
- You discuss your needs with local people who have both farming and banking know-how A talk with our Bob Badger or Darwin Mowery can be helpful with current requirements and they'll also help you plan for the future

Funds are available now Stop at any office of the Friendly First for complete details on this new service that's already helping farmers like you

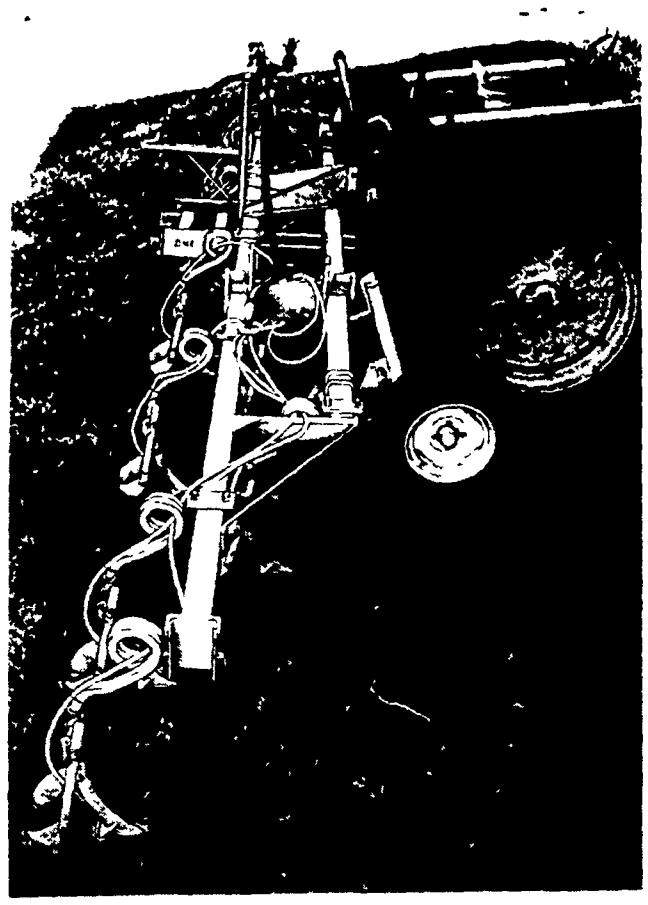
TOOL BAR APPLICATOR

DMI, Inc., Goodfield, Illinois announces the addition to their line of a new 30-foot tool bar anhydrous ammonia applicator called the "Super-Sweep". This model No. DH2413 is designed especially for large acreage farmers with high horsepower tractors who want to apply more ammonia on more acres per day. It is capable of covering up to 20 to 25 acres per hour when using a double tank wagon, or 15 to 20 acres with a single tank wagon.

The DMI "Super-Sweep" is a double bar applicator that is standard equipped with dual regulators and distributors to give even distribution and faster application of ammonia. Other standard features include: hydraulic wing lifts that fold up for traversing gates; 13 coil shanks for 30-inch row spacing; a three-point hitch that fits standard category tractor two and three hitches or fast hitches; dual purpose gauge wheels for depth control and easy conversion to inline transport; heavy-duty telescoping wagon hitch; and exclusive shank clamps that align and hold shanks securely with exclusive shank clamp bolts that have a special slot design to prevent shanks from slipping out.

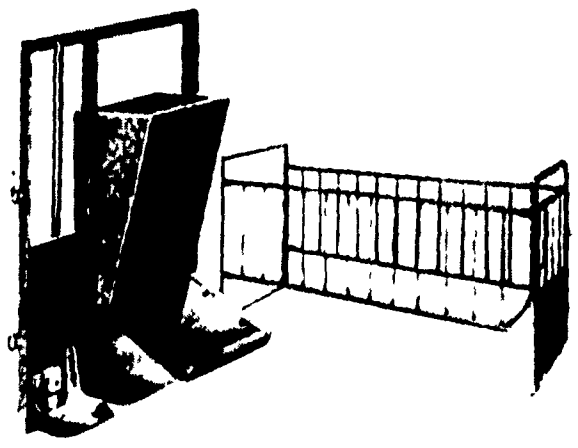
The DMI "Super-Sweep" is made with hi-strength, low alloy, Vanadium content steel, tubular frames and hinge plates. Also, extra heavy gauge steel is used in the 3 pt. hitch plates with high carbon steel wear reinforcements. For further information on the new DMI 30 ft. tool bar applicator contact: DMI, Inc., P. O. Box 65, Goodfield, Ill. 61742.



Farrowing Stall

GOSHEN, Ind - A new Agstar "Space-Saver" Farrowing stall has been announced by Star Agri Products. A saving of $50 per sow in building construction cost is possible with the use of the new model, according to Brad Donahoe, marketing manager.

He explained that two rows of Agstar stalls will fit in a 22-foot-wide building and still allow for adequate service alley width. Two similar stalls with the same amount of sow space, but without the space-saver feeder design, would require a 24-foot building width. A saving of two feet for each pair of stalls and pens (five feet on centers) would mean a total saving of 10 square feet, Donahoe said. At a building cost of $10 per square foot, this saving would be $100, or $50 per sow.



Donahoe credited the new Agstar FS-610 space-saver sow feeder design for the better use of floor space. The feeder provides more feed storage space at its top and inside the stall and narrows toward its bottom. There is no interference with the sow, yet the feeder extends only 2 inches into the aisle.

Another feature of the new Agstar stalls is a choice of a nipple waterer, a new porcelainized steel water cup, or a new cast iron watering cup. A new simplified ordering procedure for farrowing stalls lets the customer order the stall separate from the door. Various doors are available complete with a choice of feeders and waterers.

Slotted aluminum floors built with T-shaped slats are available in two widths, a 12-inch section for the front of the stall and a 30-inch section for behind the sow.

The new farrowing stall is one of over 450 styles and sizes of livestock products now carrying the Agstar name. Formerly the Starcraft brand, Agstar identifies farm equipment with the same craftsmanship on which the company has built a reputation dating back to 1903, said Donahoe.

Complete information on the new Agstar "Space-Saver" farrowing stalls can be obtained by writing to Star Agri Products, Goshen, Ind. 46526.

FOUR VISES

MILWAUKEE, Wis. — Four styles of vises in a variety of models and sizes for almost any workshop application are now available from the Allis-Chalmers Corp. Agricultural Equipment Divisions. The vises include a utility clamp vise, bar vises, channel vises and a special heavy duty vise for machinists.

High tensile grey cast iron provides needed strength, while the bar, channel and machinists vises have replaceable cold rolled steel jaws for added life. The vises

range in weight from less than 10 to 41 pounds, and in jaw widths from 2½ to 5 in. All models of bar and channel vises have pipe jaws, positive locking swivel base and a machined anvil surface.

For additional information, contact the Allis-Chalmers Corp. Agricultural Equipment Divisions, Parts Merchandising, Box 14329, West Allis, Wis. 53214.

Lebanon COUNTY DHIA MONTHLY REPORT

SEPTEMBER 1975

A cow in the herd of Ernest P. Detweiler recorded the highest butterfat production for the month of September. Debbie produced 840 pounds of fat with 20,707 pounds of milk. Second high was Donna in the herd of Raymond Getz. The cow produced 837 pounds of fat and 21,308 pounds of milk.

The herd of Arnold Acres was the top recorder in the herd summary for last month. Second high was Willow Maple Farms.

The Lebanon County Dairy Herd Improvement Association records of tests on county cows with over 600 pounds of fat in September are as follows:

GRAIN CLEANER

Hunter Mfg., Mackinaw, Ill., introduces a new grain cleaner called the Panda Scavenger. The simple, physical design of the Panda Scavenger features: a maximum flow capacity of 1,600 bushels per hour, replaceable wear plates for longer life, and two side access doors for easy servicing and changing of screens.

The heavy duty galvanized construction of the Panda Scavenger also includes: a totally enclosed unit to help fight dust problems, inspection doors located for easy clean out, and a built in grain by-pass which eliminates the expense and trouble of a separate, external by-pass. The Panda Scavenger can be directly attached to the discharge end of an elevator leg with no extension spouting or cantilever required. Baffle construction maintains an even, thin flow of grain over the entire screen areas and produces a tumbling action aiding in the removal of foreign materials from the grain. Two stages of screens assure thorough cleaning of the grain. The unit has a special collection chamber and outlet for fines which may be used for feed or sold for cash.

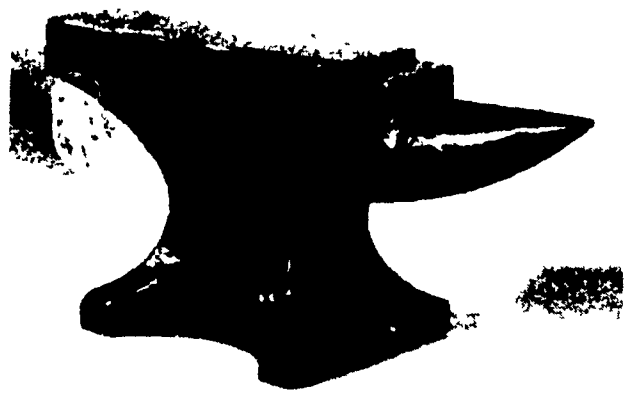
The Panda Scavenger stands 82 inches high, is 44 inches wide, and has a depth of 22 inches. The unit also features grain outlet and inlet opening of 10 x 10 inches and a fines outlet four inches in diameter Corn, bean and wheat screens are available as accessories For further information contact Hunter Mfg , Inc Box 707, [illegible]

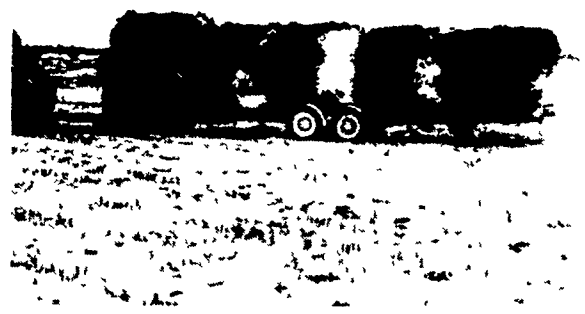
BALE MOVERS

Two new big bale movers designed for hauling three or five big bales at a time from field to storage have been introduced by Farmhand, Inc., Hopkins, Minnesota-based shortline equipment manufacturer. The big bale movers are built for behind-the-tractor field operation One man uses hydraulic power to load or unload bales without leaving the tractor seat

To load bales, the movers are shifted from the transport position to the right side by a hydraulic cylinder. The operator lowers the pickup forks, drives forward under a bale and lifts it onto the bed in one motio without stopping. The bale is lifted on single pintle chain on a six-inch center beam. Controlled by tractor hydraulics, the chain is powered by an orbit motor.

Overall, the five-bale mover is 34 feet long and eight feet wide while the three-bale Mover is 23 feet long and eight feet wide. Pickup forks on both machines are adjustable for five or six foot diameter bales. Two tractor valves are needed to operate the movers.





position without the sides or top being distrubed. Bales can be unloaded from the front of the movers and placed in their original position, or unloaded off the rear after removal of two stakes.

Both movers have formed and welded frames with a to a hydraulic-operated pintle chain that moves it rearward to make room for the next bale. Bales are always hauled on end for safety and stability and to prevent loosening of twine.

The loading and unloading method used allows bales to be lifted from the ground, transported and set down in their original "flat spot" has been introduced by the Allis-Chalmers Corp. Agricultural Equipment Divisions.

The anvils are face ground, polished, heat treated and tempered. The hardened area blends gradually into the main body eliminating internal stress and reducing chances of breakage or failure from chipping edges.

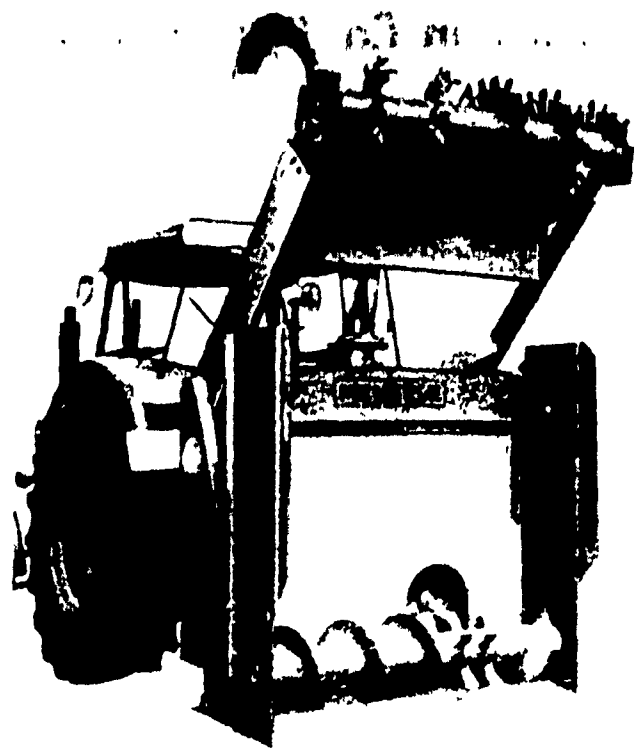
Specifications include weight ranges from 7 lbs. to 210 lbs., overall lengths from 8¼ to 27 in., faces widths 2 to 4½ in. and overall heights from 3¾ in. to 10¾ in.

For additional information, contact the Allis-Chalmers Corp. Agricultural Equipment Divisions, Parts Merchandising, Box 14329, West Allis, Wis. 53214.

PIT SILO UNLOADER

KMN Modern Farm Equipment, Inc. announces the availability of their pit silo unloaders. The Mengele units are fully mounted and operate off the tractor hydraulics.

The two models have working heights of nine feet and 15 feet and are powered from a 540 rmp PTO from a minimum 35 hp tractor. The F-2800 is capable of moving 40 tons of corn-hour or 20 tons of grass while the F-5000 (15 ft.), designed for corn silage, can move 50 tons-hour.



The units also feature safety clutches, heat-treated alloy steel cutting blades, three point quick-action coupler, chain drive (no belts), hydraulic controlled cutting head and rear or side unloading.

The KMN Pit Silo Unloader, F-2800 is capable of cutting through frozen silage.

For more information contact W. J. Bayersdorfer, Vice President - General Manager, KMN Modern Farm Equipment, Inc., Industrial Avenue, Ridgefield Park, New Jersey 07660. (201) 440-8660.

Dairy plant specs revised

WASHINGTON — The U.S. Department of Agriculture announced a revision of the general specifications which plants manufacturing dairy products must meet to qualify for USDA's inspection and grading services.

Officials of USDA's Agricultural Marketing Service (AMS) said that the revision updates the general specifications to reflect changes in dairy plant equipment, facilities, and manufacturing operations occurring since 1967, when the specifications were first issued.

Among the changes made, the revision adds supplemental specifications for plants involved in processing or packaging whey, whey products, or lactose. These byproducts of the cheesemaking process have found increasing acceptance at alternatives to some of the milk solids used in many foods.

Dairy plants must meet the USDA general specifications to be eligible for the grading and inspection services offered to the dairy industry by AMS on a voluntary, fee-for-service basis. Products which can be submitted for inspection and grading include butter, cheese, cottage cheese, evaporated milk, frozen desserts, dry milk and dry milk products, and whey and whey products.

The revision was proposed in the Feb. 12 Federal Register and comments received on the proposal were considered in making the revision.

The revised specifications, including minor changes made on the basis of comments received, were published in the Oct. 10 Federal Register, and will become effective Jan. 2, 1976. Copies may be obtained from the Dairy Division, AMS, USDA, Washington, D.C. 20250.

Four-year-old Bobby Brubaker was snug as a bug in a rug sitting in this tractor wheel at the Manheim Fair last week. It may not have been the most comfortable place to be, but at least it kept him out of the rain and drizzle which hampered most of the Lancaster County fairs this year. Bobby is the son of Mr. and Mrs. Robert Brubaker, Manheim R2.

What's New . . .

Stauffer Brochure Describes Metering Device for Eptam in Water-Runs

A new brochure from Stauffer Chemical Company, "Eptam Herbigation Weed Control Service for Water-Runs," gives detailed information on how to make and use your own constant-flow water-run metering device to apply Eptam herbicide through irrigation systems. Eptam herbicide can be used on alfalfa, almonds, citrus, potatoes, sugar beets, and walnuts.

The brochure includes a flow rate chart for various orifice sizes, in addition to a formula to determine which orifice to use for applying Eptam in your irrigation system.

For your copy of Eptam bulletin No. FS-0534, write: Stauffer Chemcial Company, Agricultural Chemical Division, Dept. KP, Westport, Conn. 06880.

6000 GAL. TANK

Raven Industries is introducing a new 90-inch tank to the agricultural market. The 7½-foot diameter tank will hold up to 6000 gallons of agricultural chemicals.

Like other Raven agricultural tanks, the 90-inch models are made with seamless interiors, as well as in different styles; flat bottom open top, flat bottom dome top and horizontal. The new FRP tanks will ship over the road by common carrier.

The new tanks, designed for on-site portable storage, have a full line of accessories available including an 18-inch or 24-inch quick access manway and three-inch line connections.

For further information and a brochure write or call RAVEN INDUSTRIES, PLASTICS DIVISION, Sioux Falls, So. Dak. 57101. 605-336-2750.

CONSUMER GUIDELINES

If you're buying a tent, buy one with two exits Be sure you can get out one side if the other side is burning

Keep a fire extinguisher in your tent—it may enable you to put out a fire before it consumes the tent and you.

Buying Broilers

When buying a counter-top rotisserie-broiler, choose one that's easy to clean Make sure that all parts come apart for cleaning and that the rack and pan are immersible in sudsy water

Lickin' Good

Nutrena Controlled Release CLS— so different, it's patented

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

What's New . . .

Non-Swirl Grain Shoot

Hunter Mfg., Inc., Mackinaw, Ill., introduces a new concept in grain spouting with the Non-Swirl Grain Shoot.

Hunter's Non-Swirl Grain Shoots feature rectangular galvanized housings in 10 ft. lengths with flanges on both ends, removable covers, Cor-Ten low abrasive liners, and capabilities of spans up to 60 ft. without cantilever trussing. The removable covers allow easy access in order to replace the wear liners without dismantling the spouting. The inner liner is designed with an overlap to eliminate edge wear at the splice.

The new Non-Swirl Grain Shoot is available in 8, 10, 12, and 24-foot sizes with capacities ranging from 3,600 to 25,000 bushels per hour. For further information contact: Hunter Mfg., Inc., Box 707, Mackinaw, Ill. 61755.

Consider for a moment what a hybrid like G-4444 means to hybrids comin down the road

For we took the strongest characteristics of this world record holder and bred them into our new, improved hybrids

Hybrids like G-4321 that beat out ol' reliable "4444" in some areas of the country And G-4949A that produced another record yield of 303 6 bu/acre in the FFA Yield Challenge Program last year

Now, no one knows better than you that there's a lot of stress a crop has to overcome Disease, insects, weather Luck

Point is, if a hybrid can survive, and come through with a world record yield of 306 6 bu/acre like G-4444, it must have something going for it

And since we're breeding that 'something into our family, sooner or later it's gonna end up helping your family

So may be you didn't think the world record yield held by G-4444 meant much But, just remember, one good hybrid leads to another And another And another

Officers elected at Fulton Grange

Officers for 1975-76 were elected at a recent meeting of Fulton Grange 66. They are as follows: Master, Thomas Galbreath; Overseer, Clifford W. Holloway, III; Steward, Harry Baker; Assistant Steward, Arba Henry; Lady Assistant Steward, Peggy Galbreath; Chaplain, Robert Hershberger; Gatekeeper, Frank Scheuchenzuber; Ceres, Mrs. Rebecca Quinn; Pomona, Mrs. Onamae Brown; Flora, Mrs. Doris Hough; Secretary, Mrs. Ruth Ann Wood; Treasurer, Clifford W. Holloway, Jr.; Executive Committee, Everett Kreider; Finance Committee, Thomas Galbreath; Trustees, George Hough and Ambrose Giffing; Pianist, Glenn Hough; Assistant Pianist, Mrs. Freeda Huber; Junior Matron, Mrs. Shirley Galbreath; and Librarian, Mrs. Rose Hanks.

Approximately 60 attended Booster Night, September 22. Mr. James Kegel, Public Relations Director of Pennsylvania State Grange, spoke on the Civil War.

Reader's Corner

TEN MINUTES OF NOTHING

For ten minutes we did nothing. Nothing, mind you. We didn't wash a window, put away a screen, mop a floor, write a letter, talk to a neighbor. We did nothing.

We sat in the sun on the back steps. At high noon. The day was perfect for this time of year. Like a freshly made apple pie, cool at the edges and warm in the middle.

Much happened while we did nothing.

Leaves tumbled off the trees. Some made direct nose dives. Others swirled and whirled on their way down. The seed pods on the mimosa tree rattled as a little breeze went hurrying past. A mockingbird lighted on the chicken house roof and presented a noontime concerto, just for us.

The horses came up from the pasture for a drink, pushing each other around like unruly kids at a water fountain.

Kathleen, the goose, went by, followed by the four ducks and four guineas on their way to the mud puddle for a midday swim and drink.

Tommy, our Newfoundland dog, lumbered around the corner of the house, and, with a sigh, stretched out in the sun. Butterball, bantam rooster, and Tommy's constant shadow, stood nearby, resting on one foot.

For ten whole minutes no phone rang to ask us to bake a cake or inquire the price of hay we have to sell. No car came in the lane.

For ten minutes we didn't do anything. Nothing could have been more pleasant.

Reprinted from a booklet entitled "Down the Road a Piece" by Florence Brown.

Dale Miller wins driving contest

MANHEIM - Dale Miller, Gap R1, piloted his way to first place and a trophy at the tractor driving contest which was held here last week as a part of the Manheim Fair. The contest had originally been scheduled for the Ephrata Fair, but was postponed due to inclement weather.

Miller, a student at Peque Valley High School, competed against a number of other contestants who had previously won contests in their respective districts.

Coming in second in the contest, which was held despite threatening clouds and a drizzle, was Jay Oberholtzzer, Lititz R4. He is a student at Ephrata High School.

Third was Manheim Central's Daryl Wenger; followed by Joe Klein, Peach Bottom, a student at Solanco; and fifth, Linford Weaver, East Earl, from Garden Sport High School.

NASDA elects McHale

HARRISBURG — Members of the National Association of State Departments of Agriculture (NASDA), at their 57th annual convention Oct. 5-9 at Charleston, W. Va., elected Pennsylvania Agriculture Secretary Jim McHale as first vice-president.

L. D. McCorkindale, Arizona's Commissioner of Agriculture, first vice-president for the past year, was named NASDA president.

Other officers elected were John M. Stackhouse, Ohio's Director of Agriculture, second vice-president; and S. Mason Carbaugh, Virginia's Commissioner of Agriculture, reelected secretary-treasurer.

McCorkindale succeeds West Virginia Agriculture Commissioner Gus R. Douglass as president of NASDA.

In accepting the post of first vice-president, McHale relinquished the presidency of the Northeast Association of State Departments of Agriculture (NEASDA), a post to which he was elected at the annual meeting of the 10-state organization in July. John S. Dyson, New York Agriculture Commissioner, assumed the presidency of NEASDA.

As an officer of NASDA, McHale also serves on that organization's board of directors.

NASDA supports an office at Washington, D.C., headed by Executive Secretary William S. Cath, which serves as a liaison between the states and the federal government on matters of agricultural legislation and administration.

Cobb Offers New Broiler Manual

A comprehensive broiler production manual is now available from Cobb, Incorporated, Concord, Massachusetts.

The 56-page guidebook contains detailed information on a wide range of broiler management practices. Topics discussed include: housing space, brooding, feeders and feeding, recommended health programs, lighting and ventilation requirements, and chick quality.

The booklet is illustrated with color photographs and descriptive charts and graphs, and is designed to serve as a technical management guide to profitable broiler production.

Cobb is a subsidiary of The Upjohn Company, and is one of the nation's largest producers of breeding stock for the production of broiler chickens. Free copies of the booklet may be obtained from Cobb Representatives or by writing: "Broiler Manual," Cobb Incorporated, P.O. Box 280, Concord, Mass. 01742.

DURING THE MONTH OF JUNE, 1775, THOMAS JEFFERSON PREPARED A PRELIMINARY DRAFT OF THE DECLARATION OF INDEPENDENCE. HE SUBMITTED IT TO JOHN ADAMS AND BENJAMIN FRANKLIN, WHO SUGGESTED SEVERAL CHANGES IN

WORDING. JEFFERSON THEN MADE A COPY AND PRESENTED IT TO CONGRESS ON JUNE 28. JEFFERSON KEPT THE ORIGINAL IN HIS POSSESSION THROUGH HIS LIFETIME.

Lititz area farms hit by Saturday's tornado

The weather had been unusally beautiful and warm last Saturday, until evening brought with it a freak thunderstorm and tornadoes which ripped through the northern portion of Lancaster County at Brickerville.

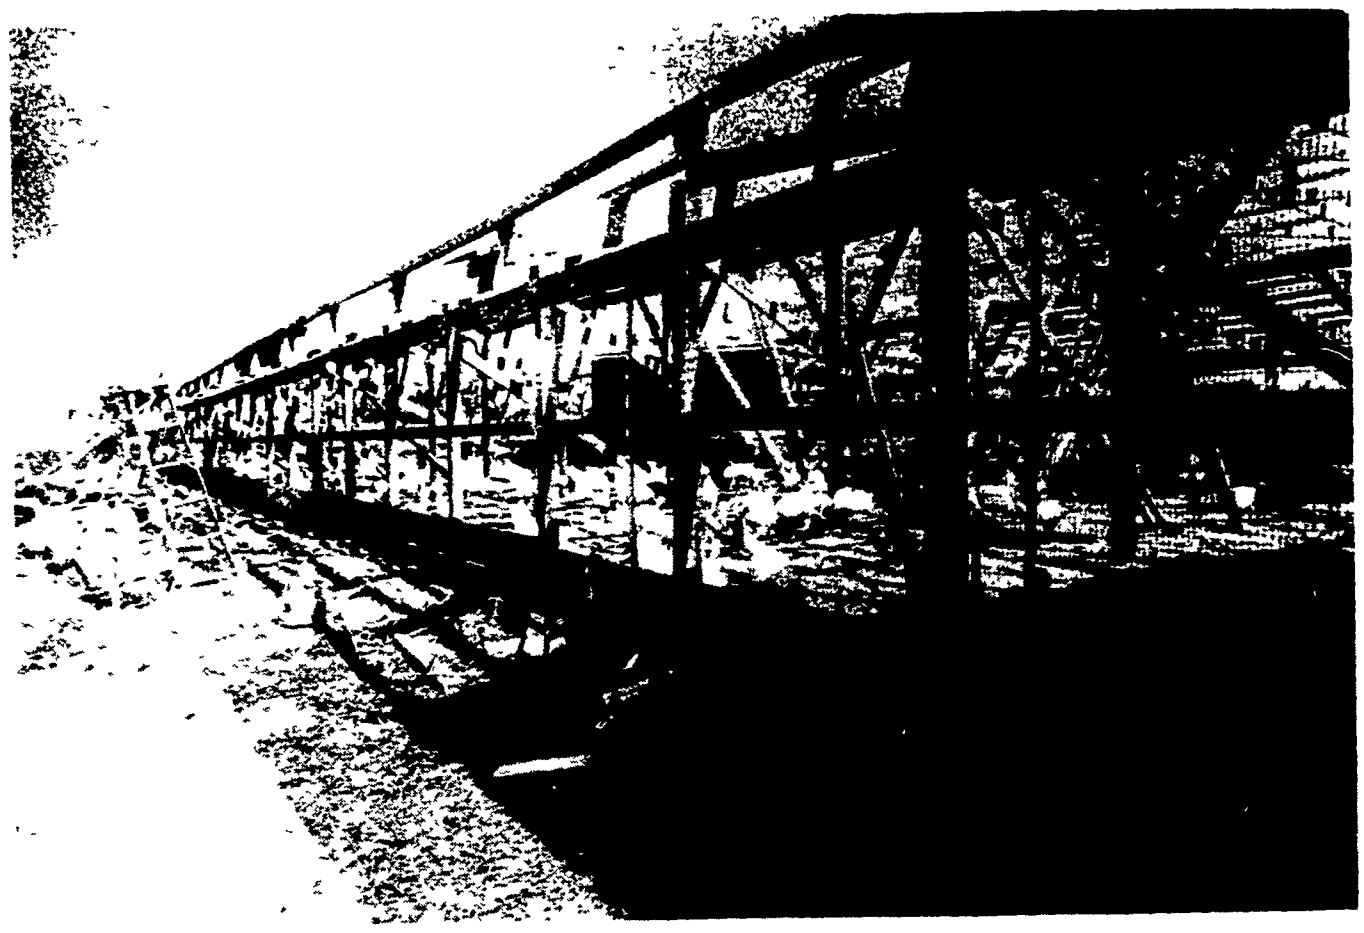
Most of the damage was centered around a small territory between routes 501 and 322 in the Brubaker Valley Area. Early in the week the damage estimates centered around the $400,000 mark and may increase with more reports.

One of the hardest hit farms in the area was the property of H. Landis Martin on Brubaker Valley Rd. Three small buildings were destroyed on the farm as well as the roof being blown off the barn. Martin's neighbors responded quickly to the farm and by Tuesday the barn roof had been replaced.

At the John Sensenig turkey farm Reifsnyder Rd., the tornado took off a large portion of the roof covering the animal pens. With the help of several neighbors and volunteers, the roof was replaced by the middle of the

(Continued on Page 67)

Piles of dirt and debris in the foreground replaced what had been a tobacco shed on the Paul G. Martin farm along Crest Rd., near Lititz before a tornado destroyed it on Saturday evening.



These turkeys on the John Sensenig farm, Reifsnyder Rd., near Lititz, were temporarily without a roof after a tornado destroyed part of their housing last Saturday. By Tuesday afternoon neighboring farmers were ready to finish repairs to the structure.

Me—the farmer.
I'm glad I'm a farmer.
Sometimes I'm angry about being a farmer.
And disappointed. Elated. Puzzled. Worried. And, I suppose, every emotion in the book.
But I'm glad I'm a farmer.
Because I know what I am. And what I feel.
I feel I'm akin to my land and the things that grow on my land . . .
And the sky over my land and the water that falls on it and flows through it . . .
And the livestock that sustains itself upon my land . . .
And the buildings that shelter me and my wife and our children and the machines that help to make my land fruitful.
These are a bone-deep part of me.
As is sweat. Cloudburst. Drought. Repairs. Disease. Heartache. Market losses. And profits. Sowing. Reaping. And a hundred and one setbacks and successes, large and small, that other men may never know. But that I know. And am content with.
Not because farming is easy. It isn't. Or because a farmer enjoys fame. He doesn't.
Or because a farmer like me is a wealthy man. I am not.
It's simply because I know what I am. And I know what I feel.
I wouldn't have me any other way.
Me -- the farmer.

Angus breeders increase use of production records

Economic pressure on the commercial beef cattle industry during the past year brought a decrease in Angus registrations and transfers, but stimulated more interest in herd improvement with a resulting increase in use of Angus Herd Improvement Records (A.H.I.R.), reports Lloyd D. Miller, executive secretary of the American Angus Association.

During the fiscal year ended September 30 the use of A.H.I.R. records increased 11 percent with a total of 105,367 Angus weights reported and processed by the Association. These included 75,400 weaning weights compared with 67,390 in 1974. Yearling weights processed totaled 29,967, up from 27,727 a year ago.

Breeders exercised more selectivity in the purebreds they registered in the American Angus Herdbook. This year's registrations totaled 306,495, a decline of almost 13 percent from 1974. More serious culling of purebred herds and a weaker demand for replacement herd bulls by commercial cow-calf operators because of depressed feeder prices, also alowed transfers of purebreds. Sales of registered Angus peaked at 176,815 head, down from the 231,028 head transferred last year.

During the past 12 months, life membership have been issued to 3,274 new owners of registered Angus. This compares with 4,088 new life members joining the American Angus Association in 1974. New junior memberships were granted to 1,631 young people, 68 fewer than last year.

"All breeds and the entire commercial cattle business have suffered from the recession during the past 12 to 18 months," Miller pointed out. "These are changing times and buyers of foundation beef cattle are demanding more quality and efficiency of production and reporduction. The future looks brighter with some recent improvement in the demand for good Angus bulls and females. More Angus and Angus crossbred feeders are commanding top prices with some feedlots filling up again."

The 10 leading states in Angus registrations during 1975 were: Missouri - 29,560; Iowa - 22,114; Texas - 19,305; Nebrasks - 16,135; Montana - 13,228; Tennessee - 13,001; Illinois - 12,829; Oklahoma - 12,429; Kansas - 11,473; South Dakota - 11,464.

The 10 leading states in Angus transfers were: Missouri - 17,748; Texas - 10,369; Iowa - 10,362; Nebraska - 8,929; Tennessee - 8,877; Oklahoma - 7,659; Virginia - 7,663; Illinois - 7,387; Colorado - 6,961; California - 6,549.

Kennard Henley of Towerview Farm, Cochranville, accepts the first place ribbon for his Ayrshire cow, Kenwoody Maestro's Rosebud. The competition among four-year-olds was held during the National Ayrshire Show at the World Dairy Expo, Madison, Wis., recently. Henley, with a 40-cow Ayrshire herd, enters cows in several classes and in several shows across the country. Presenting the ribbon on behalf of TUCO, Division of The Upjohn Company, which sponsors ribbons awarded at the World Dairy Expo, is Cindy Gehr, Wisconsin Ayrshire Princess.

Grangers select married couple

HARRISBURG - A Chester County couple - Mr. and Mrs. James Steele, of Pocopson - have been named the young married couple of the Pennsylvania State Grange for the 1975-76 year.

They succeed Mr. and Mrs. Glenn Sterner, of Hanover, who will conclude their year of service at the National Grange convention in Columbus, Ohio, November 9-18. There, they will compete for the national young married title. The Steele's will compete for similar honors at the national convention in New Jersey next year.

Steele owns and operates a dairy farm at Pocopson with the assistance of his wife, the former Lois Buffington, and they have a three-year-old son, Michael James.

Members of Kennett Grange at Kennett Square, James is a past master and is now serving as assistant steward, and as a member of the executive, agricultural and legislative committees. His wife is overseer and youth chairman of the Kennett Grange.

Beef cow numbers adjusting

DENVER, Colo. - Cow slaughter is continuing at a record high level, and it now appears that the nation's total cow herd on January 1, 1976, will be down from a year earlier.

This was pointed out by the American National Cattlemen's Association in a monthly report on cow herd size.

ANCA cited government reports showing that cow slaughter in August totaled approximately one million head. This compares with a previously projected total of 840,000 head for the month, and with a total of 636,00 head in August, 1974.

For the first eight months of 1975, cow slaughter totaled approximately 6.67 million head. This represented an increase of 625,000 head over the previously projected total of 6.04 million for the January-August period, and it represented a 54 percent increase over a year earlier.

The projections to which ANCA referred are monthly and annual cow slaughter rates previously estimated as needed during the remainder of 1975 and on through 1976 to put cow numbers in better balance with demand. (Also see accompanying chart.) The estimates were made by economists with Cattle-Fax, the market analysis service sponsored by ANCA.

"While cow slaughter has been running sharply higher than a year ago," NACA said, "the rate of increase during the remainder of 1975 cannot be expected to continue. This, of course, is because of the large cow slaughter during the last part of 1974.

"Also, we should point out that cow slaughter will again have to be large in 1976 if the industry is to return to cow herd to a size which will result in adequate prices for all segments of the industry. This is particularly true in view of continuing high production cost levels."

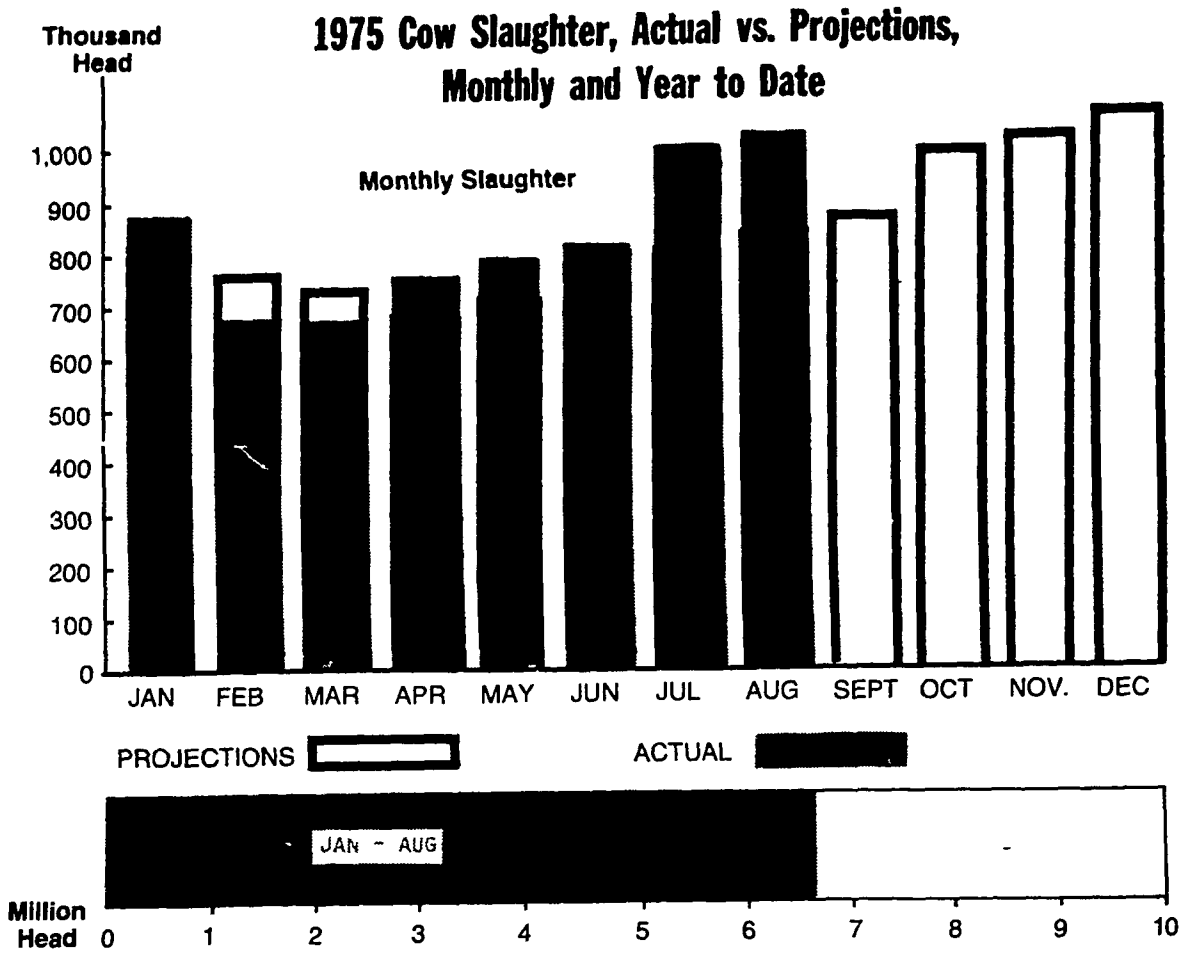
Reviewing the latest slaughter figures and the outlook, ANCA said that, if monthly cow slaughter holds near the one million head level during the last four months of the year, the total 1975 cow slaughter will be more than 10.5 million head.

If approximately nine million replacement heifers go back into the herd during 1975, the total cow herd on January 1, 1976, will be reduced by some 1.5 million head, or three percent from January 1, 1975.

ANCA quoted agricultural college economists and others as urging cow men to continue close culling of their herds now while supplies of competitive meats - particularly pork - are down and while the effect of heavy non-fed slaughter will be less market-depressing than otherwise would be the case.

"Poultry production already is increasing over year-earlier levels," it was noted, "and government reports show that pig farrowings are likely to increase as we move through 1976. It is important that cattle numbers adjustments take place before competitive meat output picks up sharply.

"Total cattle inventories still are at or near the highest levels in history, and total numbers as well as the cow herd need to get into better balance with demand."



Pa. Poultry Queen to be named Oct. 31

Pennsylvania poultrymen will gather at the Embers Restaurant in Carlisle, Pa. on Friday evening, Oct. 31, to witness the selection of the Pennsylvania Poultry Queen.

The dinner pageant begins with a social hour at 6:30 p.m. followed by dinner at 7:30 p.m.

Three finalists will compete for the title this year representing Lancaster, Schuylkill and York Counties.

Lancaster County will be represented by Miss Judy Stoltzfus, who is sponsored by the Lancaster County Poultry Association. Miss Stoltzfus is a resident of Mount Joy, Pennsylvania and a senior at Donegal High School.

Schuylkill County is represented by Miss Dawn Heisler, who is sponsored by Agway. Miss Heisler is a 1975 graduate of Tamaqua High School and presently a student at the Pennsylvania Junior College of Medical Arts in Harrisburg, Pennsylvania.

York County will be represented by Miss Julie Lanius, who is sponsored by the York County Poultry Association. Miss Lanius is a resident of Stewartstown, Pa. and a senior at Kennard-Dale High School.

Master of Ceremonies for the festivities will be "Mac" McCauley, well-known radio celebrity for WCMB radio in Harrisburg, Pa.

Judges include Melissa Piper, Associate Editor, Lancaster Farming; Carl Grubic, Vice President, Commonwealth National Bank; and Delphine Lynch, housewife and former coordinator for the annual state pageant.

The general public is invited and can obtain dinner tickets by writing to the Pennsylvania Poultry Federation, 3807 Paxton St., Harrisburg, Pa. 17111.

week with few losses of animals.

A tobacco shed on the property of Paul G. Martin, Crest Rd., was also destroyed by the tornado leaving in its wake a large pile of tubble and dirt.

The storm hit the area between 6:30-7:00 p.m. on Saturday evening giving little warning to any residents. Many residents reported hearing hail but did not realize a tornado was about to strike. Along with the damaged properties, many trees were uprooted and scattered along the fields and roadsides causing halts in traffic.

Hunting details given

There will be two seasons on Canada geese this year, with the first segment closing on Saturday, December 6. The second Canada goose season will open one-half hour before sunrise on Thursday, January 1, and close at sunset on Saturday, January 17.

This year's Canada goose season was split, with the latter segement being scheduled in January, to help alleviate excessive crop damage caused by the honkers in southeastern Pennsylvania. Hopefully, hunters will be able to harvest some of the over-wintering birds.

The season on blue and snow geese, the first since 1931, will close on November 13. Hunters are cautioned to be especially sure of their targets when attempting to take blue and snow geese.

Snow geese have white feathers, with black wing tips, and can easily be confused with swans, which are protected and may not be taken. A blue goose has a white head and neck, with brownish body feathers. Blue and snow geese are seldom seen in Pennsulvania, and the legal statewide harvest of both species probably won't total more than several dozen birds.

Daily and possession limits for 1975 follow: ducks, 4 and 8; sea ducks (scoter, eider and oldsquaw), 7 and 14 in addition to the regular duck limits; coots, 15 and 30; mergansers, 5 and 10; Canada geese, 3 and 6, except that the daily Canada goose limit is 1 in Crawford County and at the Middle Creek Wildlife Management Area in Lebanon and Lancaster Counties; snow and blue geese, 2 and 4.

A gunner may not take more than 2 wood ducks per day, and he or she may not have more than 2 woodies in his or her possession. Not more than 2 black ducks may be taken daily, and a hunter may not have more than 4 of the species in possession.

Although the daily limit on mergansers is 5 with a possession limit of 10, not more than 1 hooded merganser may be taken daily, and the possession limit on hooded mergansers is 2.

Hunters are reminded that there is no open season this year on canvasback and redhead ducks and swans.

Pre-season reports indicate that waterfowl reporduction was rather good this year. Plentiful rains during the spring and early fall and other favorable nesting conditions have produced real good supplies of ducks and geese, many of which should be migrating through Pennsylvania this fall

FFA alumni to meet

The 4th Annual Convention of the National FFA Alumni Association will be held November 13 and 14, 1975 at the Muehlebach Hotel in Kansas City, Missouri.

The Meeting is expected to attract more than 1,000 FFA Alumni members from across the country. The two half-day sessions, beginning at 9:00 a.m. are held in conjunction with the National FFA Convention.

Presiding over the sessions will be Dr. James Clouse, National FFA Alumnia Chairman and Head of Agricultural Education at Virginia Polytechnic Institute and State University. Country humorist Jerry Clower will be a featured speaker.

"FFA Alumni Outstanding Achievement Awards" will be presented to three FFA Alumnia members for outstanding achievements and services to agriculture. Over 100 "Legion of Merit Citations" will be presented for active leadership in building the FFA Alumni Association. In addition to the presentations, a business meeting will be conducted, special committee meetings will be held, and new officers elected. An address by Vice President Nelson Rockefeller at the FFA Convention session will climax the event.

The FFA Alumni Association is an organization dedicated to assisting the FFA, promoting a greater knowledge of the agricultural industry, and supporting education in agriculture. The fast growing organization has had an acutal membership increase of over 80 percent the past year. All former FFA members are invited to attend the annual meeting and join the FFA Alumni movement. For more information, write: FFA Alumni Association, P.O. Box 15058, Alexandria, Virginia 22309.

Conservation recommended

WASHINGTON — Strong concern about the identification, location and availability of prime farmland — as well as about the quality of the nation's water resources — was expressed in recommendations recently to the U.S. Department of Agriculture by the Public Advisory Committee on Soil and Water Conservation. The Committee made its recommendations at the conclusion of its three-day meeting here.

Regarding prime farmland, the Committee recommended that USDA, utilizing SCS soil surveys, further expedite current inventorying and monitoring efforst to define and identify this resource.

Concern about water resources was reflected in the Committee's recommendation that USDA support the inclusion of nonstructural measures in watershed plans and that cost sharing be authorized for these measures could include public acquisition of land in flood plains, relocation of activities in flood plains, floodproofing individual buildings, or installation of flood warning systems.

Farmers benefit from tax credits

CHICAGO — The nation's farmers have an important direct stake in the current Congressional consideration of investment tax credits, Emmett Barker, executive secretary of the Farm and Industrial Equipment Institute, said recently.

The investment tax credit on farm machinery currently is ten percent. But it will revert back to seven percent at the end of 1976 unless Congress decides to continue it at the present level or even increase it to 12 percent as some have proposed.

"I'm afraid too many people think of the investment tax credit only as some benefit to big business and overlook the fact it is of major importance to farmers, contractors, and others," Barker said. "If it is allowed to revert back to seven percent it would have the effect of increasing the farmer's cost of buying - machinery more than three percent."

Reduces Farmer Cost

The investment tax credit reduces the net cost of farm machinery to farmers.

If a farmer buys a $10,000 piece of machinery, he currently receives an investment tax credit of $1,000. This reduces his income tax by $1,000 and has the effect of reducing the cost of the piece of machinery to $9,000.

If the credit reverts back to seven percent, the tax credit on a $10,000 machine would be reduced to $700 and the net result would be that the cost of the piece of machinery would go up $300 from $9,000 to $9,300.

However, if the investment tax credit is increased to 12 percent from the present ten percent, the credit on a $10,000 machine would be increased to $1,200, and the effect would be to reduce the cost to $8,800 from the present net cost of $9,000.

"At a time when the government is encouraging farmers to increase their production it is important that government encourages farmers by at least continuing the ten percent credit on the new and more productive machinery they need to up food production," Barker said.

Directors named to farm credit boards

WASHINGTON, D.C. — Governor W. M. Harding of the Farm Credit Administration today announced appointment of three farmers to serve as directors - at - large on the boards of the Farm Credit Banks of Omaha, New Orleans and Baltimore.

The three are Eugene Gustafson, Phillips, Nebraska; Aven Whittington, Greenwood, Mississippi; and Oscar Nevares, Bayamon, Puerto Rico. The appointments, made with the advice and consent of the Federal Farm Credit Board meeting here this week, are for 3-year terms beginning January 1.

The new appointees succeed Richard E. Spangler, Plattsmouth, Nebraska; Marion S. Monk, Jr., Batchelor, Louisiana; and Miguel A. Pons, San Juan, Puerto Rico, whose terms of office on their respective boards expire at year-end and who are not eligible for reappointment.

District boards, one in each of the 12 Farm Credit Districts, set policies in their areas for the lending units of the Farm Credit System - the Federal Land Banks and local Federal Land Bank Associations; the Federal Intermediate Credit Banks and the Production Credit Associations; and the Banks for Cooperatives. Nationwide, farmers and their cooperatives borrow more than $30 billion annually through these banks and associations.

States served by the Farm Credit Banks of Omaha are Iowa, Nebraska, South Dakota and Wyoming. The New Orleans District includes Alabama, Mississippi and Louisiana. The Baltimore District encompasses Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia and Puerto Rico.

Gustafson's farming operation, which is incorporated with a son, includes 573 owned acres and the rental of another 520 acres. They raise corn, milo, hogs and calves. Gustafson has been active in many cooperative organizations, currently serving as board president of the Aurora Cooperative Elevator Company in Aurora, Nebraska, and as a director of FAR—MAR—CO, a regional grain marketing cooperative in Hutchinson, Kansas. He is a former director and chairman of his local Production Credit Association, is a Federal Land Bank Association member and has been active in numerous community organizations.

Whittington's operation includes about 2600 acres devoted to cotton production as well as acreages of soybeans, small grains and silage. He also runs about 600 brood cows and produces hardwood timber. Whittington is active in a variety of cooperative organizations, presently serving as a member of the executive committee of Mississippi Chemical Corporation, a regional fertilizer cooperative, a director of Staple Cotton Services Association, and president, Farmer Supply Cooperative, local supply elevator at Greenwood. He formerly was vice president of the National Cotton Council, a director of the Mississippi Farm Bureau and president of the Mississippi Association of Soil Conservation Commissioners. Whittington has also been active in community organizations and is a member of the Staple Cotton Discount Corporation, a financing institution funded by the Federal Intermediate Credit Bank of New Orleans.

Nevares owns and operates with a son two dairy farms which produce 8,000 to 10,000 quarts of milk daily. Nevares if past president of the Sociedad Agricola Cooperativa, a farm supply cooperative, and is a director of the Puerto Rico Farm Bureau. He is a member of the Federal Land Bank Association of San Juan.

District Farm Credit Boards are composed of seven members. Six are elected - two each by the three banking groups of the System and the seventh is appointed by the Governor of FCA. Appointed members are limited to serving two terms.

Kentucky Brown Swiss sale slated for Oct. 25

Over 60 head of registered Brown Swiss cattle from ten states will sell in the Kentucky National Show and Sale at Louisville, Kentucky on Saturday, October 25. To take place in the Kentucky State Fair and Exposition Center, the show will begin at 9:00 a.m. and the sale will open at 12:00 noon in Newmarket Hall at the same location.

Cooperatively sponsored by the Kentucky Department of Agriculture and the Kentucky Brown Swiss Association, this sale is being managed by Brown Swiss Enterprises, Inc., the marketing arm of the Brown Swiss Cattle Breeders' Association of America.

The event, which is one of five such purebred dairy cattle shows sponsored annually by the breed associations and the Kentucky Department of Agriculture, is designed to promote the nation's dairy cattle business through recognition of the industry's finest animals. The Brown Swiss Show is the oldest of the five, the first being held in 1962.

All consignments have met above national breed average standards for both production and type. Most of the cows are classified "Very Good" or "Excellent" and the heifers and bulls have dams of the same quality. Selling in this outstanding group of cattle will be 27 cows, 21 bred and open yearling heifers and 14 junior and senior calves. The young calves were chosen with 4-H and FFA project work in mind. Two very promising young bulls with depth of pedigree, backed by records of production and classification, will also sell in the auction.

Brown Swiss, probably the oldest of our present day breeds of dairy cattle, were first introduced into the United States over 100 years ago. According to Marvin L. Kruse, Secretary - Treasurer of the National Brown Swiss Association, the "Big Brown Cow" is being sought because she has proven her ability to produce and reproduce under a wide range of conditions. The highest 305 day butterfat record, 1171 pounds, of all cows of all breeds recently exhibited at the 1975 World Dairy Expo was a Brown Swiss.

Cattle in the Kentucky National Show and Sale have been selected from 53 outstanding herds in 10 states.

7-WAYS TO CUT HOME HEATING COSTS

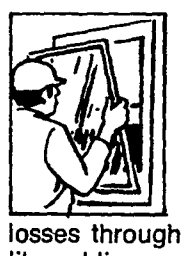
...No matter how you heat your home!

Energy is money. Big money as far as home heating is concerned . . . whether it's by oil, gas, electricity or coal. So, here's how to save. Seven ways, starting now.

INSULATE!

Insulating an uninsulated home can reduce fuel bills up to 50 per cent. Even if you have insulation do you have enough? Fact is, today's higher energy costs often justify adding more.

Your insulation should be at least 3½ inches thick in the walls and 8 inches thick in the attic.



ADD STORM WINDOWS AND DOORS

Storm sash and doors can cut heat losses through windows and doors in half. And, just like adding insulation, this is an investment that can pay for itself.

SEAL THOSE CRACKS

Don't throw heating dollars to the wind. Caulk or weatherstrip for a tight seal around windows, doors and foundation sills.

MAKE DRAPERIES FUNCTIONAL

Insulated drapes help hold heat in, cold out. Draw your drapes at night . . . open them on sunny days to take advantage of heat from the sun.

USE YOUR FIREPLACE WISELY

Don't let household heat go up the fireplace chimney. Always make sure the damper is closed when not in use. Also, don't use your fireplace to help heat your home if the difference between inside and outside temperature is more than 30 degrees. If you do, you may lose more heat from your house than you gain from the open fire.

ADJUST THAT THERMOSTAT

Set thermostat no higher than 68 degrees during the day and lower it a few degrees at bedtime. Generally, for *each* degree you can reduce the setting you'll be saving about 3 per cent. Also, if you can, lower heat or turn it off in rooms seldom used.

KEEP HEATING SYSTEM IN TIP-TOP SHAPE

With warm-air heat, clean or replace furnace filters at regular intervals. Some blower motors or water circulating pumps may require a drop or two of oil at the start of each heating season. Vacuum-clean registers, baseboard units or radiators. Even a thin layer of dust can impair heat radiating ability. For top efficiency in fuel-fired systems, don't forget the recommended cleanings and adjustments by your serviceman.

Remember, energy is money. Plan for home heating savings now.

An Energy Saving Message From **PP&L**

IT'S NEW...IT'S HERE NOW!

Master Mix

PRECISION BABY PIG FEEDING PROGRAM

The greatest breakthrough in baby pig nutrition in over 25 years.

After extensive research and feeding trials, Master Mix ® brings you an exclusive, more precise way to feed baby pigs. They get more energy and a carefully formulated ration that lowers your cost of gain while producing more uniform litters. And our research shows little or no scouring. Baby pigs really like those tasty, easy-to-eat mini-pellets, too!

The Master Mix Precision Baby Pig Feeding Program featuring PRIMER I Baby Pig Pre-Starter and PRIMER II Pig Starter is here now! Stop in today for all the details.

Looking ahead for agriculture

By James McHale
Pa. Secretary
of Agriculture

As 1976 approaches, it is time for farmers to take an interest in the expected adjustment of floor prices for certain commodities.

These floor prices - in the form of target prices and loan rates - should move upward to compensate for increased farm costs. The question is: How much?

For the uninitiated, the Agriculture and Consumer Protection Act passed in 1973 established a new concept of target price levels for certain crops. Instead of paying farmers not to produce, the target price concept was to encourage production by guaranteeing farmers a floor price to counter price depressing surpluses.

If market prices dip below target levels, which they have not done, then farmers would be paid the difference between the low market price and the target level.

Another mechanism to help farmers is the support loan. Farmers can take out loans on their crops and either redeem their crops if the market improves or convert the loans into payments.

Loans or target prices are really not too much help if rates or levels are unrealistically low.

For example, the current loan rate on corn is $1.10 a bushel. This is only a little more than a third of the average price received by farmers in September of $2.76. The loan level of $1.37 for wheat compares with the September average farm price of $4.11. Why take loans when the rates are 35 percent of parity for corn and 29 percent of parity for wheat?

Target prices on wheat are $2.05 a bushel and $1.38 for corn. If the market crashed and farmers had to rely on these target levels, they would be hard pressed to recover even a portion of the cost of production.

USDA relentlessly opposed the 1973 Agriculture and Consumer Protection Act, saying it would cost taxpayers billions in the form of farm subsidies.

While USDA did not succeed in blocking passage of the act, it did succeed in blocking an escalator provision from taking effect until 1976. This means target prices have stagnated while inflation roared for the past two years, another feature making the act a less than potent aid to farmers. USDA has discretionary authority to raise loan rates on wheat, corn and other feed grains, but has chosen not to do so.

All right. Now we are getting close to 1976 and the target or floor prices for commodities can finally be escalated. It is expected that these prices will be pushed up by 10 to 12 percent, raising corn to about $1.55 a bushel and wheat to about $2.30 a bushel.

I don't think that's enough. Some senators don't either.

Sen. Henry Bellmon (R-Okla.), who sponsored a bill last year making the escalator adjustment cumulative back to 1973, this year is sponsoring S. 1858, a bill to require USDA to take more factors into consideration than just the index of farmers' outlays for commodities, services, interest, taxes and wage rates in computing the escalator. Bellmon wants the full increases in farm input costs to be reflected.

Milk prices are also adjusted under the farm act. Recently, USDA raised the support price for manufacturing milk from $7.24 to $7.71 per hundredweight.

The problem is that milk prices are generally adjusted once a year. Dairy organizations have pushed hard for quarterly adjustments, the argument being that parity slips well below 80 percent in a year's time because of fast rising production costs.

Again, it is the old story. Farmers want to produce. But unlike industries that can control their inventories, farmers require guarantees against price depressing surpluses. The Agriculture and Consumer Protection Act was a step in the right direction, but now the next step of realistic floor prices must be taken.

Terrarium courses offered

Longwood Gardens, near Kennett Square, Pennsylvania, will offer a two-session course in terrariums on consecutive Thursdays, November 6th and 13th. A lecture and demonstration will be presented during the first session and students will make their own terrariums in the second with plants and containers supplied by Longwood Gardens. Both morning and evening section of the course are scheduled, though there are very few openings remaining in the morning section. The morning classes will meet from 9:30 to 11:00 A.M., the evening ones from 7:30 to 9:00 P.M. Registration for the course is $20.00 and will close on October 24.

Longwood Gardens is one of the finest display gardens in the world, its conservatories and fountains rivaling those of many well-known European gardens. During the months of October and November, an outstanding display of chrysanthemums will be featured in the conservatories. There is also a new exhibit of container - grown plants suitable for homes and offices. The conservatories at Longwood are open daily from 10:00 A.M. to 5 P.M., the grounds from 9:00 A.M. to 6:00 P.M. There is no admission fee charged.

For more information on the terrarium course or on Longwood Gardens, call 215-388-6741, ext. 242, or write Longwood Gardens, Kennett Square, Pennsylvania 19348.

HELPFUL IDEAS FOR SUCCESSFUL RETIREMENT

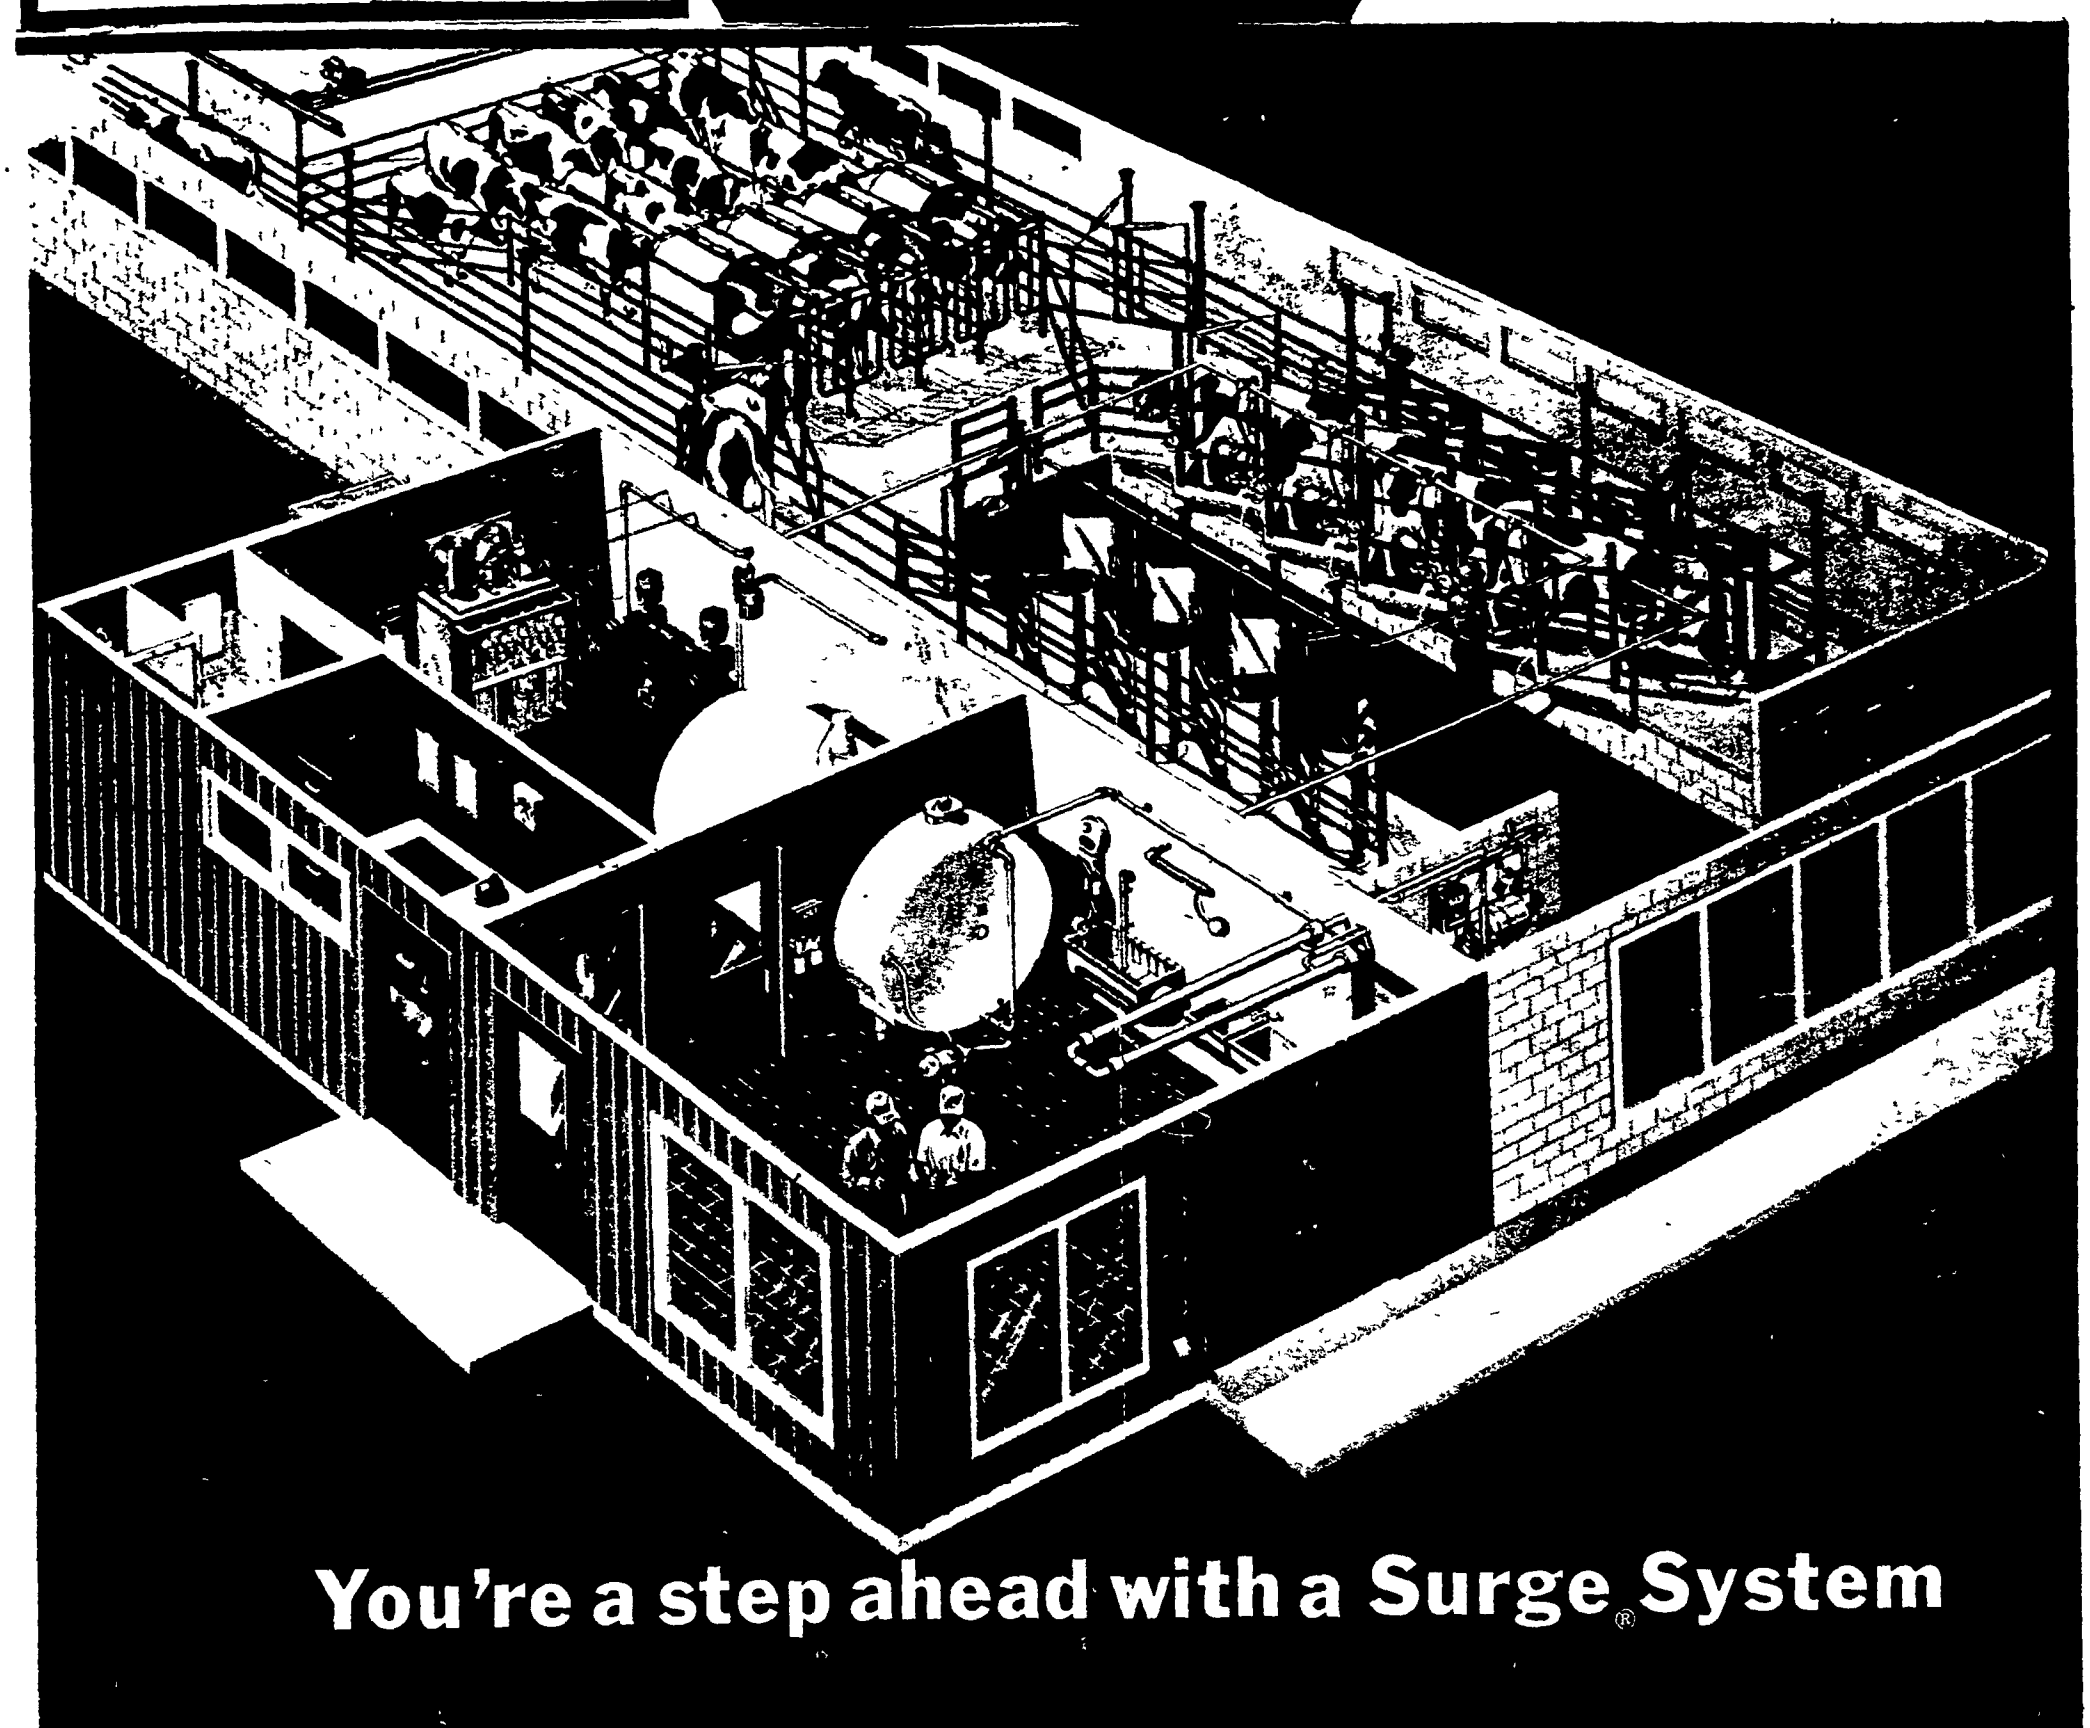
Social Security Changes

As of June Social Security benefits automatically increased according to the rise in the Consumer Price Index as of April 1 1975 The law calls for possible further hikes in benefits for every year thereafter—the amount depending upon the cost of living increase Thus 1975 will bring major changes for the 30 million people who get Social Security benefits and for many of those who pay the taxes to support the system

Since January of this year you if eligible, may earn up to $2 520 a year and still draw full Social Security benefits If you exceed $2,520 you ll lose $1 in benefits for each $2 earned During 1974 that ceiling was $2 400

No matter how much you earn during the year you are entitled to a social security check for any month in which you do not earn more than $210 In 1974 this figure was $200

Employees are not alone in bearing the burden of increased costs for your Social Security Employers have to match the amount of Social Security paid by all of their employee . and also must shell out increasing amounts for other payroll taxes such as unemployment compensation and workmen's compensation



You're a step ahead with a Surge® System

We can plan, install and service a complete milking system. One that provides maximum return on the money, time and labor that you invest. For more information, CALL YOUR SURGE® DEALER

Emergency conservation program announced

LANCASTER — The Lancaster County ASC Committee has received $15,000 to help farmers restore farmland damaged by recent rains and flood.

The Emergency Conservation Measures Program provides up to 80 percent of the cost to restore farmland an conservation structures damaged by natural disasters.

Cost-sharing must be requested at the ASCS Office, and the area will be inspected prior to approval. Final date to file application is October 28.

Practices approved for cost-sharing include: EC1 - Removing debris from farmland; EC2 Grading, shaping, releveling, or similar measures; EC3 Restoring permanent fences; EC4 Restoring structures and other installations.

Farmers who suffer a substantial reduction in corn yield because of a natural disaster, may be eligible for payment under the 1975 Wheat and Feed Grain Program.

The disaster payment is based on the smaller of the planted acreage or farm allotment times the disaster yield established for the farm.

Farmers who suffer a loss must file application within fifteen days after harvest.

If the grain cannot be harvested, a field appraisal will be made. However, this must be reported to the office before the field is plowed, or the crop residue removed.

In other news from the ACSC office:

Interest Rate Increases

USDA has announced that the interest rate on crop loans, and farm storage facility or dryer loans increased to 7.5 percent as of October 1.

Commodity Credit Corporation is required to adjust interest rates semi - annually. These are made in March and October of each year, and are based on the cost to CCC of borrowing money from the U.S. Treasury.

Agricultural Conservation Program

Enrollment in the 1975 ACP has been closed, since available funds are used.

Farmers who received tentative approval should notify us as soon as they are ready to start the practice.

Farmers may nominate any farmer in their Community to be a candidate for ASC Community Committeeman. Details and nomination forms were mailed to all farmers on October 2.

Nominating petitions must be filed with this office by October 28. If at least six moninating petitions are not received in each of the 15 communities, the present Community Committee will complete the slate of nominees.

Ballots will be mailed to all eligible voters on November 21 and must be returned by December 1.

Special activities set for young Grange members

HARRISBURG - Young people, from five to thirty-five years old, will have their day at the Pennsylvania State Grange convention in Lancaster on October 29.

While delegates to the four-day convention will be busy with committee reports and policy-making resolutions, young Grangers in both the junior and youth groups will participate in special activities that day.

The state Grange convention opens Monday, Oct. 27, at 1:30 p.m. and continues until Thursday afternoon. Daytime sessions will be in the historic Fulton Opera House in downtown Lancaster, with the evening sessions and special events at McCaskey High School, Lincoln Junior High School, and Wickersham Elementary School in the North Reservior and North Broad Street section of the city.

Special activities for young people Wednesday will open with a youth ritual and demonstration contest at 1 p.m at the Lincoln Junior High School The winning team will have the honor of conducting the opening ceremonies for the state convention Thursday morning.

At 4 p.m. Wednesday, the junior degree will be conferred on youngsters in the five-fourteen age group at Wickersham Elementary School.

The annual youth banquet for the 14-35 age group will be held from 5 to 6:30 p.m. at the McCaksey High School cafeteria. This will be followed by a short program and awards ceremony at which Mrs. John W. Scott, wife of the National Grange Master, will be the speaker.

Concluding the day's activities will be a youth party in the McCaskey High School cafeteria. It will begin at about 9:15 p.m. following conferral of the sixth degree, and will be sponsored by the Pomona Granges of Lancaster, Chester-Delaware and Montgomery Counties which are hosting the general convention.

Douglas A. Bonsall, of Millerstown RD1, is the state Grange Youth director. Mrs. Alan Merkel, of Kutztown RD3, is the state director of junior Granges.

Butz defends farm exports

Editor's Note: Following is the major portion of a speech delivered by US Secretary of Agriculture, Earl Butz, before the Newspaper Food Editors Conference earlier this month in Chicago.

CHICAGO — "There's a general feeling in this country that farm exports simply jack up the price of food to American consumers. That isn't so. The sales are in the best interests of American farmers, consumers, job holders — and the people in other countries who depend on our food. These sales are also beneficial to world economic development and the maintenance of peace itself.

If farm exports were still running at the $6 billion annual level of 1969, instead of the current $22 billion level, many farmers would be broke. The cost of government subsidies aimed at keeping the rest from going out of business would be astronomical. The value of the dollar would be shattered as the result of huge trade deficits. The price of all imports, including gasoline, would have gone right through the roof. Grocery shelves would be missing a good many items and American consumers would be worrying more about food shortages than food prices. Many more people would be out of work due to the drop in purchases from industry's largest customer, American agriculture.

Farm exports help keep this country's agriculture strong and functioning at efficient, fully productive levels. American farmers can produce far more agricultural commodities than we can possibly consume here at home. Farmers must have a foreign market for this production if they are to be able to purchase the supplies they need and keep their farms functioning at a capacity that will serve American consumers with ample supplies at reasonable prices.

The facts are:

- American farmers must export two-thirds of this year's wheat crop if they are to continue to keep their wheat land in production and purchase the combines to harvest the crop.
- American farmers must be able to export 50 percent of the soybeans they are now harvesting if they are to be able to plant as much acreage next spring and pay for the tractors that provide jobs for men working in factories.
- American farmers must be able to export more than 55 percent of the 1975 rice crop if rice is to continue to be an economic crop that brings jobs and incomes to those who transport our commodities overseas.
- American farmers must be able to export 40 percent of the cotton they produced this year if they are to consider growing more next year and be able to buy the toasters, rugs, refrigerators, clothing, and other consumer products manufactured by industry.
- American farmers must be able to export at least one-fourth of all the feed grains they produce this year if they are to stay in business in the years ahead and produce the meat and milk that America needs and wants.

Those are the facts of American farm policy. They are the facts of keeping American farming profitable and American consumers well fed at the lowest possible costs. They are the facts behind the Russian wheat sale, the Japanese soybean sale, the Polish feed grain sale, the Korean cotton sale, or any other commercial sale of American farm products overseas.

The alternative is to turn back to the bankrupt farm policies of the last 40 years. The policies of agricultural restraint; the policies of controlled scarcity. Paying farmers not to grow food. Paying farmers to remove their land from production during a time of growing world hunger and higher grocery prices here at home.

Those old programs never worked. They never brought prosperity to farmers, and they weren't in the best interests of consumers. What they brought was inefficiency on the farm and higher tax bills to everybody. As recently as three years ago American taxpayers were paying up to $4 billion a year for farm programs, mostly for taking land out of production. Now farm program costs are under $1 billion — and most of that goes for disaster payments in time of emergency.

We are a fortunate people in a rich nation. Our land is blessed with an abundant soil of sufficient breadth, depth and quality to raise the finest crops and livestock on earth. We have a mixed, vigorous, yet gentle climate that will raise most of the major crops man relies on for food. But something must happen to turn that potential into food.

We have a class of farmers who are free, well educated, know what they are doing, and love what they are doing. They want only to be able to make a decent income raising the crops and livestock that consumers enjoy in our own country and that many other countries need for survival. They are the ones who own the land, care for it, work on it, and produce the food. What a magnificent job they do.

So why all the flap about farm exports? Why not let these men and women of the American soil go about their business and do what's needed to best provide food for the rest of us?

The answer is emotionalism. The answer is politics. The answer is misinformation and misunderstanding. The facts concerning the farmers' needs for overseas markets are adrift in a sea of half-truths, statements for political and personal gain, and short-term thinking. You can do something about that.

What we actually see, when we look at the productive capacity of rural America, is almost too good to believe. We see a group of efficient, independent farm businessmen — as sharp as any group of businessmen in

[Continued on Page 79]

Why you should add

THE EFFICIENCY FACTOR

to your feeding program

With feed at 5¢ per pound and cattle selling at 35¢ a pound, an investment of less than $1.00 per head for AUREO S 700 and AUREOMYCIN® returned $5.75 in five commercial trials.

When cattle arrive at your feedlot, they've been stressed and exposed to a variety of disease organisms Start them with a conditioning feed containing AUREO S 700 and feed it for the first 28 days. AUREO S 700 maintains weight gains in the presence of shipping fever

Then, follow up with feeds containing AUREOMYCIN chlortetracycline AUREOMYCIN not only provides for excellent growth and feed efficiency, but also helps reduce losses from liver abscesses, foot rot and bacterial diarrhea

For complete details contact any of the feed manufacturers listed below, or call or write The Fox Company

Blue Mt. young farmers plan year's activities

Executive committee of Route One, Schuylkill Haven met to finalize plans for the remainder of 1975 and plan activities for 1976. Educational and social activities were planned. This month's activity is a square dance to be held in the dining hall of the High School at 7:30 p.m. on Saturday, October 18. Educational films will also be shown. Refreshments will be served. Elwood Staudt will provide the music and call the figures. Staudt is the advisor of the Blue Mountain Chapter.

The November activity is a volleyball contest and will be held in the gymnasium of the High School on Saturday evening November 15 at 7:30 p.m.

The Christmas Banquet will be held on Saturday evening, December 20 at 7 p.m. in St. John's United Church of Christ of Friedensburg. Wilbert Moyer is chairman of the committee and asks that each family bring a gift for their child. The theme for the banquet is "Keeping Christ In Christmas." Dr. Pawling will present a Chalk Talk and is known throughout the world for his service to mankind. Visitors are invited to attend to hear this outstanding program. Reservations must be made before Thanksgiving.

The 1976 activities begin with a volleyball contest on Friday, January 9 at 7:30 p.m. in the gymnasium of the High School. Welding classes will begin on January 15 at 7 p.m. and will continue every Thursday for 13 weeks. The welding tuition is $18.00 and class enrollment is accepted on a first come basis. Checks should be made payable to Blue Mountain Welding Class. Square dance classes will begin on January 20 at 7 p.m. and will meet every Tuesday for 12 weeks. The square dance fee is $10.00 and class enrollment is accepted on a first come first serve basis. Checks should be made payable to Blue Mountain Square Dance Class.

February 21 - Square Dance
March 2 - Combine Repair and Maintenance Class
March 20 - Bowling
April 5 - Home Gardening Class
April 9 - Square Dance
May 3 - Home Gardening Class
May 15 - Horse Race
June 6 - Picnic & Homemade Ice Cream Party
July 16 & 17 - Pa. State Young Farmer Farm Tour
August 24 - Local Agriculture Tour
Septepber 4 - Corn Roast & Auction
October 2 - Lipizzan Horse Show, Hershey.
October 22 - Square Dance
Novemebr 20 - Volleyball
December 10 - Christmas Banquet: A bell musical program by Christ.

Additional education classes will be planned in cooperation with Extension Service as well as special requests from taxpapers.

Sept. milk production

HARRISBURG — Milk production in Pennsylvania during September was 566 million pounds, down one percent from a year ago, according to the Crop Reporting Service. The number of milk cows in the commonwealth during September was 686,000 head, up 1,000 from last month but 4,000 below a year earlier.

Milk production per cow averaged 825 pounds in September, the same as a year ago, but three percent above September 1973.

United States milk production during September is estimated at 9,101 million pounds, 0.4 percent below a year ago. U.S. Milk production per cow averaged 818 pounds, three percent above a year ago and 34 pounds above September 1973. Milk cows on the farms during September totaled 11,132,000 head, down 5,000 from a month earlier and 0.7 percent below a year earlier.

Weed scientist cautions no-till corn farmers

BLOOMINGTON, Ill. — "If you're going with no-tillage next year, make sure you've got your plans made well in advance." That's the advice of Dr. Marshal McGlamery, University of Illinois extension agronomist specializing in weed control.

He offered that comment and provided a list of what he called "no-no's for no-till" at a recent Farm Managers Seminar hosted by Funk Seeds International. Over 100 farm managers representing 2,000,000 acres of Illinois and Indiana farmland were on hand at the Funk meeting.

Dr. McGlamery recommended that corn growers do not consider no-tillage practices:

—of they have serious, recurring perennial weed control problems that cannot be managed with available herbicides;

—if they try to get by with minimum rates in order to save a few dollars;

—if no knock-down herbicide, such as Paraquat, is used;

—if no spreader of surfactant is used;

—if the herbicides selected do not have full season residual control;

—if the grower is not familiar with the correct herbicide to use for his particular weed problem;

—if the individual operating the sprayer is not adequately trained to apply the correct herbicide rate;

—if the grower does not know the correct time to spray for his particular weed problems;

—if the sprayer is not properly calibrated and maintained.

"No-tillage will work and has many advantages for the individual who is willing to take the time to plan a complete program," Dr. McGlamery stated, "but the time to start planning next year's no-till program is right now."

6 ways your Crop Care® dealer helps you make better crop profits:

To help you farm better, and make more money, your Crop Care dealer offers the following services

1 Complete, accurate, soil testing service. Your Certified Crop Care dealer will take your soil samples and send them for you to a leading soil analysis laboratory The laboratory soil analysis and computerized fertilizer recommendations will be delivered to you

2 Plant Analysis. Your Crop Care dealer will help you take samples, and handle all details, up to and including delivering to you the printed analysis of the nutrient uptake of your plants This service pinpoints deficiencies in uptake of nutrients particularly minor elements, such as zinc, boron, etc

3 One-source responsibility for your farm chemicals Your Certified Crop Care dealer offers weed and pest control programs, as well as fertilization of your crop land In some instances, your Crop Care dealer may render a complete range of services from seed corn all the way through drying corn at harvest time

4 Full measure. You will receive certification that guarantees your getting full weight or volume of fertilizer, or other farm chemicals, you order from your Crop Care dealer

5 Professional counsel. Your Crop Care dealer is well informed on agronomy He attends forums that keep him up-to-date on the latest crop care techniques Your Crop Care dealer is a central source of information about successful farming ideas used in your area And he can draw on the experiences and techniques of other Crop Care dealers in the network

6 Skilled, professional application. As a part of his total Crop Care service, your dealer offers custom application of fertilizer and other farm chemicals Application may be made by one of your Crop Care dealer crews, or he may arrange for application by an independent applicator

The services your Crop Care dealer offers are designed to help you get maximum yield, and to free up your time to do what you do best **Manage.** Nobody can manage your farming operation like you Your Certified Crop Care dealer can provide professional advice and services to help you do it **better.**

Remember, you get Certified Crop Care Center services **only** where you see this sign

Lebanon Holstein banquet held

MOUNT ZION — Lebanon County Holstein breeders met here at the Zoars Lutheran Church Fellowship Hall recently for their annual banquet and meeting, with opening remarks presented by president - Albert Moyer and Lebanon County dairy princess, Brenda Maulfair.

Three new directors were elected, those being: Raymond Getz, Ernest Hostetter, and Ronald Lentz. They will fill the expiring terms of Ken Sellers, Richard Shirk, and Clyde Meyer.

Hershey Bare was elected to serve a three year term as state director for Lebanon County.

Among those giving reports on activities of the club, and the state association, were: Howard Weiss - state directors report and export sales report; J. Robert Morris - Pa. Holstein Association and the upcoming annual convention; Mike Nolan - classification program for eastern Pa.; Lester Jones - milk promotion in Federal Order 4; Ray Weaber - milk promotion.

National Holstein Associatic.. representative, Mike Nolan, noted that 28,000 cows have been classified in eastern Pa. so far this year, compared with 22,000 at this time last year.

Awards were given to the winners of the milk and fat contest for 4-H and FFA members. First place winners in each class received a trophy and second place a plaque. Third place winners received a picture of the ideal cow.

Following is a list of winners in respective classes:

2 yr. old milk

1st - David Bomgardner; 2nd - Jeff Werner; 3rd - Calvin Hostetter.

3 yr. old milk

1st - Gary Lentz; 2nd - Richard Krall - 3rd - Julie Wagner.

4 yr. old and older milk

1st - Julie Wagner; 2nd - Jeff Werner; 3rd - Jeff Werner.

2 yr. old fat

1st - Calvin Hostetter; 2nd - Jeff Werner; 3rd - David Bomgardner.

3 yr. old fat

1st - Gary Lentz; 2nd - Richard Krall; 3rd - Julie Wagner.

4 yr. old and older fat

1st - Jane Bomgardner; 2nd - Julie Wagner; 3rd - Jeff Werner.

A special award was given to Richard Krall for being the distinguished Holstein boy in the club. Arthur Brandt was cited for having sold the most calf raffle tickets and for giving the prizes at the group's annual field day.

Door prizes were donated by: David Newswenger, Curtiss representative; and Pennfield Corporation.

Longwood Gardens exhibits clibran begonias

The conservatories at Longwood Gardens, near Kennett Square, Pennsylvania, are featuring two plants right now that could be grown in the sunny windows of any house in the Delaware Valley. One of them, the coleus, is so easy to root grow that even "brown thumb" gardeners can have it flourishing in their homes. The other one, Clibran Begonia, requires more skillful propagation and care, but is lovely enough that many people are willing to fuss a little over it. Introduced from England in 1898, the glossy leaves and showy flowers of the Clibran Begonia made it an immediate favorite of horticulturists in this country. Says Gerry deStoppelaar, grower of the beautiful begonias in Longwood's current display, "For me, this plant is a real aristocrat."

If the Clibran Begonia is an aristocrat, the coleus has some rather peasant - like qualities. Longwood's coleus selection includes some unusual varieties with gypsy-red leaves and others predominantly peach - colored, with a bright, yellow - green leaf margin. All coleus root easily under almost any circumstances - a piece broken off and placed in a glass of water develops a robust root system in a matter of days.

The Clibran Begonia, on the other hand, has fairly exacting propagating requirements. It roots best from leaf cuttings taken with a slight "heel," or a piece of the stem, attached. After each cut, the knife used should be dipped in alcohol, as Clibran Begonias are susceptible to a number of diseases. Cuttings must be placed carefully in sterilized sand (heated to 180 degrees F. for ½ hour in the oven) and staked with wooden plant labels. Staking the leaf cuttings promotes air circulation around them and reduces the possibility of fungal rot.

Gerry takes the cuttings from Longwood's Clibran Begonias between December 1 and December 10 each year, because he feels that the natural light is optimum then for root production. About nine months from the time he takes the cuttings, blooming plants go on display in the Longwood conservatories. They are about three feet tall and have from thirty to forty stems each, with several clusters of flowers per stem. Longwood grows two Clibran Begonia cultivars; 'Emily Clibran' is salmon pink and 'Princess Irene' is pale yellow. White-flowered varieties are also available.

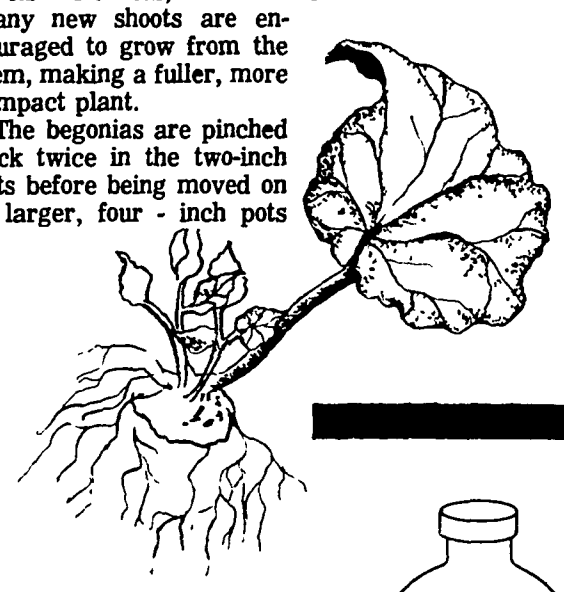
To grow the begonias, Gerry follows a careful regimen of potting the pinching. Within three months of being placed in the sand to root, most of the leaf cuttings form small tubers. New shoots sprout from these tubers and the plants are ready to be placed in the first of a series of clay pots, little, two-inch ones filled with a mixture of one-half sand, one-half peat moss.

Pinching is perhaps the

single most important aspect of raising Clibran Begonias, since it gives the plants their compact, densely - flowered form. It is a simple procedure, based on the natural tendency of plants to produce new shoots from the points on the stem where leaves are attached. By breaking off each shoot down to its third leaf, twice as many new shoots are encouraged to grow from the stem, making a fuller, more compact plant.

The begonias are pinched back twice in the two-inch pots before being moved on to larger, four - inch pots filled with a growing mixture of equal parts soil, peat and charcoal. Thereafter, they are pinched three times per pot, for a total of eleven pinches, as they move first to six -, then to eight -, and finally to ten-inch pots. In the ten - inch pots the plants receive a final three pinches and are then allowed to set flower buds for the September and October conservatory displays.

Because Longwood's conservatories are extrenely large rooms with high ceilings, big plants are needed for proper scale and balance. For the home, smaller plants may be more attractive and are certainly easier to raise. Gerry - recommends growing Clibran Begonias for the home up to the six-inch-pot size, then allowing them to flower. They should be grown in a lightly - shaded window where day temperatures are between 65 and 78 degrees F., and night temperatures can be maintained at about 60 degrees F. At lower temperatures the flower buds of Clibran Begonias do not open.



Longwood Gardens' beautiful begonias will be on display in the Longwood conservatories through the month of October. Longwood is located on U.S. Route 1, northeast of Kennett Square, Pennsylvania. It is one of the outstanding horticultural display gardens in the United States, its great conservatories rivaling those of the finest gardens in Europe. The conservatories are open daily from 10 A.M. to 5 P.M., the grounds from 9 A.M. to 6 P.M. There is an admission fee charged.

Butz defends farm exports

(Continued from Page 75)

the world. We see a level of productivity per worker that has nearly tripled in the last 20 years.

We see capital investment on U.S. farms reaching almost $100,000 per worker, while in manufacturing it approaches only $55,000.

We see that American agriculture, which such a short time ago seemed so dull and non-changing, stands out as the world leader in supplying food, one of man's most basic necessities. We see that it strengthens the dollar in relation to other currencies, and keeps the imported materials and products that we need flowing into our country. Last year agriculture was this nation's number one earner of foreign exchange.

Our agriculture also gives us the negotiating strength to batter through the iron curtain and leap over the top of the bamboo curtain, bringing the world closer to true peace and stability than it has been for many years.

People who live in cities find that agriculture remains more important to them than perhaps they thought. One out of every four jobs in U.S. private employment still relates to agriculture in some way. About 13 million people either process or market farm goods, or provide farmers with supplies. All told, farmers spend more than $100 billion each year on production and family living expenses.

Each billion dollars in farm exports provides about 53,000 non-farm jobs here at home. Each dollar of farm exports brings one new dollar into our overall economy, to be turned over and multiplied into $3 as it is spent and respent, used and reused by a number of consumers.

Those are the sides of farm exports that aren't often talked about. Farm exports give jobs to American longshoremen and shippers, to American tractor manufacturers and industrial workers, and to financial institutions. They allow American farmers to make a decent income, while remaining free from costly government interference. They allow our farmers to produce at capacity, and therefore to be lower per-unit cost producers than if forced to farm at part throttle. This means cheaper food for consumers here at home — and abroad too.

That's why we can say farm exports are consistent with both the wishes of the American consumer and American farmer. Overseas sales of American farm goods make a strong America in a world that is increasingly competitive. They provide abundant food produced at the lowest possible per-unit cost to American consumers. Farm exports allow the American farmer to do his job. They allow him to farm as well as he knows how. They allow him to make the investments necessary to keep his operation ahead of the times and the competition in other lands.

Looking ahead, we are trying to iron out some of the irregularities that come through erratic grain export levels, the uncertainties brought about by in-and-out customers, whose purchases vary tremendously from year to year. This is why we are currently negotiating with the Soviets and others on long term agreements that will assure American farmers of at least a minimum level of off-take of American grains each year. We have already reached an agreement of understanding with Japan over her long-term needs. This is good business for farmers, the Japanese, and American consumers. It helps assure more stable grocery prices, as well as more dependable farm markets.

As more such long term agreements are accomplished, American farmers will be able to plan better for full production down the road, because there will be a ready market for their grain at prices assured to meet mounting production costs and add a little profit.

If we reach this stage not only with the Russians, but also with other major grain importers, we will be a long way toward truly feeding the world's peoples better. The best grain reserve system for us in America is a free system of marketing and unfettered access to world markets that gives farmers the economic incentive to produce.

The best assurance of reasonable food prices is based on a farm policy of plenty.

This can be achieved only through a vigorous and sustained export market for our farm products. To pursue any other course will, in the longer run context, raise food costs here at home, either through higher prices or through higher taxes — or both.

TOTAL FEED COST AT 24 MONTHS.....$265.00*

* Feed costs based on current selling prices and are subject to change.

RECORDS PROVE THE VALUE OF EARLY FRESHENING

Test heifers at the Purina Dairy Research Center demonstrate that attention to good nutrition does permit an earlier first calf. The results further show that younger heifers are capable of producing an excellent milk flow in their first lactation.

A group of 35 test heifers averaged 23.6 months of age when they calved. In 305-day lactations they averaged 12,884 pounds of milk. The mature equivalent for these heifers averaged 17,025 pounds of milk.

Dairymen following the Purina Replacement Heifer Program report heifers producing over 16,000 pounds of milk and 600 pounds of fat in their first lactation. This excellent production enables heifers to repay their growing costs and start earning a good return over feed cost in their first lactation. Important, too, heifers which produce well in their first lactation usually continue to be high producers over a long milking life.
